Jumpstart Your Science Career
Thursday 21 April

5:45pm–8pm, New Law School, Camperdown Campus
Arrival from 5:45pm, sessions commence at 6pm.

Join us for a conference style careers information evening designed for science students from all disciplines and degree stages. Come and meet employers and industry experts from a variety of backgrounds and industries to get the answers to all of your career related questions.

You are also invited to network and mingle with presenters over complimentary drinks and canapés at the conclusion of the sessions.

Registration is essential: sydney.edu.au/science/cstudent/ug/jump

Pathways in Business Strategy & Consultancy
New Law School Annexe 442
Looking for something that’s constantly changing and fast paced, whilst challenging you and offering huge rewards? Come along to this seminar to learn how a degree in Science can lead to working in Business Strategy and Consultancy.

Pathways in Psychology
New Law School Lecture Theatre 101
If you are currently studying Psychology and would like to know your career options, come along to this seminar to hear about opportunities for graduates with a major or honours in Psychology. Dr Celine van Golde from the School of Psychology will provide an overview of the diverse career options in Psychology and the qualifications required to get there.

Special guest presenter Matt Jessimer from the Australian Health Practitioner Regulation Agency will explain the requirements to achieve registration as a Psychologist in Australia.

Careers in Finance & Data Analytics
New Law School Annexe 346
Are you interested in the variety of career opportunities the finance and data analytics industry can offer you? Come along to hear of the diverse and challenging roles you can choose from.

Anthony McInnes will provide insight into how his background in Physics has helped him succeed in his career as an Operational Financial Services Professional at Deutsche Bank.

Dr Virginia Wheway joins us from Houston Kemp, where she is a Senior Analytics Specialist. Virginia has a mathematics and statistics background, and is now an accomplished and influential technical executive with a particular interest in data mining and visual analytics.

Careers in Environmental Sciences
New Law School Annexe 446
Do you have a passion for the environment and an interest in conserving it for future generations? Come along to this seminar to hear about the opportunities available to you from inspiring speakers including:

Chris Watson, from the NSW Office of Environment and Heritage, who works on promoting the importance of native grasslands. Utilising his Environmental Science background, along with further study, Chris’ work has taken him throughout Australia, Canada and the USA, conducting fieldwork in temperatures from -40 °C to +40 °C and meeting amazing plants, animals and people along the way.
