

Sustainability and Global Development Example Study Plan

Sustainable development – comprising environmental, economic and socio-political sustainability – is a global concern, as evidenced by the widespread endorsement of the UN Millennium Development Goals. Governments, NGOs and other non-profit organisations have an interest in supporting global development and the UN Millennium Development Goals. This study plan adds an understanding of global development to a foundation of knowledge about sustainability.

If you aspire to work in government, policy or aid in sustainability, with an interest in sustainability global development, this study plan is relevant to you.
