THE UNIVERSITY OF
SYDNEY

SCCI2019

This course brings together experts and leading clinicians to discuss state-of-the-art and core topics relevant to the diagnosis and management of severe, life-threatening infections and sepsis. Topics are delivered through lectures, interactive case discussions and constructive debates.

The program would be highly suitable for practising clinicians and trainees in the fields of Infectious Diseases, Intensive Care Medicine, Emergency Medicine, Infection Control, Antimicrobial Stewardship, Pharmacy and Nursing.

Sessions will include topics on:

- Diagnostics
- Immunocompromised host
- Antimicrobial resistance
- Therapeutics
- Interesting bugs and diseases

Program Committee:

**Prof. Jon Iredell, A/Prof. Nai An Lai,
A/Prof. Paul Griffin and
Dr Pierre Janin**
