

Workshop on Environmentally Adjusted Productivity and Efficiency

Monday, February 22, 2016

Venue: Abercrombie Business School (ABS) Seminar Room 3310, The University of Sydney

Program	Title of the presentation	Speaker
9:00 AM	Opening	
9:05 AM	Performance measurement and modelling of good and bad outputs with a network application	Shawna Grosskopf Oregon State University
9:50 AM	Environmentally adjusted productivity and efficiency with regional and technological heterogeneity	Tiho Ancev University of Sydney
10:35 AM	Morning tea	
10:50 AM	The user cost of non-renewable resources	Kevin Fox University of New South Wales
11:35 AM	Valuing Environmental Impacts from No Action in Wastewater Management	Francesc Hernandez University of Valencia
12:20 PM	Assessing stream health with respect to ecological connectivity	Knox Lovell University of Queensland
1:05 PM	Lunch	
1:30 PM	Estimating the cost of carbon abatement for China	Atakelty Hailu University of Western Australia
2:15 PM	Accounting for the environment in agricultural productivity: Applying advances in international environmental accounting standards	Carl Obst IDEEA & University of Melbourne
3:00 PM	Climate adjusted productivity on Australian broadacre farms	Neal Hughes Department of Agriculture and Water Resources - ABARES
3:45 PM	Afternoon tea	
4:00PM	Using environmentally adjusted efficiency technique to measure natural capital on agricultural farms	Samad Azad University of Tasmania
4:45 PM	Current progress and new direction of environmentally adjusted productivity and efficiency	Rolf Fare Oregon State University
5:30 PM	Concluding remarks and close
