Overview

Our Master of Professional Engineering (Accelerated) degree is an accredited two-year full-time degree designed to provide you with deep technical skills in your chosen field of engineering combined with professional development in the areas of communication, leadership, and time and resource management.

This accelerated version of our Master of Professional Engineering degree is available to prospective students seeking recognised accreditation who have previously graduated with an undergraduate engineering degree in a related field.

Course structure

This program comprises foundation units, elective units in the area of your specialisation and a 12-week practical industry experience. You can also choose from several professional electives and complete a capstone project in your final year.

Admission requirements

A recognised bachelor’s degree in a related engineering field with at least an honours, honours equivalent or 68.5 percent average.

Specialisations

The following specialisations are available within the program:

- Aerospace Engineering
- Biomedical Engineering
- Chemical and Biomolecular Engineering
- Civil Engineering
- Electrical Engineering
- Fluids Engineering
- Geomechanical Engineering
- Mechanical Engineering
- Power Engineering
- Software Engineering
- Structural Engineering
- Telecommunications Engineering

Professional accreditation

The Master of Professional Engineering (Accelerated) is currently under review for professional accreditation by Engineers Australia, the national accreditation body, and is expected to be approved in 2019.
