Virtual Microscopy Workshop

Jan Slapeta

Welcome

Faculty of Veterinary Science
- staff
- eLearning

Medicine
- rep Camperdown
- rep Westmead

Dentistry
- rep Westmead

ICT
- IT support

EMU
- microscopy at USyd

Plan

10.00-10.10 Welcome
10.10-10.40 Introduction by Ricky Connor from Sydney e-Learning (ITL)
10.40-10.55 Introduction by Jan Slapeta
10.55-11.10 An example of the use of Virtual Microscopy by Mark Krockenberger
11.15-11.30 Morning tea
11.30-12.30 Slide development
12.30-1pm Where to from here?

Virtual Microscopy

Scanned slides
Storage of scanned slides
Delivery to user

VM aims to show the power of microscopy as an investigative tool by focusing on the content and ease of delivery.

Today’s Objectives

- Hands on VM-experience
- How do I find my images?
- How do I present my images?
- How do I communicate with users (students) using VM?
- To generate an idea of what the system is capable of and how it can help me with my teaching objectives?
- “Debugging” – this is the first time this system will be used at USyd by more than 3 people

Feedback

Is essential at this pilot initial stage:
- ICT – John (IT issues)
- VetSci – Jan & Mark (How to...)
- eLearning – Rick (Why to...)
