**Project Title:** Maternal and fetal outcomes for pregnant women with cancer: A meta-analysis.

**Host School/ Institute**
Nepean Clinical School

**Address:** Department of Surgery, Nepean Hospital, Clinical Building, Level 3, 62 Derby Street, Penrith

**Personal Supervisor:** Associate Professor Guy Eslick

**Phone:** 02 4734 1373  
**Email:** guy.eslick@sydney.edu.au

**Project Type:** Literature Review, meta-analysis

**Project Category:** Cancer, Paediatrics/Child Health, Epidemiology, Reproduction

**Project Keywords:**
1. Maternal outcomes
2. Fetal outcomes

**Project Description:**

Developing cancer during pregnancy is a rare event. However, there are issues regarding the selection of cancer treatments in order to minimize harm to the foetus and mother. There are many factors at play which include the extent of disease, treatment options required, and the impact on the pregnancy as well as the gestational age of pregnancy.

This study aims to provide pooled evidence regarding the types of cancers, cancer treatments and maternal and foetal outcomes. This will involve a detailed literature review, collection and entry of data and data analysis along with manuscript preparation.
