WHY CHOOSE SYDNEY?

As Australia's first university, we aim to instil the skills, knowledge and values you need to become a leader in a rapidly changing world. Combining the highest quality teaching with practical, future-focused learning, you can gain the expertise and experience to solve the most complex challenges - now and in the future.

We offer an exceptional range of disciplines – more than 400 areas of study. Enjoy the flexibility of choosing a degree that allows you to combine your strongest interests and gain real-world experience through our internship and project-based learning opportunities.

Outside the classroom, you can make lifelong friends and connections and enjoy unforgettable experiences.

1st in Australia and 4th in the world for graduate employability¹

Top 50 in world university rankings²

Top 50 in the world for many of our disciplines³
≈300 international partners, so you can combine study and travel

200+ clubs and societies to enrich your student experience

400+ areas to choose from, so you can find the right degree to fulfil your goals

320,000+ alumni to connect you with a worldwide network

#1 for student experience in Australia⁴

Our main campus is located in the heart of one of the most popular cities in the world for international university students.

Set around the world’s largest natural harbour, Sydney is home to beautiful golden beaches, world-class museums and art galleries, delicious fresh food, and a calendar of exciting events and festivals.

“Sydney is a beautiful harbour city with a vibrant student life. I’ve had uncountable cultural experiences since being here which have been some of the appealing features to me as an international student.”

Agus Simahendra
Master of Medicine
(Infection and Immunity)
Home country: Indonesia
The University of Sydney has a network of campuses in the heart of the city and beyond.

Our Camperdown/Darlington Campus is close to Sydney’s business district and sandy beaches. The surrounding areas are both cosmopolitan and multicultural, with the lively suburb of Newtown, laid-back Glebe Point Road, and the bustling Central Park precinct a short walk away.

The campus is also easily accessible by Sydney’s public transport network, being located near Central and Redfern train stations, and on several major bus routes.

We also have several faculty-specific campuses and teaching locations, such as Health Sciences in Cumberland, Dentistry in Surry Hills and Westmead, Sydney Conservatorium of Music, Business School and the Sydney Law School in the central business district, Agriculture and Veterinary Science in Camden, and the Sydney College of the Arts in Rozelle. All are easily reached by public transport.

2 Mercer Quality of Living survey 2017; QS Best Student Cities 2017; PwC Cities of Opportunity report
3 The Economist Safe Cities Index, 2017
4 The University intends to move these campuses from their current location to new facilities on the Camperdown/Darlington campus in 2020. For details, visit sydney.edu.au/campuses
We are one of the world’s top research universities and a member of Australia’s prestigious Group of Eight\(^1\) network and the Association of Pacific Rim Universities. As a student, you'll have the opportunity to learn from and work alongside some of the world's brightest and most accomplished academics.

- **RESEARCH EXCELLENCE**

In the top 50 of the world’s best research universities\(^2\)

All our research is ranked at world standard or above\(^3\)

Ranked 1st in Australia for research impact.\(^4\)

---

\(^1\) The Group of Eight (Go8) is a coalition of leading Australian universities, intensive in research and comprehensive in general and professional education

\(^2\) QS World University Rankings 2018

\(^3\) Excellence in Research for Australia report 2015

\(^4\) CWTS Leiden Rankings 2017
Our research is driven by the big picture. We provide a hub for industry, government and community groups to collaborate with us and connect with our researchers and students. The development of major innovations, such as an intelligent robot that automates many farming processes and a squirtable elastic glue that surgeons can use to heal wounds, started here.

We are also home to 90 world-renowned multidisciplinary research and teaching centres that tackle some of the world’s biggest challenges, such as health, climate change and food security. These centres include:

- the Charles Perkins Centre, which is dedicated to easing the global burden of obesity, diabetes, cardiovascular disease and related conditions
- the Brain and Mind Centre, a leader in research, education and treatment of a range of diseases from autism to schizophrenia, depression, dementia and Parkinson’s disease
- the Australian Institute for Nanoscale Science and Technology, which is transforming Sydney into a global hub for discovering and harnessing new science at the nanoscale.

We invest in research that changes the way we think about the world, and collaborate with other universities, including Stanford, UCLA, the University of Edinburgh, Utrecht University, Shanghai Jiao Tong University, and the University of Hong Kong. Find out more about our research:

- sydney.edu.au/research
GLOBAL OPPORTUNITIES

We partner with close to 300 universities in 42 countries to give you access to global opportunities that will broaden your horizons.

Get a global education

Our placement and exchange opportunities will set you up for a global career as you develop the cultural competencies and confidence to work effectively across borders.

Opportunities include:
- 128 partner universities that are ranked in the top 200 worldwide*
- short-term, semester and year-long program options
- overseas field schools such as the Sydney Southeast Asia Centre’s multidisciplinary schools, where you could tackle real-world problems in Cambodia, Indonesia, Laos, Singapore, Timor-Leste and Vietnam
- intensive in-country Open Learning Environment units where you study language and culture at a partner university in Asia, the Pacific, Europe or North Africa
- short-term summer programs at prestigious universities like Harvard, Yale and the London School of Economics
- global professional placements such as the University of Sydney Business School’s Industry Placement Program provide you with the opportunity to work and study in the US, China, France or Chile during semester breaks.

Choose a program

You can use our global mobility database to search by location or institution name and filter your search results by ranking, level of study, duration, language of instruction and subject areas.

Funding

By 2020, we aim for 50 percent of our students to have an international experience as part of their studies, with scholarship funding available for at least half of this group. Scholarships are offered by Sydney Abroad, faculties and external groups such as community organisations, exchange partners and foreign governments.

Global Citizenship Award

The Global Citizenship Award (GCA) is an extra-curricular program providing you with distinctive international and leadership opportunities to prepare you for your future as a global citizen. Through the GCA you’ll receive support to make the most of overseas and local student programs such as international exchange, faculty-led programs, international internships and volunteering.

− sydney.abroad/gca
− sydney.edu.au/scholarships/current/exchange
Non-award programs

If you are not sure about studying a full degree at the University of Sydney, you can study for one or two semesters on a non-award basis. You will have more than 2500 units of study to choose from and will receive an official academic transcript at the end of your study period. You can use that transcript to request credit at your home institution. Depending on your home institution’s relationship with the University of Sydney, you can apply as a study abroad or an exchange student.

Exchange

If you’re enrolled at one of our international partner universities, you may be eligible to apply for exchange. When you join us as an exchange student, your tuition fees are paid to your home university while you study at Sydney. You need to apply to your home university’s international exchange program first.

More information

To check if your home university is one of our exchange partners, visit – sydney-au-sa.terradotta.com

As someone who wants to work in advertising, spending a semester in Toronto was especially cool. There are incredible agencies and startups in Toronto, and I was able to take some advertising and media courses while on exchange. It gave me a fresh new outlook on my career, something I could never have achieved without going on exchange.”

Margot Alais
Bachelor of Arts
Exchange to University of Toronto, Canada
Dual citizen: USA and Australia

Study abroad

If your home university does not have an exchange partnership with us, you can still apply for non-award study as a study abroad student. You can come for one or two semesters and tuition fees will apply. If you are looking for something shorter, we have short-term programs that run from late May to mid-August.

We also offer programs for those just finishing secondary school, interested in a gap year or semester, or in their first year of university study.

Study abroad indicative semester tuition fees for 2018**
A$12,300 flat rate study abroad tuition fee

Short-term indicative tuition fees for 2018**
1 unit of study – A$3075
2 units of study – A$6150

* Times Higher Education World University Rankings 2018
** Tuition fees are quoted in Australian dollars and correct at the time of publication. All tuition fees are subject to an annual review by the University and subject to increase each year, effective at the beginning of each calendar year.
We have a packed calendar of events and celebrations for you to enjoy. With more than 200 clubs and societies, including 26 cultural groups, and 130+ nationalities on campus, there’s something for everyone.

Our clubs and societies provide endless opportunities for networking, fun and leadership. Cultural groups include the Ekansh Indian Cultural Society, Sydney University Sikh Society and the South Asian Business Society (SABS). There is also a huge range of facilities, programs and campus events to keep you healthy and active during your time at university.
### STUDIO SUPPORT SERVICES

* These services may involve fees for services and retail costs for goods.
There are several accommodation options to choose from, including University residences, residential colleges and independently-run student housing.

Our Accommodation Services website is a great place to get started. You’ll find advice on where to live, expected costs, and accommodation options on and off campus. This service also allows you to register for University-owned housing. On-campus accommodation is limited and we advise you to apply well in advance to secure a place.

− sydney.edu.au/accommodation

Temporary arrival accommodation
Before you move to Sydney, we recommend you book a temporary place to stay. Once you get here, you can look for longer-term accommodation.
− sydney.edu.au/accommodation/short_term

On-campus – residential colleges (fully catered)
The University has eight residential colleges on the Camperdown/Darlington Campus, including International House, a residential community of global scholars. Colleges provide comfortable, fully furnished single rooms and daily meals, along with sporting, cultural, leadership and social programs. They also include on-site tutorials and campus-based classes.
− sydney.edu.au/colleges

University residences (self-catered)
The University manages three residences on the Camperdown/Darlington Campus: Queen Mary Building, Abercrombie Student Accommodation and the Regiment. Together, they provide rooms for up to 1600 students.

These residences provide modern single-study rooms with large common living, learning and study spaces, and host student-led arts, cultural, sporting, academic, leadership and social programs.

The University also provides apartments and shared housing around the Camperdown/Darlington, Camden and Cumberland* campuses.

Private providers offer furnished rooms in shared or self-contained apartments in residential buildings, usually within walking distance of the University.

Off-campus living
More than 90 percent of our students live off campus. The University is close to many vibrant and multicultural suburbs such as Annandale, Newtown, Chippendale and Glebe. A great place to start searching for accommodation is our large online database of properties.
− sydney.edu.au/accommodation

For information on approximate living costs in Sydney, including accommodation, transport and other living expenses, please visit:
- sydney.edu.au/study/living-costs

Important fee information
The accommodation fees listed are quoted in Australian dollars. They are intended as a guide for students and are based on 2018 fees for new students. They are correct at the time of printing to the best of the University of Sydney’s knowledge. Students should contact the individual accommodation providers for detailed and up-to-date information, including additional costs and fees. Please note that some colleges charge non-refundable application fees. Students are also advised that some residences have 52-week contracts, while others only provide accommodation during semester.

* The University intends to move the Faculty of Health Sciences from its current location in Cumberland to new facilities on the Camperdown/Darlington Campus in 2020. For more information, visit sydney.edu.au/campuses
“I wanted to come to a place I had not been before and I love the multicultural aspect of Sydney and, of course, the beaches!”

ARCHITECTURE, DESIGN AND PLANNING

Career options
- Architect
- Building designer
- Construction manager
- Data visualisation specialist
- Design manager
- Front-end developer
- Interaction designer
- Lighting designer
- Property and real estate developer
- Project manager
- Service designer
- Sustainability manager
- Urban planner
- User-experience (UX) designer

Why study here?
- We have the only indoor environment quality (IEQ) laboratory in the southern hemisphere, an extensive research lighting laboratory, and outstanding audio and acoustic facilities.
- Our Bachelor of Design Computing combines creativity and code to prepare you for a career in interaction design and creative technologies.
- We have one of the best-equipped design, modelling and fabrication labs in Australia and provide dedicated studio spaces for students.
- Our Master of Architecture, Master of Urban and Regional Planning and Master of Illumination Design degrees are each accredited and recognised by the relevant societies and institutes (subject to practical experience).

Invent with intent. When you study here, you’ll combine creative flair with finely-tuned technical skills to shape the services, experiences and spaces in which we live, work and play.

From designing a single house to master planning entire cities, opportunities for architects and urban planners abound.

As Australia’s top-ranked school in the field of architecture and built environment subjects*, we strive for intellectual excellence, and creative and critical thinking.

Our undergraduate and postgraduate degrees in interaction design provide specialised training for the rapidly emerging fields of user experience (UX) and creative technologies. You’ll join the leading edge of interaction design through websites, mobile applications and services for the internet of things.

why study here?

Our alumni include five prime ministers, one Nobel laureate, one Pulitzer Prize winner, and one astronaut.

We have more than 450 academic staff who are active researchers, educators and practitioners in their fields.

We offer one of Australia’s most comprehensive ranges of arts and social sciences subjects.

We are ranked in the top 30 in the world for anthropology, archaeology, development studies, education, English language and literature, history, modern languages, politics and international studies, social policy and administration, and social sciences and management.*

“*The University of Sydney was my first choice because it’s one of the highest ranking universities in the world, and, as Australia’s first university, it has a rich cultural heritage. It also offered a degree in international relations taught by internationally acclaimed specialists, which is what I was looking for in my postgraduate studies.”

Melvin Bandua
Master of International Relations
Home country: Ghana

* QS World University Rankings by Subject 2018
BUSINESS

At Sydney, you can look forward to a wealth of opportunities across diverse industries. You’ll gain the skills to succeed in business or build your own startup, and you’ll graduate equipped to become a leader and drive change with social, environmental and commercial impact.

Meet the future demands of business with one of our degrees, developed in partnership with industry leaders. You can choose from a large range of business majors including accounting, banking, business law, data analysis and information systems, entrepreneurship, finance, human resources, international business, management and marketing.

Postgraduate students can choose from an MBA, Master of Management, Master of Commerce, Master of Professional Accounting and a full suite of specialised postgraduate degrees and professional development programs.

sydney.edu.au/courses/business

Career options

- Accountant
- Big data specialist

EDUCATION AND SOCIAL WORK

Career options
- Careers adviser
- Community liaison officer
- Corporate trainer
- Counsellor
- Curriculum developer
- Early childhood teacher
- Human rights advocate
- International aid worker
- Primary teacher
- Secondary teacher
- Social policy analyst
- Social worker

Why study here?
- We’ve been delivering education degrees for more than 100 years and social work degrees for nearly 80 years.
- We offer undergraduate and postgraduate teaching and social work degrees that are recognised in Australia.
- Our students learn in real-world settings and spend time in professional practice placements.

Make a world of difference through teaching or social work. At Sydney, you’ll explore ideas and issues in your field to become a highly informed practitioner and lifelong learner.

Engage minds and ignite the creativity of the next generation. Become an accredited teacher in either early childhood, primary or secondary teaching through our Bachelor of Education or Master of Teaching degrees. We offer the opportunity to obtain teaching qualifications in a diverse range of areas including economics, English, health and physical education, languages, mathematics, science, teaching English to speakers of other languages (TESOL) and many more.

We also offer degrees for trained teachers, designed to enhance your practical skills and deepen your understanding of educational theory and research.

Our social work degrees prepare you to change lives for the better. Studying social work will engage you in policy development, frontline social care, counselling, advocacy and community development.

- sydney.edu.au/courses/education-social-work

Develop versatile skills that are widely sought after around the world.

12th in the world for education*

“As a social worker, you can have an impact on every client relationship. In this career path, technology can’t solve issues — it requires professional problem-solving skills. A degree in social work will give me the opportunity to have a life-changing impact on an intimate level and on a larger scale by engaging with the public to promote goals for human rights.”

Kasumi Higewake
Bachelor of Social Work

ENGINEERING AND INFORMATION TECHNOLOGIES

Make a powerful impact to improve the lives of people around the world with a degree in engineering, project management or advanced computing at Sydney.

Our students have the opportunity to forge connections with our network of more than 1200 industry, not-for-profit and government organisations. They’re learning to create smarter ways of running our planet, combining technical expertise with hands-on experience to develop creative and sustainable solutions. They help airlines to fly cleaner and farmers to increase crop yields, explore deep under water or in outer space, and bring solar power to remote communities.

From AI to space travel, engineers, project managers and IT professionals are creating solutions to society’s greatest problems.

− sydney.edu.au/courses/engineering-IT

“The experience of living and studying here has already enhanced my skills and knowledge. My lecturers are renowned researchers and industry practitioners and my classmates come from a range of work and cultural backgrounds. With what I’ve learned, I hope to contribute a great deal to IT in the education sector.”

Maria Clarisse Ligunas
Master of Information Technology
Home country: Philippines

Career options
− Aircraft/aerospace engineer
− Biomedical engineer
− Chemical engineer
− Civil engineer
− Computer programmer
− Computer systems analyst
− Electrical engineer
− Mechanical engineer
− Mechatronics/robotics engineer
− Project/events manager
− Software developer
− Transport engineer
− Web developer, including user interface design

Why study here?
− Largest biomedical engineering program of its kind in the southern hemisphere.
− Our engineering degrees are accredited by Engineers Australia.
− 75 percent of the fastest growing occupations need STEM skills and knowledge.*
− Our information technology degrees are accredited by the Australian Computer Society as professional-level courses.
− Our Master of Project Management is accredited by the Project Management Institute’s Global Accreditation Center.

1st in Australia for mechanical, aeronautical and manufacturing engineering**
21st in the world for civil and structural engineering.**

LAW

Career options

Legal
- Barrister
- Judge
- Magistrate
- Solicitor

Non-legal
- Diplomacy
- Foreign affairs
- Human rights
- International relations
- Investment banking
- Journalism
- Management consultancy
- Project management
- Public policy
- Research and development

Why study here?

- We’re ranked 14th in the world for law.*
- Our alumni include prime ministers, High Court judges and a president of the World Bank.
- Sydney Law School is the only law school in the world to win the prestigious Philip C. Jessup International Law Moot Court Competition five times, including in 2017.
- Our Bachelor of Laws (LLB) is accredited by the Legal Profession Admission Board (LPAB) and meets the academic requirements to practise law in New South Wales.**

Studying law at Sydney will give you the skills in research, analysis and persuasive communication that will qualify you to take on roles in many fields, both within the legal profession and in other contexts.

The University of Sydney Law School has a 160-year tradition of academic strength and strong ties with the legal profession. As one of the world’s leading law schools, we’re ranked 14th in law in the QS World University Rankings by Subject 2018.

With flexible programs covering crime, constitutional law, contracts, banking and finance, media law, social justice and more, you will learn to apply various areas of law to real cases. From geopolitics in international law to global warming in environmental law, medicine in tort law and sociology in family law, you will gain sharp social observation skills and a deep sense of ethics and community service.

- sydney.edu.au/courses/law

With more than 160 years of research-led education, we’re ranked 14th in the world for law.*

Our alumni can be found in legal and non-legal roles around the world.

“I’m very happy I chose to complete my Juris Doctor (JD) at Sydney. It’s arguably one of the most difficult JD programs in the country and getting through it is very rewarding. The best thing about the law school has been the brilliant teachers and academics who are always willing to help their hard-working students.”

Sam Frouhar
Juris Doctor
Home country: Canada

Pursue your future in health and choose from the largest range of health degrees of any Australian university. Our graduates go on to improve lives, for individuals and families as well as local and global communities.

Health is one of the fastest-growing sectors in Australia and around the world – doctors, dentists, nurses, pharmacists and health professionals of all kinds are in constant demand. The study of health offers broad choice and clear career progression, with rewarding pathways, and at Sydney you’ll develop a range of invaluable skills, from patient interaction to teamwork, leadership and research.

Our graduates are globally aware, highly skilled and go on to improve lives for individuals, families and communities across the world.

- sydney.edu.au/courses/medicine-and-health

**Career options**
- Biomedical engineer
- Dentist
- Diagnostic radiographer
- Doctor
- Exercise and sport scientist
- Exercise physiologist
- Health policy
- Health management/educator
- Indigenous health
- International aid and development
- Occupational therapist
- Oral health specialist
- Pharmaceutical representative
- Pharmacist
- Physiotherapist
- Registered nurse
- Rehabilitation counsellor
- Speech pathologist

**Why study here?**
- We’re ranked 1st in the Asia-Pacific and 18th in the world for public health.*
- Ranked 15th in the world for nursing and 18th for pharmacy.**
- We’re investing in a new health precinct, uniting multiple health disciplines and supporting state-of-the-art clinical simulation, a multi-service clinic and team-based research.
- We offer the largest range of health courses of any Australian university.
- Many of our degrees are accredited internationally (visit relevant course pages for details on international accreditation).

“I studied in Canada in a commerce degree initially and decided to change paths. I thought that moving half way around the world would be a pretty cool adventure so I decided to come and study at the University of Sydney.”

**Sean Hassan**
Doctor of Medicine
Home country: Canada

The Sydney Conservatorium of Music has been at the centre of Sydney’s cultural history for more than 100 years. Studying here will define your career and shape you as a person.

As one of the most prestigious music schools in the Asia-Pacific region, music is our life. We will challenge and engage your music world, and give you the opportunity to be mentored by leaders across all areas of music. We also collaborate with many leading international music conservatories and universities, providing you with the opportunity for exchanges, and to engage with and learn from visiting international artists.

Our flexible undergraduate degrees in composition, performance, contemporary music and musicology allow you to combine your music studies with a range of other subjects from across the University. We also welcome postgraduate students in diverse areas of research, particularly ethnomusicology and Indigenous music.

Why study here?

- Demand for musical excellence has never been greater, from the concert hall to the big screen, orchestra pit to the smartphone, or the Xbox to the opera theatre.
- The Conservatorium is located in Sydney’s CBD and Botanic Gardens; just a short stroll to the Sydney Opera House.
- Alumni include internationally renowned musicians Richard Bonynge, Simone Young, Richard Tognetti, James Morrison, and contemporary Australian musicians Paul Mac, Iva Davis, The Presets and DJ Alison Wonderland.

Career options

- Arts administrator
- Audio engineer
- Chamber/orchestral musician
- Concert soloist
- Conductor
- Contemporary or jazz musician
- Digital music composer
- Event producer
- Film score composer
- Interactive music designer
- Music journalist
- Music producer
- Music researcher
- NSW accredited classroom music teacher
- Opera singer

"The Con not only has incredibly qualified pedagogues and performers in all areas of music, but also an amazing and creative environment for musicians of all ages. It provides a range of opportunities, including music industry internships, masterclasses with international soloists, and performing with ensembles."

Sofia Obando  
Bachelor of Music – Bassoon  
Home country: Costa Rica
SCIENCE, AGRICULTURE, ENVIRONMENT AND VETERINARY SCIENCE

Career options
- Agricultural consultant
- Astronomer
- Commodity trader
- Environmental scientist
- Food technologist
- Hydrologist
- Livestock manager
- Mathematician
- Medical scientist
- Nanoscientist
- Nutritionist
- Plant geneticist
- Psychologist
- Veterinarian

At Sydney we’ve united our expertise in areas like psychology, food science and nanoscience, as well as animal and human health, to offer you the broadest possible choice. Alongside biology, chemistry and physics, we have courses in conservation and mathematics.

Science has always been at the centre of humanity’s attempts to understand the world and make it a better place, but never has the rate of advancement been as rapid or as exciting as it is now.

Studying science at Sydney can take you from unravelling the mysteries of the cosmos to creating new materials or feeding the world. You can study in some of the world’s best scientific facilities, including Sydney Nano; Charles Perkins Centre; Westmead medical precinct; Centre for Carbon, Water and Food; Plant Breeding Institute; and our Veterinary Hospital.

Why study here?
- We have new science degrees in mathematics and health.
- We have 25 years of experience delivering specialised programs for talented students, now known as the Dalyell Scholars program, which provides opportunities for advanced coursework, mentoring and working alongside experts.
- Our new undergraduate Applied Medical Science major will have most classes taught at Westmead – a medical precinct that includes a number of hospitals and medical research institutes.
- Our Master of Clinical Psychology, Master of Nutrition and Dietetics and our veterinary degrees are each accredited and recognised by relevant boards.

"The University provides an opportunity to study at one of the best veterinary schools in the world. I’ve had exposure to animals at the University’s teaching farm from year one and been taught by leaders in their fields, helping me to accomplish my goal to become a veterinarian."

Vicki Wong
Bachelor of Veterinary Biology/Doctor of Veterinary Medicine
Home country: Hong Kong

“I have explored units of study across an array of majors and faculties, and am equipped with the latest skills for professional work.”
THE SYDNEY UNDERGRADUATE EXPERIENCE

We’ve reimagined the Sydney Undergraduate Experience – the way we teach and the way you’ll learn – to prepare you for a future full of possibilities.

We recognise that the future of work will be very different, so it’s our ambition that every University of Sydney student will complete their degree with the confidence and ability to think critically, collaborate productively and influence the world.

By studying one of our undergraduate courses you’ll have the opportunity to:

- gain expertise in your primary field of study, learning from leaders in their field
- sharpen your broader skills (eg, communication, digital literacy and inventiveness) and acquire complementary expertise in a second field
- develop the capability to work across cultural boundaries, in Australia and around the world
- deepen your expertise and develop skills in interdisciplinary collaboration through real-world industry, community, entrepreneurship and research projects.

As a graduate you will have the capabilities to tackle whatever challenges and opportunities lie in the future.

sydney.edu.au/ug-experience
Plan your degree

Choose from our range of professional, specialist, liberal studies, and combined and double degrees

Combine your interests from more than 100 study areas in the shared pool of majors and minors

Gain international experience and prepare yourself for a global career

Become a Dalyell Scholar and join the next generation of global leaders

Supercharge your degree with the combined Bachelor of Advanced Studies

Broaden your skillset through short, on-demand modules in the Open Learning Environment

Apply your knowledge to real-world projects and tackle complex global challenges

Options are indicative only and vary between degrees. Refer to sydney.edu.au/ug-experience to find out more.
A DEGREE DESIGNED FOR YOU

Whether you’ve had your career path mapped out since childhood or you believe your dream job doesn’t exist yet, one of our three degree pathways – professional, specialist and liberal studies – will prepare you for the future.

sydney.edu.au/plan-your-degree

Professional degrees
If you’re already sure of the career path you’d like to take, follow a specific study pattern that leads to professional accreditation and registration.

- Gain practical experience during work placements and internships, compulsory in most professional degrees.
- Complement your expertise with interdisciplinary experiences.
- Professional degrees are available in areas including – advanced computing; architecture; dentistry; education and social work; engineering and information technology; health sciences; law; medicine; music (education); nursing; pharmacy; project management; psychology; and veterinary medicine.
Combined and double professional degrees

Combined and double degrees will prepare you for a diverse range of careers by developing professional expertise alongside the skills to adapt and drive change and innovation.

- Cultivate a diverse skillset and breadth of knowledge, alongside expertise in a professionally accredited field, by combining your professional degree with a liberal studies degree.
- Take your professional degree in combination with another professional or specialist degree to develop expert knowledge and effectiveness in a given field or profession.
- Degree examples include combined law degrees, double degree medicine courses and the Bachelor of Design in Architecture (Honours)/Master of Architecture.

See pages 46 to 53 to find a list of professional degrees, including combined and double degrees.

“The Chancellor’s Award has enriched my experience at the University and is an incredible asset.

“During my time studying a Bachelor of Arts/Bachelor of Laws, I’ve had the flexibility to pursue my passions, the means to undertake an overseas study experience in Edinburgh, and, above all, the encouragement to work hard and embrace university life to the best of my ability.”

Caitlin Lee
Study areas: Law; Government and international relations
Home country: Australia

“The chance to study at Sydney was a childhood dream come true. A Bachelor of Engineering (Honours)/Bachelor of Science complemented my desire to develop the problem-solving mindset of an engineer, while pursuing my passion for science and the creativity it offers.

“From competing in [global student competition] iGEM in Boston, to writing my honours thesis with industry support through the Sydney Industry Project Placement Scholarships program, the opportunities available have been plentiful and diverse.”

Claudia Moratti
Study areas: Chemical Engineering; Biochemistry; Pharmacology
Home country: Australia
Specialist degrees

Know where you want to start your career? A specialist degree might be for you.

- Study a defined field with an industry-aligned degree that develops your expertise in a specific area.
- Take electives from other faculties to broaden your learning.
- Specialist degrees are available in areas including design computing; economics; music; visual arts.

Combined specialist degrees

You can supercharge your studies by combining your specialist degree with the Bachelor of Advanced Studies.*

- Deepen your learning and extend your knowledge through advanced coursework and a major project.
- Cultivate expertise in your area of interest alongside critical thinking and problem-solving skills to excel in your future field.
- Degree examples include the Bachelor of Design Computing/Bachelor of Advanced Studies and Bachelor of Economics/Bachelor of Advanced Studies.

See pages 46 to 53 to find a list of specialist and combined degrees.

*I Available with the Bachelor of Design Computing, Bachelor of Economics and Bachelor of Visual Arts only.

“I always wanted to go to art school and Sydney was the right fit for me. As part of my Bachelor of Visual Arts I am taught by experienced, enthusiastic and insightful art professionals, and have access to all the faculties of a large and established university.”

Rosie Thomas
Study area: Photomedia
Home country: Australia
A liberal studies degree is ideal if you want to follow your interests and continue studying what you enjoy most.

- Build your depth of knowledge in one or more areas.
- Design your own degree by combining studies from a broad range of disciplines.
- Liberal studies degrees are available in areas including arts and social sciences; business; science, agriculture, environment and veterinary science.
- Focus on a specific field by applying for a liberal studies stream such as agriculture, animal and veterinary bioscience, food and agribusiness, health, international and global studies, media and communications, medical science, or politics and international relations.

**Combined and double degree liberal studies degrees**

Supercharge your liberal studies degree by combining it with the Bachelor of Advanced Studies or enhance your knowledge by completing a combined or double degree professional course.

- Extend your knowledge and deepen your critical thinking skills through advanced coursework and a major project in the combined Bachelor of Advanced Studies (refer to pages 38 and 39).
- Some liberal studies degrees can be taken with professional degrees, enabling you to develop knowledge across disciplines and expertise in a professionally accredited field.

See pages 46 to 53 to find a list of liberal studies degrees, including combined and double degrees.
The combined Bachelor of Advanced Studies provides you with the flexibility to design your own degree. Challenge yourself through advanced coursework and a major project, and make the most of the study, exchange, internship and student life opportunities available at Sydney.

The combined Bachelor of Advanced Studies can be taken in combination with a three-year liberal studies or specialist bachelor’s degree*, including the Bachelor of Arts, Bachelor of Commerce, Bachelor of Design Computing, Bachelor of Economics, Bachelor of Science and Bachelor of Visual Arts.

Over four years, you will:
- design your own degree by combining majors from a range of disciplines
- complete a second major from either your primary study area or the shared pool of majors and minors
- complete advanced coursework to build on your expertise and leadership skills, or complete an honours project
- work on real-world industry, community and research challenges across disciplines.
Bachelor’s degree | Degree | Combined Bachelor of Advanced Studies
--- | --- | ---

For high-achieving students with an International Baccalaureate (IB) score of 40 (or equivalent of an ATAR of 98+ for other qualifications), Dalyell Scholars have access to a range of enrichment opportunities that will challenge you alongside your most promising and talented peers.

As a Dalyell Scholar you can draw on the rich interdisciplinary depth and breadth on offer at the University, cultivating the leadership and professional expertise to become part of our global network of leaders.

Named after Elsie Jean Dalyell OBE (1881–1948), a distinguished medical graduate of the University, Dalyell Scholars will have the opportunity to collaborate and network with like-minded world influencers.

In addition to completing distinctive Dalyell units of study, you will have access to enrichment opportunities, including:

- accelerated learning options, such as early access to advanced units of study
- access to specialised Language (Arts) and Mathematical Sciences (Science) programs (optional)
- tailored mentoring and professional skills development to enhance your study and career opportunities
- international experiences to develop your global perspective, including a $2000 global mobility scholarship.

sydney.edu.au/dalyell-scholars

Who was Elsie Jean Dalyell?

Elsie Jean Dalyell OBE (1881–1948) was the first full-time female academic in our Faculty of Medicine. She was a pioneer resident medical officer at Royal Prince Alfred Hospital and worked as a senior clinician in a Vienna-based research team studying childhood diseases. Her academic excellence and commitment to creating her own path are hallmarks of our Dalyell Scholars stream.

You will be invited to become a Dalyell Scholar if you apply for, and are made an offer to, one of the degrees listed as ‘by invitation’ and have achieved an IB score of 40 (or equivalent).

**Courses available by invitation**

To study as a Dalyell Scholar in the following courses, you will need to apply online to the University (or for UAC applicants via UAC preferences).

- B Arts/B Advanced Studies (Dalyell Scholars including Languages)*
- B Commerce/B Advanced Studies (Dalyell Scholars)
- B Engineering Honours (Dalyell Scholars)
- B Science/B Advanced Studies (Dalyell Scholars including Mathematical Sciences)*

FOLLOW YOUR INTERESTS.
ALL OF THEM.

Combine your interests from more than 100 study areas through our shared pool of majors and minors.

The shared pool allows you to develop expertise in a second field of study and build cross-disciplinary knowledge from a wide range of study areas outside your primary degree.

For instance, you will be able to enjoy studying science without having to give up your interest in history; or combine your major in marketing with the study of digital cultures.

The shared pool of majors and minors is available in any of the following degrees:

- combined Bachelor of Advanced Studies
- Bachelor of Advanced Computing
- Bachelor of Arts
- Bachelor of Commerce
- Bachelor of Design Computing
- Bachelor of Economics
- Bachelor of Psychology*
- Bachelor of Science
- Bachelor of Visual Arts.

* For the Bachelor of Psychology only, minors are available from the shared pool.
Combine your primary major with a major or minor in one of the areas below

### Architecture, design and planning
- Design

### Arts and social sciences
- Agricultural and resource economics

BROADEN YOUR SKILLS

Build diverse skill combinations and boost your personal and professional development through our Open Learning Environment (OLE).

These short on-demand learning modules and workshops will help broaden your skillset and extend your knowledge by exploring other fields of study such as arts and social sciences, business, engineering and information technologies, medicine and health, music and science, agriculture, environment and veterinary science.

All students have access to zero credit point OLE units and you can take as many of these units as you want. In many degrees, including all liberal studies courses, you will also undertake for-credit OLE units as part of your study.

Examples of OLE units on offer in 2019 include:
- Analysing and plotting data: Python
- Business entrepreneurship: guerrilla tactics
- Digital communication: sound
- Digital influence through social media
- Experience China
- Student leadership: peer mentoring
- The science of health and wellbeing
- Understanding web skeletons and skins.

sydney.edu.au/plan-your-degree
Tackle today’s issues

Collaborate with businesses, community organisations and government bodies – both in Australia and around the world – to work on entrepreneurial, industry and community projects that address real-world problems and issues.

Working with students from across the University, you will develop your networks and deepen your critical thinking, problem-solving and communication skills as you tackle some of the most complex challenges of our time. The projects are open to third-year and fourth-year students who meet the eligibility requirements, and are taken as elective units.

A snapshot of our previous projects

**Woolworths digital innovation project**
Students developed a vision for future shopping environments, both physical and digital, to improve the experiences of customers and staff.

**NSW Department of Parliamentary Services**
Students provided parliamentary research briefs on the use of drones and on social media and the law.

**Sydney Exoneration Project**
Psychological research into memory and testimony is applied to real-life claims of wrongful convictions.

You can identify courses by the degree pathway:
- Professional degree
- Specialist degree
- Liberal studies degree
- Combined or double degree

‡ are courses available for Dalyell Scholars by application. For a list of Dalyell Scholars courses, see page 41.
Below are the Australian Tertiary Admission Rank (ATAR) and equivalent entry scores for 2019 for some common international qualifications. For a full list of qualifications and entry scores, visit

- sydney.edu.au/ug-entry

All published scores below are fixed for 2019 to guarantee entry, except for courses with an asterisk (*) in the ‘indicative score’ column, these scores are an indication of what you will need to gain entry in 2019.

Find out more about fixed ATARs at

- sydney.edu.au/sydney-atar

** Fixed and indicative scores, A+C, na, ^, †, *, **, ◊, ф: See ‘Table notes’ on pages 56-59

---

"Tuition fees are subject to annual increases. For further information, see pages 54-55"
The information published in these tables is correct at the time of publication for entry in 2019 and may be subject to change. For the latest course information, including admission requirements, course structure and availability, visit:

- sydney.edu.au/courses

Courses listed in the 2019 guide to entry requirements for international students (on pages 46 to 53) are CRICOS registered and available to student visa holders, unless otherwise indicated with a ◊. For more information on CRICOS-registered courses, visit:

- cricos.education.gov.au

Double degree progression requirements

Double degrees and the Doctor of Veterinary Medicine combined degree listed in this guide have separate progression requirements that need to be satisfied before students can be admitted to the second degree. For progression rules, visit the faculty handbooks at:

- sydney.edu.au/handbooks

---

Important tuition fee information

Tuition fees listed in this course table are:

- quoted in Australian dollars and correct at the time of publication
- indicative tuition fees for study in Year 1, in the 2019 calendar year only
- set for each course based on a full-time student enrolment load of 48 credit points per year, or 1.0 Equivalent Full-Time Student Load (1.0 EFTSL). If your study load for the year is more or less than 1.0 EFTSL, your tuition fee will differ.

Annual review

Importantly, tuition fees are subject to annual review by the University and will increase each year, effective at the start of each calendar year.

Other costs

There are other costs in addition to tuition fees. For important fee-related information, refer to the fees and costs information on page 128.
B Veterinary Biology/D Veterinary Medicine (combined degree) tuition fees
This combined degree has a combination of undergraduate components (Bachelor of Veterinary Biology) in years 1 and 2, and postgraduate components (Doctor of Veterinary Medicine, DVM), in years 3 to 6.

The course table on page 52 lists two separate tuition fee rates for the combined degree. You will be paying higher tuition fees in Years 3 to 6 than in Years 1 and 2 of the combined degree.

The first tuition fee in the course table is for students commencing the combined degree in 2019 for Year 1. This fee is indicative and subject to annual increases for each year of your study.

The second tuition fee is for students commencing the DVM in 2019 for Year 1. Your Year 3 commencing tuition fee for the DVM component, and the tuition fees each year thereafter, will be subject to a number of reviews and indexation before you may be eligible to commence.

At the time of publication, the University is unable to provide you with a precise indication of your Year 3 commencing tuition fees for the DVM component of the combined degree (Years 3 to 6).

Combined degree tuition fees
For combined degrees (refer to the glossary on page 133 for a definition), where there is one indicative tuition fee (Year 1, 2019 only), listed in the course table on pages 46 to 53, a single course tuition fee rate applies for the duration of your study in the combined degree, regardless of the units of study that are selected in each of the two qualifications (eg, B Arts and B Laws).

The tuition fee listed for Year 1, 2019 is subject to annual review and will increase each year of your study in the combined degree. The tuition fee structure for the B Veterinary Biology/D Veterinary Medicine combined degree is different – please see the tuition fees information above.

Double degree tuition fees (undergraduate to postgraduate) – price differentiation
In a double degree students complete two qualifications under one set of course resolutions with no cross-crediting of units of study between the qualifications (see the glossary on page 133 for a definition). The course table on pages 46 and 53 lists two separate tuition fee rates for double degrees that comprise an undergraduate degree and a postgraduate degree, with a higher tuition fee rate applying to the postgraduate degree.

The first tuition fee is for students commencing the undergraduate degree in 2019, as part of the double degree, for Year 1. The fee is indicative and subject to annual increases for each year of your study.

The second tuition fee is for students commencing the postgraduate degree in 2019 for Year 1. This fee will also be subject to a number of annual reviews and indexation before you may be eligible to commence your study in the postgraduate degree.

At the time of publication, the University is unable to provide you with a precise indication of your commencing Year 1 tuition fees for the postgraduate degree.
Programs, majors and minors
The programs, majors and minors listed are indicative and are subject to change. Unless specified as a major or a minor only, majors are also available as minors. For the latest list of options, visit

- sydney.edu.au/handbooks

Assumed knowledge and prerequisites
Subjects listed for assumed knowledge, prerequisites or recommended studies, refer to the NSW Higher School Certificate (HSC) curriculum. For example, ‘Mathematics’ refers to the two-unit HSC subject by that name, not the HSC subject ‘Mathematics General’. Learn more about the HSC syllabus to understand the required standard for equivalent qualifications and/or subjects.

- www.boardofstudies.nsw.edu.au/syllabus_hsc

∆ Mathematics prerequisite
For courses marked with a Δ on the Assumed knowledge and prerequisites column, the Mathematics prerequisite will apply to students undertaking a senior secondary qualification in Australia. Find out about the maths prerequisite, including equivalent requirements for other qualifications.

- sydney.edu.au/study/maths

^ Teaching degrees: Bachelor of Education (Primary), Bachelor of Education (Health and Physical Education), and Bachelor of Music (Music Education)

The New South Wales Education Standards Authority (NESA) requires students entering these teaching degrees to achieve a minimum of three Band 5s in their NSW HSC, one of which must be English (English Standard or English Advanced). Similar requirements will be applied to the IB and other Australian Year 12 qualifications.

For other secondary qualifications, you need to achieve the minimum scores provided as a guide and get good results in English (the equivalent of English Standard or English Advanced). If you also need to meet English proficiency requirements through a test such as IELTS, you need to complete those requirements separately.

† Dalyell Scholars courses (by application)
To study as a Dalyell Scholar in these courses you need to apply directly to the University or, if you are a UAC applicant, via UAC preference.

To study as a Dalyell Scholar in other Dalyell-eligible courses, entry is by invitation. You will be invited to become a Dalyell Scholar if you apply for, and are made an offer to, a ‘by invitation’ Dalyell eligible degree and have achieved a 98+ ATAR (or equivalent). For a full list of courses available to study as a Dalyell Scholar, see page 41.

† Double degree Medicine and Dentistry
Double degree Medicine applicants are expected to have an ATAR of 99.95 (or equivalent scores for other accepted secondary school qualifications) to be eligible for consideration for the double degree assessment. Check the Sydney Medical School website for more information.

- sydney.edu.au/medicine

Double degree Dentistry applicants are expected to have an ATAR of 99.5 or higher (or equivalent scores for other accepted secondary school qualifications) to be eligible for consideration for the double degree assessment.

All Dentistry and Medicine double degree applicants are required to undertake a double degree Medicine/Dentistry assessment that includes a written assessment and a panel discussion. The University will contact eligible applicants for the assessment. Separate requirements apply to Aboriginal and Torres Strait Islander applicants.

Admission criteria and application processes for these courses are subject to change without notice. Check the specific course on our website for more information.

- sydney.edu.au/courses

** Sciences Po and University of Sydney dual degrees
Admission to the Sciences Po Dual Degree is highly competitive. Acceptance will be determined by a Sciences Po and University of Sydney Dual Degree Admissions Committee based on evidence of academic achievement and intellectual readiness, and
on applicants’ own representation of their experience, ideas and aspirations. Applicants also need to meet the minimum admission requirements for their degree of choice at the University of Sydney, including English language requirements. The higher of the English language requirements of the two partner institutions will apply.

The Sciences Po degree requires a total of four years of full-time study to be eligible for two separate awards from Sciences Po and the University of Sydney.

During years 1-2, students will enrol at Sciences Po, France, and pay the applicable fee direct to Sciences Po.

During years 3-4, students enrol in the applicable Sydney degree (international students enrol in the applicable CRICOS-registered Sydney degree), with eligible transfer credits for studies undertaken at Sciences Po. Students will pay the applicable Sydney fee in years 3-4 to the University of Sydney.

Student visa holders who commence this course may face additional costs associated with their student visa. For visa information visit
- www.homeaffairs.gov.au

USFP applicants should also refer to the USFP notes.

For more information on entry requirements, tuition fees and application processes, visit the relevant course page.

Course structure subject to change
The structure of this course may be affected by changes to government policy. For the latest information, please visit
- sydney.edu.au/student-fees

* Bachelor of Nursing Post Registration (Singapore)
This course is delivered in Singapore by a third-party provider and is not available for full-time study in Australia on a student visa. For more information, including tuition fees refer to the Singapore Institute of Management website.
- www.simge.edu.sg

Key to the table

Fixed scores: Scores for courses listed without an asterisk are fixed for 2019 – this means that the scores will not change throughout the 2019 admission period and represent the minimum score you need to guarantee entry into your chosen course, provided other requirements are also met.
- sydney.edu.au/sydney-ATAR

* Indicative scores
The scores listed with an asterisk (*) (for international students on pages 46 to 53 and for domestic students on pages 86 to 87) are indicative for 2019. These scores are a guide only and a higher score may be needed to gain entry into these courses.

Additionally, some courses may have a limited number of places. Additional requirements can also apply for courses listed as ‘A+C’. For more information, see below and visit
- sydney.edu.au/courses

A+C
Combination of ATAR (or equivalent score) plus additional selection criteria (eg, portfolio, audition, interview). Check the details for your specific degree
- sydney.edu.au/courses

na
Not applicable as an entry score cannot be applied.

*** The Psychological Science major was previously offered as the Behavioural Sciences major. Title change subject to Academic Board approval. For the latest information, please visit
- sydney.edu.au/handbooks
English test scores
All English test scores have a two year validity. For a full list of English language tests accepted by the University visit
− sydney.edu.au/study/english-reqs

IELTS Academic – The first score is the overall score; the score listed within brackets is the minimum score required in each section (L for Listening, R for Reading, S for Speaking, W for Writing)

TOEFL iBT (internet-based TOEFL) – the first score is the total score required; the first score within brackets is the minimum score for each section – Listening, Reading and Speaking, the second score is the minimum score for Writing. Where specific section scores are required, L is for Listening, R for Reading, S for Speaking, and W for Writing.

IB Diploma
Entry is based on the total score for the completed International Baccalaureate (IB) Diploma.

GCE A Levels
(Appplies to UK GCE A levels and select comparable qualifications) The first score listed is the requirement for 3 subjects, the second score is for 4 subjects. Students must present a minimum of three Advanced level (A2) subjects and a maximum of four A2 subjects. The aggregate is calculated from the A2 subjects taken in the same academic year based on A*=6, A=5, B=4, C=3, D=2, E=1. Advanced Subsidiary (AS) subjects are not used in calculating the aggregate. At most, one A2 subject may have been undertaken in the academic year preceding or following the final year in which the bulk of the A2 subjects were examined. At most one Applied A level subject may be included in the aggregate.

Australia
Australian Year 12 qualifications – ATAR: Australian Tertiary Admissions Rank (ATAR) is a measure of a student’s overall academic achievement relative to other students undertaking an Australian year 12 qualification. The ATAR for each course can change from year to year.

Canada
Ontario OSSD: Ontario Secondary School Diploma (OSSD) average of 6 University/College preparation courses, including English.

British Columbia: Certificate of Graduation (2004 graduation program) Grade average from all grade 12 subjects except Graduation Transition based on A=4, B=3, C+=2.5, C=2, C-=1, F=0. Also applies to Adult Secondary School graduation diplomas, comparable qualifications in the Yukon territory and the Diplome de fin d’études

Germany
Abitur: Average grade or ‘Durchschnittsnote’ required for the following qualifications:
− Zeugnis der Allgemeinen Hochschulreife
− Abiturientenzeugnis
− Zeugnis der Reife
− Reifezeugnis

Hong Kong
HKDSE: Hong Kong Diploma of Secondary Education (HKDSE) aggregate based on the best five subjects, including any combination of compulsory and Category A and C electives, but excluding Category B (Applied Learning) subjects. The aggregate score is worked out based on 5**, 5*=6, 5=5, 4=4, 3=3, 2=2 and 1=1.

India
CBSE: All India Senior School Certificate awarded by the Central Board of Secondary Education (CBSE). Total of the best four externally examined subjects (where A1=5, A2=4.5, B1=3.5, B2=3, C1=2, C2=1.5, D1=1, D2=0.5)

Indian School Certificate: Indian School Certificate awarded by the Council for Indian School Certificate Examinations (CISCE). The required score is the average of the best four externally examined subjects, including English.

Indian HSSC: Average of the best 5 academic subjects in the Higher Secondary School Certificate (HSSC) in the states of Andhra Pradesh, Gujarat, Karnataka, Maharashtra, Tamil Nadu and West Bengal. The requirement is higher for other states.
Malaysia

STPM: Sijil Tinggi Pelajaran Malaysia (STPM) aggregate for a minimum 3 (first score listed) or 4 Advanced Level subjects (second score listed) based on A=7, A-=6, B+=5, B=4, B-=3, C+=2, C=1. Partial passes and fails are not included. Subjects must be taken in the same academic year.

Norway

Singapore

Singapore A Levels: GCE Advanced Level examinations conducted in Singapore

- Applicants must present at least three H2 subjects and the aggregate can be raised to a maximum of 4 H2 subjects or the equivalent by:
  1. one content-based subject (at H1, H2 or H3 level) and General Paper (GP) at H1 or
  2. Knowledge and Inquiry (KI) at H2 level.
- H3 subjects are ranked the same as H2 subjects.
- Project Work and Mother Tongue are not included.
- The aggregate is the sum of all H2 subjects taken in the same academic year, with at most, one subject from the preceding or following academic year.
- If more than three H2 subjects are taken, the best combination will be used.

The aggregate is calculated for H2 subjects based on A=120, B=100, C=80, D=60, E=40, with half the value for H1 subjects (e.g. A=60, B=50 and so on).

South Korea (Republic of Korea)

South Korea CSAT: Korea Republic College Scholastic Ability Test (CSAT from 2005 onwards) overall standard score calculated from results in ‘Korean Language’, ‘Mathematics’ and ‘Foreign Language (English)’ only.

Sri Lanka

Sri Lanka A Levels: GCE Advanced Level examination aggregate of the best 3 Advanced Level subjects based on A=5, B=4, C=3, S=1. A fourth subject grade may be added if three A grades are achieved.

Sweden

Slutbetyg: Swedish Secondary School Leaving Certificate (from a Gymnasieskolan) – From 2014, the entry requirement is the average of grades based on A=20, B=17.5, C=15, D=12.5, E=10, F=0. Different requirements apply prior to 2014.

USA (in or outside the US)

ACT: American College Test (ACT) composite score. Applicants must also present the optional essay component of the ACT with a 50 percent pass mark. Evidence of graduation from a senior secondary qualification is also required. ACT scores required can be lower for applicants presenting Advanced Placement tests (APs) with a score of 4 or better.

SAT: Scholastic Aptitude Test (SAT 1) composite score out of 1600 for tests taken from 2016. Applicants must also present the optional essay with a score of 4 or better for each component. Evidence of graduation from a senior secondary qualification is also required. SAT scores required can be lower for applicants presenting Advanced Placement tests (APs) with a score of 4 or better.

USFP GPA/USFP English

University of Sydney Foundation program (USFP) score or GPA and English grade required. This score can serve as a guide to entry for other Australian University foundation programs. However, students should note that, depending on the foundation program, the requirements may vary from course to course. Some foundation programs are expressed as a percentage. In this table an 8 is equal to 80 percent, 9.5 is 95 percent and so on. Separate English requirements will apply for other foundation programs.

USFP package offers are not available with Sciences Po Dual Degrees due to the structure of these degrees, which require the first two years to be undertaken in France, and the resulting implications on a student visa.

<tr>
<td><strong>B Advanced Computing</strong>&lt;br&gt;4 years full time&lt;br&gt;Dalyell by invitation</td>
<td>Designed with leaders in the IT field, this degree will help prepare you for an exciting career in information technology. Incorporating real-world projects, it develops both practical and theoretical skills across the computing, information technology and business transformation industries. With one of Australia's most innovative IT courses, you can combine your passion for computing with one of more than 100 cross-disciplinary majors, as you cultivate specialist industry knowledge and computing expertise.</td>
<td>Choose one IT major from the options below and a second major or a minor from either these options or the shared pool: computer science, computational data science, information systems, software development.</td>
<td>Computer programmer, computer system administrator, consultancy, entrepreneurship, information services management, systems analyst, software engineer, user experience, web development and management</td>
</tr>
<tr>
<td><strong>B Advanced Computing/B Commerce</strong>&lt;br&gt;5 years full time&lt;br&gt;Dalyell by invitation</td>
<td>Designing the digital world is big business. This combined degree will develop your knowledge and skills in computing and IT while cultivating business expertise. It combines practical learning with industry opportunities to launch your career as a leader of innovation and business transformation. You will also have access to the Open Learning Environment to broaden your skills and explore other areas of study.</td>
<td>Refer to B Advanced Computing and B Commerce. You will choose one major from each degree.</td>
<td>Accountant, business systems analyst, computer programmer, computer system administrator, economist, financial specialist, information services management, management consultant, project manager, software engineer, web development and management</td>
</tr>
<tr>
<td><strong>B Advanced Computing/B Science</strong>&lt;br&gt;5 years full time&lt;br&gt;Dalyell by invitation</td>
<td>Redefine the digital and physical landscape. This combined degree will develop your technical skills in computing and IT while cultivating your knowledge of scientific enquiry. Underpinned by critical analytical and leadership skills, you will be positioned to transform our world for the better. You will also have access to the Open Learning Environment to broaden your skills and explore other areas of study.</td>
<td>Refer to B Advanced Computing and B Science. You will choose one major from each degree.</td>
<td>Computer programmer, geophysicist, information services management, mathematician, microbiologist, psychologist, science historian, software engineer, systems analyst, web development and management</td>
</tr>
<tr>
<td><strong>B Advanced Computing/B Science (Health)</strong>&lt;br&gt;5 years full time&lt;br&gt;Dalyell by invitation</td>
<td>Transform the health industry and beyond. This combined degree will develop your technical skills in computing and IT while you also explore the latest developments in health and healthcare systems. Combine research and interdisciplinary study to lead the next wave of healthcare innovation. You will also have access to the Open Learning Environment to broaden your skills and explore other areas of study.</td>
<td>Refer to B Advanced Computing and B Science (Health). You will complete a major from the options available in the B Advanced Computing and the health major.</td>
<td>Computer programmer, consultancy, corporate health, disability and ageing management and research, global health research and policy analyst, hospital management, information services management, mental health and safety, software engineer, web development and management</td>

| **B Advanced Computing/B Science (Medical Science)** | Revolutionise the medical world. This combined degree will develop your knowledge and skills in computing and IT. You will also gain foundational knowledge and research skills in medical science, biomedicine and bioinformatics and have access to the Open Learning Environment. | Refer to B Advanced Computing and B Science (Medical Science). You will choose one major from the options available in the B Advanced Computing and complete a program of study in medical science, including a medical science major. | Assumed knowledge
Mathematics or
Mathematics Extension 1; Chemistry and either Physics or Biology or equivalent. | Computer programmer, consultancy, doctor (after further study in medicine), geneticist, infectious diseases researcher, information services management, microbiologist, pathologist, software engineer, systems analyst, web development and management |
| **B Applied Science (Diagnostic Radiography)** | Learn the skills you need to produce world-class medical imaging and provide excellent patient care. In the Diagnostic Radiography degree, you will learn to use equipment ranging from small mobile X-ray machines to larger units, from MRI and CT scanners to sophisticated cardiac units, enabling timely and accurate patient diagnoses. This degree is accredited by the Medical Radiation Practice Board of Australia (MRPBA) and is an approved program of study for general registration as a diagnostic radiographer. | This degree covers studies in anatomy, biological sciences, equipment and imaging techniques, image processing, pathology, physics, psychology and radiation biology. | Recommended studies
Mathematics plus one of Biology, Chemistry or Physics or equivalent. | Diagnostic radiographer
Graduates have the opportunity to work in a range of settings, such as small regional clinics, large metropolitan imaging departments, and hospital emergency departments. |
| **B Applied Science (Exercise and Sport Science)** | This degree develops your skills to integrate exercise and physical activity with disease prevention and the promotion of good health, rehabilitation, nutrition and sports performance. Graduates are eligible to apply for membership with Exercise and Sport Science Australia and professional registration as an exercise scientist. | This degree covers studies in anatomy, biochemistry, biomechanics, learning and control of human movement, nutrition, physiology/exercise physiology, and the application of these fundamental sciences to sport, exercise, ageing, public health, rehabilitation and research. | Assumed knowledge
Chemistry and
Mathematics or equivalent. | Exercise scientist,
coach, personal trainer,
strength and conditioning specialist. Our graduates find careers in the sport, fitness and health industries; work health and safety; injury prevention; public health; exercise rehabilitation; research and technology; education and health; and medical insurance. |
| **B Applied Science (Exercise Physiology)** | This degree provides you with the knowledge, competencies and clinical experience required to deliver exercise and behaviour change strategies for the prevention and management of chronic disease. Graduates are eligible for both exercise science and exercise physiology accreditation through Exercise and Sports Science Australia. | This degree covers studies in biomechanics, clinical exercise practice, ergonomics, exercise physiology, functional anatomy, motor control and behaviour. | Assumed knowledge
Chemistry and
Mathematics or equivalent. | As an accredited exercise physiologist you will have the opportunity to work across all sectors of healthcare, including cardiac rehabilitation, musculoskeletal rehabilitation, mental health, long-term rehabilitation following spinal cord injury, ageing, occupational rehabilitation and programs for people with an intellectual disability. |

△ For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course. See the Table notes on page 56.

<tr>
<td><strong>B Applied Science (Occupational Therapy)</strong> 4 years full time</td>
<td>This degree will enable you to help people with disabilities, and those recovering from injury or with ongoing conditions, to overcome barriers that may be preventing them from participating more fully in life. Graduates are eligible for membership of Occupational Therapy Australia and the World Federation of Occupational Therapists, and registration with the Occupational Therapy Board of Australia.</td>
<td>This degree covers studies in human anatomy, neuroscience, occupational therapy theory and practice, psychology and social sciences.</td>
<td>Occupational therapist  The breadth of occupational therapy means you can diversify your career while staying within the same profession. For example, you could work one on one in rehabilitation with stroke or cancer survivors, then work with babies in a neonatal intensive care unit or young adults in a community mental health program.</td>
</tr>
<tr>
<td><strong>B Applied Science (Physiotherapy)</strong> 4 years full time</td>
<td>This degree will teach you how to assess, diagnose and treat people with movement problems caused by a wide variety of health conditions. You will also learn how to help people avoid injuries and maintain a fit and healthy body. Upon graduation, you are eligible to apply for registration as a physiotherapist with the Physiotherapy Board of Australia.</td>
<td>This degree covers studies in biomedical sciences, behavioural and social sciences, exercise science, human anatomy, human movement, neuroscience, theory and practice of musculoskeletal, neurological and cardiopulmonary physiotherapy across the lifespan.</td>
<td>Physiotherapist  You can choose from a diverse range of physiotherapy and health promotion career options in both the public and private sectors, in settings such as healthcare organisations, sports, schools and community, and private practice.</td>
</tr>
<tr>
<td><strong>B Applied Science (Speech Pathology)</strong> 4 years full time</td>
<td>Accredited by Speech Pathology Australia, this degree prepares you for professional practice as a speech pathologist. You will be involved in the assessment and treatment of communication and swallowing disorders in children and adults, including problems with speaking, listening comprehension, reading and writing.</td>
<td>This degree covers studies in anatomy, audiology, linguistics and language development, neurobiology, phonetics, psychology, research methods and speech pathology specialist areas (eg, aphasia, cleft palate, dysarthria, dysphagia, stuttering).</td>
<td>Speech pathologist  Speech pathologists work in diverse settings, including public and private hospitals, community health, mental health services, aged-care facilities, schools and disability services. As a speech pathology graduate, you may also work in private practice, with the potential to operate your own business as a private practitioner.</td>
</tr>
<tr>
<td><strong>B Architecture and Environments</strong> 3 years full time</td>
<td>The Bachelor of Architecture and Environments provides a broad overview of the built environment through studies in design and architecture, urban planning, sustainability, heritage, building systems and construction and facilities management.</td>
<td>Core areas of study in architectural and environmental design, architectural history and theory, architectural sciences and technologies, property and sustainability, urban design and planning. University of Sydney School of Architecture, Design and Planning electives may include acoustics, lighting, structures and design computing. Electives may also be taken in other faculties.</td>
<td>Architect, property and real estate, construction, project manager, urban designer, urban planner</td>

| **B Arts**  
3 years full time  
Dalyell by invitation | Choose one major from the options below and a second major or a minor either from these options or from the shared pool: agricultural and resource economics; American studies; ancient Greek; ancient history; anthropology; Arabic language and cultures; archaeology; art history; Asian studies; Australian literature (minor only); biblical studies and classical Hebrew; Celtic studies (minor only); Chinese studies; criminology (minor only); cultural studies; digital cultures; diversity studies (minor only); econometrics; economics; economic policy; English; European studies; film studies; French and Francophone studies; gender studies; Germanic studies; Hebrew (modern); history; Indigenous studies; Indonesian studies; international comparative literary studies; international relations; Italian studies; Japanese studies; Jewish civilisation, thought and culture; Korean studies; Latin; linguistics; modern Greek studies; music; philosophy; political economy; politics; psychology (program); Sanskrit (minor only); social policy (minor only); socio-legal studies; sociology; Spanish and Latin American studies; studies in religion; theatre and performance studies; writing studies (minor only). | Depends on the major undertaken or units of study  
For language studies: pathways are available for applicants with no prior language experience, as well as for those with prior experience in the respective language of study | Anthropologist, archaeologist, archivist, art historian, business administrator or manager, editor or publisher, foreign affairs and trade officer, government policy officer, historian, heritage specialist, information specialist, journalist, language specialist, media and communications officer, museum or gallery curator, researcher, sociologist |

**B Arts (Dual Degree, Sciences Po, France)**  
2+2 years full time  
Are you ready for the opportunity of a lifetime? Travel abroad, immerse yourself in the French culture, learn a new language and complete a dual degree with a social science focus, all at the same time.  
This four-year dual degree enables you to work towards both a B Arts degree at Sciences Po in France for the first two years, and a B Arts degree at the University of Sydney for the remaining two years. As part of your B Arts at the University of Sydney, you’ll have access to the shared pool and the Open Learning Environment. | Refer to B Arts for University of Sydney-based majors. For information on studies in France, including units of study, refer to sydney.edu.au/arts/international/years_1_2.shtml | Refer to B Arts  
Assumed knowledge  
Anthropologist, archaeologist, business administrator or manager, economist, editor or publisher, foreign affairs and trade officer, government policy officer, historian, language specialist, journalist, museum or gallery curator, public relations manager, researcher, sociologist, teacher | Anthropologist, archaeologist, archivist, art historian, business administrator or manager, editor or publisher, foreign affairs and trade officer, government policy officer, historian, heritage specialist, information specialist, journalist, language specialist, media and communications officer, museum or gallery curator, researcher, sociologist |

Δ. For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course. See the Table notes on page 56.
Course description

The Bachelor of Arts provides an outstanding liberal arts education. It prepares you to meet the challenges of the modern workforce, where expertise, inventiveness, logic and critical thinking come to the fore.

Combining a Bachelor of Arts with the Bachelor of Advanced Studies in a four-year degree gives you the opportunity to deepen your knowledge and skills, add further breadth to your University qualification by studying subjects from a range of disciplines (including more than 45 subject areas in the humanities and social sciences and more than 100 majors and minors in the shared pool), and apply your skills and disciplinary knowledge to real-world problems. You’ll have access to the Open Learning Environment to broaden your skills and explore other areas of interest.

In the fourth year you will undertake advanced coursework and either a substantial real-world industry, community, entrepreneurship or research project, or an honours project. As you develop a personal portfolio of expertise and high-level skills you broaden your opportunities and prepare yourself for future success.

Programs, majors and minors

Choose one major from the listing below and a second major either from these options or from the shared pool. Agriculture and resource economics; American studies; ancient Greek; ancient history; anthropology; Arabic language and cultures; archaeology; art history; Asian studies; Australian literature (minor only); biblical studies and classical Hebrew; Celtic studies (minor only); Chinese studies; criminology (minor only); cultural studies; digital cultures; diversity studies (minor only); econometrics; economics; economic policy; English; European studies; film studies; French and francophone studies; gender studies; Germanic studies; Hebrew (modern); history; Indigenous studies; Indonesian studies; international comparative literary studies; international relations; Italian studies; Japanese studies; Jewish civilisation, thought and culture; Korean studies; Latin; linguistics; modern Greek studies; music; philosophy; political economy; politics; psychology (program); Sanskrit (minor only); social policy (minor only); socio-legal studies; sociology; Spanish and Latin American studies; studies in religion; theatre and performance studies; writing studies (minor only).

Assumed knowledge/Prerequisite

Assumed knowledge depends on the major selected or units of study. For language studies: pathways are available for applicants with no prior language experience, as well as for those with prior experience in the respective language of study.

Career possibilities

Anthropologist, archaeologist, archivist, art historian, business administrator or manager, historian, heritage specialist, foreign affairs and trade officer, government policy officer, information specialist, journalist, museum or gallery curator, language specialist, media and communications officer, editor or publisher, researcher, sociologist

This degree equips you with the breadth and depth of knowledge and the critical and analytical skills required to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

B Arts/Advanced Studies

4 years full time

Dalyell application

As a Dalyell Scholar in the B Arts/B Advanced Studies, you will gain an outstanding liberal arts education that prepares you to meet the challenges of the modern workforce, where expertise, inventiveness, logic and critical thinking come to the fore.

Your studies will be complemented by distinctive Dalyell units and a suite of enrichment opportunities, including a global mobility experience. You’ll also have access to the Open Learning Environment and the shared pool of more than 100 majors and minors. In the final year, you will undertake advanced coursework and either a substantial real-world industry, community, entrepreneurship or research project, or an honours project.

Refer to B Arts/B Advanced Studies. As a Dalyell Scholar you will undertake 12 credit points of distinctive Dalyell units complemented by additional enrichment opportunities, including mentoring, professional skill development and a global mobility experience.

Dalyell Scholars will have the option of completing a languages program that will broaden your understanding of languages and culture, and open up a diverse range of global career opportunities.

Assumed knowledge

Depends on the major selected or units of study. For language studies: pathways are available for applicants with no prior language experience, as well as for those with prior experience in the respective language of study.

Community development program manager, diplomat, foreign aid worker, foreign correspondent, human rights advocate, international business consultant, policy adviser, trade negotiator

This degree requires completion of a program in international and global studies (including a major in global studies), a minor in a language from the School of Languages and Cultures, and a minimum of 12 credit points of study abroad/exchange. A second major, which may be an extension of the language minor, must be taken from those available in the B Arts or from the shared pool. You’ll also have access to the Open Learning Environment.

In the fourth year of the degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project.

Assumed knowledge

Refer to B Arts/B Advanced Studies

Depends on the major selected or units of study. For language studies: pathways are available for applicants with no prior language experience, as well as for those with prior experience in the respective language of study.

B Arts/Advanced Studies

International and Global Studies

4 years full time

Dalyell by invitation

This degree will give you a rigorous understanding of the paradoxes and complex interconnections of globalisation, equipping you with the ability to work in a global society.

The core major enables you to relate localities to global trends, while your second major and language training provide the regional and linguistic expertise necessary to effectively communicate across cultural boundaries and to work in a range of organisations with an international scope.

A semester abroad at one of our leading partner universities deepens your knowledge and provides first-hand international experience.

This stream requires completion of a program in international and global studies (including a major in global studies), a minor in a language from the School of Languages and Cultures, and a minimum of 12 credit points of study abroad/exchange. A second major, which may be an extension of the language minor, must be taken from those available in the B Arts or from the shared pool. You’ll also have access to the Open Learning Environment.

In the fourth year of the degree you will undertake advanced coursework and a substantial real-world industry, community, entrepreneurship or research project.

Assumed knowledge

Refer to B Arts/B Advanced Studies

Communities development program manager, diplomat, foreign aid worker, foreign correspondent, human rights advocate, international business consultant, policy adviser, trade negotiator

"B" for 'Bachelor of', "M" for 'Master of' and "D" for 'Doctor of'

<tr>
<td><strong>B Arts/D Medicine†</strong></td>
<td>This double degree gives you the opportunity to study arts and social sciences before undertaking medicine. School leavers who have achieved exceptional results can commence a three-year undergraduate arts degree and follow on with the four-year graduate-entry Doctor of Medicine (MD). With a deeper understanding of the fundamentals that underpin the health profession combined with your study of arts and social sciences, you will be better prepared for any career in medicine, from specialisation to research and teaching. You’ll also have access to the Open Learning Environment and the shared pool of majors, minors and electives.</td>
<td>Refer to B Arts and the course website: sydney.edu.au/courses You will choose a major from the options available in the B Arts, and either a second major or a minor from these options or the shared pool. During the B Arts you will complete foundational knowledge units for medicine plus a zero-credit-point subject in medicine. In the Doctor of Medicine component practical experience – including contact with patients and observation of the physical aspects of disease – commences in the first year and continues to the final year. Dalyell Scholars will complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. You will also have access to a suite of additional enrichment opportunities. <strong>Assumed knowledge</strong> Refer to B Arts. <strong>∆ See note below</strong></td>
<td>General practitioner or specialist, surgeon, researcher, pharmaceutical industry, forensic anthropologist, government policy officer, medical journalist, aid worker, management consultancy, teaching, medical administration, medical communication</td>
</tr>
<tr>
<td><strong>B Arts/M Nursing†</strong></td>
<td>Make a lasting difference. This double degree develops analytical and critical capabilities alongside the skills and expertise you will need to become a registered nurse. It opens up a wide range of career opportunities across both clinical and non-clinical settings.</td>
<td>Refer to B Arts. You will choose a major from the B Arts and either a minor or electives from those available in the B Arts or the shared pool. You’ll also have access to the Open Learning Environment. <strong>Focus areas for Nursing:</strong> acute care, aged care, chronic illness, clinical practice, Indigenous health, mental healthcare and management, pharmacology, physiology, professional practice, social and health <strong>Assumed knowledge</strong> Refer to B Arts</td>
<td>Registered nurse in a range of healthcare settings and highly employable in a range of non-clinical settings, including government, non-government organisations, business, education and research</td>
</tr>
<tr>
<td><strong>B Commerce</strong></td>
<td>Your global business journey starts here. Our Bachelor of Commerce offers a wide variety of subject options, immersive learning experiences and a strong commercial grounding in business. Take advantage of our international exchange and industry placement opportunities and tailor your degree to launch your career in virtually any field, anywhere in the world. You will also have access to the Open Learning Environment to broaden your skills and explore other areas of study.</td>
<td>Choose one major from the faculty options below and a second major or a minor either from these options or from the shared pool: accounting, banking (major only), business analytics, business information systems, business law, finance (major only), industrial relations and human resource management, international business, management, marketing, professional accounting (program). Mathematics or equivalent. Other assumed knowledge depends on the first-year subjects selected. <strong>∆ See note below</strong></td>
<td>Accountant, business analyst, corporate/government relations officer, economist, entrepreneur, enterprise architect, financial dealer and broker, human resources specialist, international business consultant, investment banker, management consultant, marketing executive, policy adviser, project manager</td>
</tr>
<tr>
<td><strong>B Commerce/B Advanced Studies</strong></td>
<td>Your global business journey starts here. Our new Bachelor of Commerce/Bachelor of Advanced Studies combined degree allows you to explore your interest in business alongside study in other disciplines – from mathematics to music – and tailor your studies for a career in a specialised industry. You’ll also have access to the Open Learning Environment to broaden your skills and explore other areas of study. In the fourth year you will undertake advanced coursework and either a substantial real-world industry, community, entrepreneurship or research project or an honours project.</td>
<td>Choose one major from the options below and a second major from these options or the shared pool: accounting, banking (major only), business analytics, business information systems, business law, finance (major only), industrial relations and human resource management, international business, management, marketing, professional accounting (program). Mathematics or equivalent. Other assumed knowledge depends on the first-year subjects selected. <strong>∆ See note below</strong></td>
<td>Accountant, business analyst, corporate/government relations officer, economist, entrepreneur, enterprise architect, financial dealer and broker, human resources specialist, international business consultant, investment banker, management consultant, marketing executive</td>

<td>B Commerce/ B Advanced Studies (Dalyell Scholars) 4 years full time Dalyell by application</td>
<td>Lead the next generation of business and innovation. Designed for high-achieving students, the Dalyell stream of the new Bachelor of Commerce/Bachelor of Advanced Studies cultivates high-level graduate attributes through greater depth and breadth of learning. You will enrol in exclusive Dalyell units and have access to a suite of enrichment opportunities as well as the Open Learning Environment. In the fourth year you will undertake advanced coursework and either a substantial real-world industry, community, entrepreneurship or research project or an honours project.</td>
<td>Refer to B Commerce/B Advanced Studies. As a Dalyell Scholar you will also complete 12 credit points of distinctive Dalyell units. These units will be complemented by enrichment opportunities that you can tailor to your needs. They include accelerated study options, additional senior level units of study from outside your primary discipline, mentoring and professional skill development, and a global mobility experience.</td>
<td>Accountant, business analyst, compliance officer, corporate/ government relations officer, data analyst, economist, entrepreneur, enterprise architect, financial dealer and broker, human resources specialist, international business strategist, investment banker, logistics and distribution manager, management consultant, marketing executive, market research analyst, project manager, risk manager.</td>
</tr>
<tr>
<td>B Commerce/ B Laws 5 years full time Dalyell by invitation</td>
<td>Pursue your interests in business and law through our combined degree program and graduate with a degree that will open doors to excellent career prospects in both fields. You will develop foundational knowledge of law, with the commercial, technical and management skills to launch your career as a legal practitioner, or step into the business world where a law degree is highly regarded. You’ll also have access to the Open Learning Environment and electives from the shared pool.</td>
<td>Refer to B Commerce. Units of study for Law: First year: Foundations of law, legal research I, torts. Second year: Civil and criminal procedure, contracts, criminal law. Third year: Torts and contracts II, legal research II, public international law, public law. Fourth year: Administrative law, corporations law, equity, evidence, federal constitutional law, introduction to property and commercial law, real property and the legal profession. Final year: Private international law A and seven elective units of study.</td>
<td>Refer to B Commerce. For law: solicitor, barrister, magistrate, judge. Non-legal: diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy, public policy.</td>
</tr>
<tr>
<td>B Design Computing 3 years full time</td>
<td>From websites and mobile apps to internet-of-things products and immersive environments, you will be at the leading edge of today’s user experience (UX) design world when you study with us. As a graduate your skills in design thinking coupled with technical skills, including code, will make you highly sought after by a range of employers.</td>
<td>Core areas of study include app design, creative technology, design thinking, graphic design, information architecture, physical computing, sound design, user experience and user-centred design. Core studies are in digital design, interaction design, information visualisation design and human computer experience. Related units may be taken from arts and social sciences, business, engineering, information technology, music and visual arts.</td>
<td>Interaction designer, user experience designer, creative technologist, web designer, digital production, product designer.</td>
</tr>
<tr>

| **B Design in Architecture**  
3 years full time | The Bachelor of Design in Architecture is offered by the University of Sydney School of Architecture, Design and Planning, ranked first in Sydney and in the top 15 in the world for Architecture/Built Environment (QS World University Rankings by Subject 2017). This degree introduces you to the rewarding profession of architecture and is your first step to becoming a registered architect. | Core areas of study include architectural design, architectural history and theory, architectural technologies, architecture workshops, environment and sustainability, professional practice and architectural communications. You will have the option of choosing to specialise in one of three streams: allied arts in architecture, urban design and planning, or digital architecture. You can also take electives from the University of Sydney School of Architecture, Design and Planning as well as from other faculties and schools. | Architect, architectural technologist, interior and spatial designer, urban designer, project manager, property developer |
| **B Design in Architecture (Honours) / M Architecture**  
5 years full time | If you are passionate about learning and aspire to be a groundbreaking thinker in the practice of architecture, this limited-intake, five-year double degree is a fast track to achieving your goals. It combines the undergraduate Bachelor of Design in Architecture with the postgraduate Master of Architecture. You will also attain undergraduate honours, which otherwise requires an additional full year of study. | Core areas of study include architectural design, history and theory, technologies, architecture workshops, environment and sustainability, professional practice and architectural communications. You will have the option of choosing to specialise in one of three streams: allied arts in architecture, urban design and planning, or digital architecture. You can also take electives from the University of Sydney School of Architecture, Design and Planning as well as from other faculties and schools. | Architect, design manager, academic |
| **B Economics**  
5 years full time  
Dalyell by invitation | The Bachelor of Economics introduces you to a diverse, fascinating discipline that addresses a range of big issues in modern life and plays a central role in shaping the broad framework of society at every level. It provides undergraduate training in theoretical and applied aspects of modern economics, econometrics and financial economics. Although primarily interested in explaining the behaviour of individuals, economics also addresses the collective behaviour of businesses and industries, governments and countries, and the globe as a whole. Economics is crucial to understanding and solving the major problems and challenges the world faces today, such as global warming, poverty, development, and recession. | You will choose one major from the options below and either a second major or a minor from these options, those offered by the University of Sydney Business School (see B Commerce on page 64) or from the shared pools: Economics, econometrics, financial economics, agricultural and resource economics. You’ll also complete units from the Open Learning Environment. | Accountant, banker, business information systems analyst, economic analyst, economist, financial manager, human resource manager, industrial relations specialist, researcher, social policy adviser. It will equip you with key capabilities to develop economic and social policy and to work in fields such as business, banking, financial markets and consulting in both the private and public sectors. |
| **B Economics / B Advanced Studies**  
4 years full time  
Dalyell by invitation | This combined degree will give you a comprehensive understanding of the economy, business and government, and the high-level technical skills to analyse economic and social data and events. A program in economics gives you an excellent grounding in economic theory and statistics, creating a study profile that reflects your expertise in a range of disciplines. High-achieving students will have the opportunity to complete the highly regarded honours pathway in economics. Honours is central to the strength of economics at the University of Sydney, providing expert training in applied economics, economic theory and econometrics. | You will choose one major from the options below and a second major from these options, those offered by the University of Sydney Business School (see B Commerce on page 64) or from the shared pool: economics, econometrics, financial economics, agricultural and resource economics. You will also undertake advanced coursework and either an honours project or a substantial research, community, industry or entrepreneurship project that builds on the skills and knowledge developed in the Bachelor of Economics. You’ll also take units from the Open Learning Environment. | Accountant, banker, business information systems analyst, economic analyst, economist, financial manager, government or NGO worker, human resource manager, industrial relations specialist, researcher, social policy adviser |

*B* for ‘Bachelor of’, *M* for ‘Master of’ and *D* for ‘Doctor of’  
*, †, ‡*, ****: see ‘Table notes’ on pages 56-57
B Economics (Dual Degree, Sciences Po, France)**
2+2 years full time
Are you ready for the opportunity of a lifetime? Travel abroad, immerse yourself in the French culture, learn a new language and complete a dual degree with a social science focus, all at the same time.
This four-year dual degree enables you to work towards both a Bachelor of Arts degree at Sciences Po in France for the first two years, and a Bachelor of Economics degree at the University of Sydney in the remaining two years.

Refer to B Economics for University of Sydney based-majors. For further information on studies in France, including units of study, please refer to [sydney.edu.au/arts/international/years_1_2.shtml](http://sydney.edu.au/arts/international/years_1_2.shtml).

Assumed knowledge
Mathematics or equivalent. *See note below*

Career possibilities
Accountant, banker, business consultant, business information systems analyst, economist, financial manager, human resource specialist, industrial relations specialist, researcher, social policy adviser

B Economics/ B Laws
5 years full time
Dalyell by invitation
Discover where economics and law collide with this versatile combined degree combination. Choose from a career in business, finance or the law and experience how your double degree enhances your knowledge, expertise and learning capacity. Specialised career fields include compliance, securities regulation and economic analysis. As part of this degree, you’ll have access to the Open Learning Environment and electives from the shared pool.

Refer to B Economics.

Assumed knowledge
Mathematics or equivalent. *See note below*

For Law: None.

Refer to B Economics.

Professional recognition
Australian Children’s Education and Care Quality Authority (ACECQA).

B Education (Early Childhood)
4 years full time
The Bachelor of Education (Early Childhood) will give you a professional qualification to teach children (birth-5 years) in early childhood education settings. Our innovative four-year degree incorporates introductory and advanced curriculum units, a strong social justice and leadership focus, placement experiences in early childhood settings that exceed minimum requirements, scope to develop and apply research skills in an honours strand, and opportunities to develop strong practical and research skills.

You will study specialist units in early childhood education and development, complemented by generalist units in education and professional studies, as well as elective units of study in the sciences, social sciences and humanities offered by the Faculty of Arts and Social Sciences, the Faculty of Science, and the University of Sydney Business School.

Assumed knowledge
Depends on the units of study chosen.

Teaching in a range of early learning centres and preschools (birth–5 years). Qualified early childhood teachers are in high demand and early childhood education is a high priority for both federal and state governments in Australia. This qualification is not suitable for teachers seeking employment in the Kindergarten to Year 6 school sector.

Professional recognition
Australian Children’s Education and Care Quality Authority (ACECQA).

B Education (Health and Physical Education)^
4 years full time
This degree will give you a professional qualification to teach in secondary schools in the area of personal development, health and physical education (PDHPE). along with a second teaching area of specialisation. If you are passionate about health, sport and the science of movement, this is the perfect course for you. It offers a range of unique experiences, including the opportunity to specialise in PDHPE. Service learning and community engagement are key features of this degree. You will be given service learning opportunities and work with educational, health and sporting organisations. Totaling 140 hours, this will supplement your professional experience placement in schools.

You need to select two teaching areas: the first will be health and physical education. Second teaching areas may include: Aboriginal studies, biology, business studies, chemistry, commerce, drama, economics, English, geography, history, (ancient and modern), languages and mathematics. Professional experience placements (totalting 80 days) begin in the first year of the course and progressively increase until the final placement, when you will be competent to teach under minimal supervision.

Prerequisite
The NSW Education Standards Authority (NESA) requires Band 5 in three HSC subjects (or equivalent) one of which needs to be English (English Standard or English Advanced).

Other applicants may be admitted through an approved comparable measure or alternative pathway, as approved by NESA.

Teaching in secondary schools or careers in corporate training and human resource settings, community health, coaching, recreation and sport

Professional recognition
NSW Education Standards Authority, NSW Department of Education, Association of Independent Schools of NSW, Catholic Education Office.

For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course.

</table>
Course description | Programs, majors and minors | Assumed knowledge/Prerequisite | Career possibilities
---|---|---|---
**B Engineering Honours (Civil)** 4 years full time | Take a lead role in designing and transforming your world. Through practical and industry experiences, this degree develops the comprehensive ability to plan, design and test structures within the built and natural environments. A suite of embedded professional skill development activities will equip you to contribute to infrastructure that improves lives in Australia and worldwide. | There are more than 15 engineering majors to choose from in this stream. The majors that best align with it are construction management, environmental engineering, geotechnical engineering, humanitarian engineering, structures and transport engineering. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Aid worker, airport and harbour authorities, banks, construction and mining companies, engineering and infrastructure consultants, humanitarian architect, town planner, project management and public works, sustainability specialist

**B Engineering Honours (Electrical)** 4 years full time | Create a brighter future. The Bachelor of Engineering Honours (Electrical) will develop your ability to design and build the systems and machines that generate, transmit, measure, control and use electrical energy. It will position you to tackle the world’s biggest challenges in health, education and the environment. | There are more than 15 engineering majors to choose from in this stream. The majors that best align with it are computer engineering, internet of things, power engineering and telecommunications engineering. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Grid maintenance and stability contractor, industry power supply engineer, power transmission and generating systems engineering, specialised consulting companies and telecommunications

**B Engineering Honours (Flexible First Year)** 4 years full time | Discover where your strengths lie. The Bachelor of Engineering Honours (Flexible First Year) allows you to commence your studies with core subjects and then transfer into your engineering stream of choice at the end of your first semester or first year. You will still complete your engineering degree in the normal time (four years). | Students commencing their studies in Flexible First Year will have the opportunity to pursue a major once they have transferred to a stream. There are more than 15 engineering majors to choose from. You can find information about which majors align best with the different individual stream information. | Assumed knowledge Mathematics Extension 1, Physics and/or Chemistry or equivalent. ∆ See note below | Refer to individual engineering streams for examples.

**B Engineering Honours (Mechanical)** 4 years full time | Design the machines that will engineer our future. The Bachelor of Engineering Honours (Mechanical) will develop your ability to design, manage and maintain a diverse range of mechanical applications. Through practical learning and industry experiences, you will be ready to transform the use of machines across a range of innovative and emerging industries. | There are more than 15 engineering majors to choose from in this stream. The majors that best align with it are environmental engineering, materials and space engineering. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Automated facilities, automatic control systems, biomedical implant design, building industry, design of automotive, undersea exploration and space vehicles, environmental pollution control, manufacturing industry, and mineral exploration

**B Engineering Honours (Mechatronic)** 4 years full time | Lead the next generation of machine design. The Bachelor of Engineering Honours (Mechatronic) combines mechanical, electronic and software engineering to enable you to create computer-controlled machines and consumer products. Our degree in mechatronic engineering is underpinned by industry experience and management training that could see you designing the smart systems of the future. | There are more than 15 engineering majors to choose from. The faculty offers a major in space engineering to high-achieving students. If you have an ATAR of 99 (or equivalent) or above, you may also apply for the space engineering major. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Automatic control systems, product design and development, robotics and automation for advanced manufacturing, and software design and development for real-time computer systems

**B Engineering Honours (Software)** 4 years full time | Create the software and games of tomorrow. Through the Bachelor of Engineering Honours (Software) you will learn first hand how to design and develop computer games, business applications, operating systems and network control systems. Combining technical knowledge with industry experience, you will be ready to transform the digital world. | There are more than 15 engineering majors to choose from. The majors that best align with this stream are computer engineering, power engineering, and telecommunications engineering. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Artificial intelligence, control systems, database management, information technology, internet programming, language compilers, multimedia and telecommunication software systems, real-time software engineering and reliable biomedical systems

**B Engineering Honours with space engineering major** 4 years full time | Dalyell by invitation | The Space major is available in aeronautical, mechanical and mechatronic streams – refer to the relevant stream. The major in space engineering covers studies in aerospace systems, electronic devices and circuits, orbital mechanics, space vehicle design and systems engineering. | Assumed knowledge Mathematics Extension 1 and Physics or equivalent. ∆ See note below | Along with career options from your chosen stream, you can apply your specialised knowledge of the space environment to careers in the aerospace, defence, environmental and research sectors.

*B‘ for ‘Bachelor of’, *M‘ for ‘Master of’ and ‘D’ for ‘Doctor of’

| B Engineering Honours/ B Arts 5 years full time Dalyell by invitation | This combined degree allows you to study engineering while pursuing your interests in the humanities, social sciences or languages. You can combine any of the Bachelor of Engineering Honours streams with a Bachelor of Arts, where you will access the Open Learning Environment and the shared pool of majors, minors and electives. | In addition to the relevant B Engineering Honours stream requirements, you will take a major from B Arts. You may take a minor or electives from the shared pool. | Assumed knowledge Mathematics Extension I and, either Physics or Chemistry, depending on the Engineering stream. Refer to the relevant stream.  
∆ See note below | Refer to relevant B Engineering Honours stream and B Arts |

| B Engineering Honours/ B Commerce 5 years full time Dalyell by invitation | This combined degree is designed to extend the management component of the Bachelor of Engineering Honours. You can combine any of the engineering streams with a Bachelor of Commerce, where you will access the Open Learning Environment and the shared pool of majors, minors and electives. | In addition to the relevant B Engineering Honours stream requirements, you will take a major from B Commerce. You may also take a minor or electives from the shared pool. | Assumed knowledge Mathematics Extension I and, either Physics or Chemistry, depending on the engineering stream. Refer to the relevant stream.  
∆ See note below | Refer to relevant B Engineering Honours stream and B Commerce |

| B Engineering Honours (Civil)/B Design in Architecture 5 years full time Dalyell by invitation | Design unique and innovative infrastructure. In the Bachelor of Engineering Honours (Civil) and Bachelor of Design in Architecture combined degree you will learn to analyse the forces within a structure and to design its skeleton to support these forces, complemented by the conceptual and aesthetic essentials of the design process. | Refer to B Engineering Honours (Civil) and B Design in Architecture. | Assumed knowledge Mathematics Extension I and Physics or equivalent.  
∆ See note below  
For Architecture: English (Advanced) or equivalent. | Aid worker, airport and harbour authorities, architecture, architectural technology, banks, construction and mining companies, engineering and infrastructure consultants, humanitarian architect, interior and spatial design, municipal councils, project management, property development, public works and urban design, sustainability specialist |

| B Engineering Honours/ B Laws 6 years full time Dalyell by invitation | This six-year combined degree will provide an excellent foundation for a career in law or engineering. Your engineering studies will emphasise the practical aspects of science, while your law studies will focus on the interpretation and application of the legal system. You can combine any of the engineering streams with a Bachelor of Laws. | Refer to the relevant B Engineering Honours stream.  
∆ See note below  
For Law: None. | Refer to the relevant B Engineering Honours stream.  
For Law: solicitor, barrister, magistrate, judge. Non-legal: diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy, public policy |

| B Engineering Honours/ B Project Management 5 years full time Dalyell by invitation | In this combined degree you will develop technical expertise in your chosen engineering stream and complementary project management skills. Along with engineering, you will study core project management subjects including project finance, complex project coordination, analytics, risk management, organisational behaviour and psychology. You can combine any engineering stream with a Bachelor of Project Management. | Refer to the relevant B Engineering Honours stream and B Project Management. | Assumed knowledge Mathematics Extension I and, either Physics or Chemistry, depending on the engineering stream. Refer to the relevant stream.  
∆ See note below | Refer to the relevant B Engineering Honours stream and B Project Management |

∆ For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course. See the Table notes on page 56

### B Liberal Arts and Science
3 years full time

With its flexibility and huge choice of majors, the Bachelor of Liberal Arts and Science provides you with a background in both the humanities and the sciences, and gives you useful skills that will make you highly valued by potential employers in jobs across the market.

From writing and presenting to thinking ethically and critically, this degree is your preparation for life beyond the classroom.

#### Programs, majors and minors
- **Arts majors** include: agricultural and resource economics; American studies; ancient Greek; ancient history; anthropology; Arabic language and cultures; archaeology; art history; Asian studies; biblical studies and classical Hebrew; Chinese studies; cultural studies; digital cultures; economics; economic policy; English; European studies; film studies; French and francophone studies; gender studies; Germanic studies; Hebrew (modern); history; Indigenous studies; Indonesian studies; international comparative literary studies; international relations; Italian studies; Japanese studies; Jewish civilization, thought and culture; Korean studies; Latin; linguistics; modern Greek studies; music; philosophy; political economy; politics; socio-legal studies; sociology; Spanish and Latin American studies; studies in religion; theatre and performance studies.

#### Assumed knowledge
Science majors include:
- anatomy and histology; applied medical science; biochemistry, bioinformatics; biology; cell pathology; chemistry; computer science; environmental studies; financial mathematics and statistics; geography; geology and geophysics; history and philosophy of science; immunobiology; information systems; marine science; mathematics; medicinal chemistry; microbiology; molecular biology and genetics; nanoscience and technology; neuroscience; nutrition and metabolism; pharmacology; physics; physiology; plant science; psychology; soil science; statistics.

#### Career possibilities
Science media adviser, science historian, science documentary maker, theoretical chemist, mammalian ecologist, human resources manager

### B Music
4 years full time

The four-year Bachelor of Music degree is designed for students who want to build their experience of current approaches to music, in terms of creating and understanding music and its place in society. This degree enables you to develop as a musician through the acquisition of an integrated body of knowledge, skills and ways of thinking about music. It also allows you to undertake a second major in either another music discipline, or other units of study from across the University through the shared pool of majors.

#### Programs, majors and minors
You will choose from the following programs:
- contemporary music practice; creative music; digital music and media; improvised music; or choose a musicology major. You may also take an optional major or electives from the shared pool.

#### Assumed knowledge
- Music 1 or equivalent.
- These depend on the areas of study and could include: arts administrator, music producer, singer/songwriter, contemporary musician, festival or venue manager, composer, music arranger, sound installation designer, interactive music designer, jazz musician, music journalist, music researcher, event producer.

### B Music (Composition)
4 years full time

Creating new music is a vital part of studies at the Sydney Conservatorium of Music. Our composition and music technology staff are some of Australia’s most gifted and widely recognised composers, working across instrumental and vocal to electronic and electroacoustic music. You will learn all facets of musical composition and be encouraged to specialise and create more ambitious work, with many opportunities to hear your work performed.

#### Programs, majors and minors
You will have the opportunity to study in both traditional and electroacoustic composition areas, including computer music, digital music and sound art. Core studies are taken in analysis, composer performance workshop, composition through improvisation, history and culture, and music skills (aural perception, harmony and analysis, music technology and sound recording).

#### Assumed knowledge
- Music 1 or 2 or equivalent.
- Composer, contemporary musician, concert entrepreneur, music teacher

### Prerequisite
For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course.

See the Table notes on page 56

<tr>
<td><strong>B Music (Music Education)</strong>&lt;sup&gt;*&lt;/sup&gt; 4 years full time</td>
<td>Music educators train the musicians of tomorrow. The Music Education stream immerses students in the Sydney Conservatorium of Music’s melting pot of performance, composition and teaching. While preparing to become accredited classroom teachers, our music education students undertake a principal study in performance (jazz or classical), musicology or composition.</td>
<td>You will take an instrumental (including jazz) or vocal (classical) principal study from brass, early music, jazz performance, percussion, piano, strings, voice (classical), woodwind. In addition, you will complete core studies in music skills and analysis, history, culture, performance, ensemble studies and pedagogy.</td>
<td>Concert soloist, contemporary musician, private music teacher, orchestral musician, chamber musician, concert entrepreneur, arts manager</td>
</tr>
<tr>
<td><strong>B Music (Performance)</strong> 4 years full time</td>
<td>The internationally regarded Bachelor of Music (Performance) at the Sydney Conservatorium of Music produces performers of the highest calibre. Students will combine their chosen principal study (instrument, classical voice or jazz) with orchestral studies and chamber music, and core studies such as music skills, analysis, history, culture and pedagogy. You will benefit from one-on-one tuition and make use of the Conservatorium’s excellent facilities. There are also opportunities for international tours with professional orchestras, bands and ensembles. You will undergo a comprehensive education on your chosen instrument, designed to push your creative and performative abilities to the next level.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>B Nursing (Advanced Studies)</strong> 3 years full time</td>
<td>Provide high-quality care and change lives. The Bachelor of Nursing (Advanced Studies) develops a comprehensive understanding of professional nursing practice. Combining practical learning with extensive clinical placements, this degree will enable you to apply for registration with the Nursing and Midwifery Board of Australia and launch your career in healthcare.</td>
<td>Focus areas for nursing: acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental healthcare and management, pharmacology, physiology, primary healthcare, professional practice, social and health policy.</td>
<td>Registered nurse with a career in a range of healthcare settings, including emergency, intensive care, mental health, cancer and palliative care, aged care, child and adolescent health, international health, education and research.</td>
</tr>
<tr>
<td><strong>B Nursing Post Registration (Singapore)</strong> 1 - 2 years part time (depending on intake)</td>
<td>This degree is offered to registered nurses in Singapore. You will further your existing nursing knowledge through greater understanding of the role of nursing in healthcare globally, gain greater appreciation of the value of research to practice and be able to translate research into practice. You will develop critical thinking and problem-solving skills in relation to nursing practice and greater leadership skills in clinical and professional nursing. This program has been developed and is taught and awarded by the University of Sydney and accredited by the Singapore Nursing Board. It is taught in Singapore at the Singapore Institute of Management (SIM).</td>
<td>Admission to the program requires current registration with the Singapore Nursing Board.</td>
<td>Senior nursing and management roles within the health sector, further postgraduate study.</td>
</tr>

<tbody>
<tr>
<td><strong>B Oral Health</strong>&lt;br&gt;3 years full time</td>
<td>Through practical learning and clinical placements, the Bachelor of Oral Health equips you with the required skills, knowledge and experience to deliver oral health education and promotion, dental hygiene and dental therapy services to patients and communities throughout Australia and New Zealand. Fully accredited by the Australian Dental Council, graduates are eligible for registration with the Dental Board of Australia and are licensed with the Environmental Protection Authority to use diagnostic radiation.</td>
<td>Recommended studies&lt;br&gt;Biology and/or Chemistry or equivalent.</td>
<td>Dental assistant, dental hygienist, dental technician, oral health educator. Professional recognition Australian Dental Council, Dental Board of Australia</td>
</tr>
<tr>
<td><strong>B Pharmacy</strong>&lt;br&gt;4 years full time</td>
<td>Transform and enrich lives. The Bachelor of Pharmacy develops a comprehensive understanding of how drugs are developed and medications affect the human body. The degree is accredited by the Australian Pharmacy Council and leads to registration as a pharmacist. Combining hands-on learning with clinical experience, this degree is your first step to becoming a registered pharmacist. Pharmacists are an integral part of the healthcare system and have the capacity to directly affect the lives and lifestyles of the people with whom they interact.</td>
<td>Completion of a major is not a requirement. Candidates have the option of completing one major, in either Industrial Pharmacy (consisting of an extended professional placement) or International Pharmacy, which provides an opportunity to participate in an international exchange program as part of the requirements of this major. Your studies will include biology, chemistry, medicinal chemistry, pharmaceutical sciences, pharmaceutics, pharmacology, pharmacy and pharmacy practice.</td>
<td>Pharmacist. A wide variety of career choices is open to registered pharmacists in community pharmacy (community practice), hospital pharmacy, research positions within universities or research institutes, or positions in the pharmaceutical industry in drug production, marketing or drug development. Professional recognition Australian Pharmacy Council</td>
</tr>
<tr>
<td><strong>B Pharmacy and Management</strong>&lt;br&gt;5 years full time</td>
<td>The Bachelor of Pharmacy and Management is an innovative, five-year degree that teaches a unique combination of pharmacy skills and business knowledge to develop the commercial, clinical and communication skills necessary to thrive in a changing and competitive healthcare landscape. Combining hands-on learning with clinical experience, this program is your first step to becoming a registered pharmacist and playing a vital and rewarding role in healthcare provision.</td>
<td>Completion of a major is not a requirement. Candidates have the option of completing one major in the fifth year, in either Industrial Pharmacy (consisting of an extended professional placement) or International Pharmacy, which provides an opportunity to participate in an international exchange program as part of the requirements of this major. Your studies will include biology, chemistry, medicinal chemistry, pharmaceutical sciences, pharmaceutics, pharmacology, pharmacy and pharmacy practice as well as business.</td>
<td>Pharmacist. A wide variety of career choices is open to registered pharmacists in community pharmacy (community practice), hospital pharmacy, research positions within universities or research institutes, or positions in the pharmaceutical industry in drug production, marketing or drug development. The management component of this course will give you the skills required to run your own business. Professional recognition Australian Pharmacy Council</td>
</tr>
<tr>
<td><strong>B Project Management</strong>&lt;br&gt;3 years full time</td>
<td>This is unlike any other project management degree in Australia and will provide you with the fundamental project management skills, theories and methods required in today’s complex business environment. Units of study include project finance, statistics, analytics, risk management, organisational behaviour and psychology. You can choose a stream from civil engineering science, built environment or software.</td>
<td>Streams available include: built environment, civil engineering science or software. Core units of study include analytics, complex project coordination, organisational behaviour, project finance, project management, psychology, risk management, statistics. You will undertake a capstone project in the final year. Built environment stream units are held within the University of Sydney School of Architecture, Design and Planning.</td>
<td>Professional and management roles in property development, construction, mining, events, IT, banking and finance, state or federal government or in consultancy roles in engineering, water health or energy sectors</td>
</tr>
</tbody>
</table>

\[\Delta\] For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course. See the Table notes on page 56
### B Psychology

**Course description**
The Bachelor of Psychology is ideal for you if you know you want to pursue a career in psychology. By the end of the four-year degree you will have the basis for provisional registration as a psychologist in Australia and enough training and experience to start working right away.

To become a fully registered psychologist, you need to undertake another two years of study.

**Programs, majors and minors**
In the first three years of the degree, you will complete a program in psychology, a minor from the shared pool and electives from either psychology, the shared pool or the Open Learning Environment. You will then undertake honours units in psychology in your fourth year.

**Prerequisite**

**Career possibilities**
Clinical psychologist (with additional study), organisational psychologist, market researcher, advertising executive, social worker, psychology researcher, learning and attention researcher.

### B Science

**Course description**
A Bachelor of Science opens up a world of opportunity. Whether you dream about working at the forefront of research – learning how to analyse and think critically – or want to help make the planet a better place, a Bachelor of Science will give you the tools you need to succeed.

Dalyell Scholars also have the option of completing a Mathematical Sciences program to combine their interest in mathematics with other areas of science and technology.

**Programs, majors and minors**
Choose one major from the options below and a second major or a minor either from these options or from the shared pool: agroecosystems (program); anatomy and histology; animal health, disease and welfare; animal production; applies medical science; biochemistry and molecular biology; biology; cell and developmental biology; chemistry; computer science; data science; ecology and evolutionary biology; environmental science (program); environmental studies; financial mathematics and statistics; food science; genetics and genomics; geography; geology and geophysics; history and philosophy of science; immunology (minor); immunology and pathology; infectious diseases; information systems; marine science; mathematical sciences (program – for Dalyell only); mathematics; medicinal chemistry; microbiology; neuroscience (program); nutrition science; pathology (minor); pharmacology; physics; physiology; plant production; plant science (minor only); psychological science***; psychology (program); quantitative life sciences; software development; soil science and hydrology; statistics; virology (minor only); wildlife conservation (minor only).

**Prerequisite**
All students undertake some study in mathematics. All students undertake Mathematics or Mathematics Extension 1 or equivalent. All students undertake some study in mathematics.

**Career possibilities**
Agricultural scientist, astronomer, biosecurity researcher, ecologist, environmental policymaker, food chemistry analyst, hydrologist, mathematician, medical scientist, nanoscientist, nutritionist (after further study), psychologist (after further study), plant geneticist, soil scientist. See B Science (Medical Science).

The Bachelor of Science equips you with the breadth and depth of knowledge and the critical analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

### B Science (Health)

**Course description**
Health is one of the fastest growing sectors. You will learn to understand the nature of the health problems facing global communities and how to design effective healthcare approaches to serve our increasingly consumer-driven, ageing population. The Bachelor of Science (Health) provides you with a comprehensive understanding of health that you can tailor to suit your own interests.

This stream requires completion of a major in health. A minor or second major must be taken either from those available in the B Science, in Human Movement (only available to students enrolled in the Health stream) or from the shared pool.

**Prerequisite**
Mathematics or Mathematics Extension 1 or equivalent. All students undertake some study in mathematics. For the Human Movement major: Chemistry.

**Career possibilities**
Health promotion, policymaking, project and case management, healthcare administration, work in insurance, business development, marketing and public relations, research assistance, strength and conditioning consultant, research assistant.

### B Science (Medical Science)

**Course description**
With the rise of personalised medicine, an increase in jobs in the broad medical and health sciences is predicted. Whether you want to work at the forefront of medical research or become a doctor or dentist with further study, the Bachelor of Science (Medical Science) will give you the essential foundation for a rewarding career improving the health of people and the community.

This stream requires completion of a program in Medical Science, including a Medical Science major. A second major or minor must also be taken from those available in the B Science or from the shared pool.

**Prerequisite**
Mathematics or Mathematics Extension 1, Chemistry and either Physics or Biology or equivalent. All students undertake some study in mathematics.

**Career possibilities**
Medical researcher, pathologist, doctor (after further study), dentist (after further study), histologist, physician, microbiologist, biochemist, biomedical device designer.

---

*B* for ‘Bachelor of’, *M* for ‘Master of’ and *D* for ‘Doctor of’

*, †, ф, **, ***: see ‘Table notes’ on pages 56-57
**B Science/ B Advanced Studies**

**4 years full time**

This degree opens up a world of opportunity. Whether you dream about working at the forefront of research, learning how to analyse and think critically, or want to help make the planet a better place, you will gain highly sought-after skills for a huge range of careers - from the sciences and beyond.

You will combine studies from a range of disciplines, undertake advanced coursework, and have access to the Open Learning Environment.

In the final year you will also complete either an honours project or a substantial research, community, industry or entrepreneurship project.

**Assumed knowledge/Prerequisite**

Choose one major from the faculty options below and a second major either from these options or from our shared pool:

- Agroecosystems (program); anatomy and histology; animal health, disease and welfare; animal production; applied medical science; biochemistry and molecular biology; biology; cell and developmental biology; chemistry; computer science; data science; ecology and evolutionary biology; environmental studies; environmental science (program); financial mathematics and statistics; food science; genetics and genomics; geography; geology and geophysics; history and philosophy of science; immunology and pathology; infectious diseases; information systems; marine science; mathematical sciences (Dalyell only); mathematics; medicinal chemistry; microbiology; nanoscience and nanotechnology (program); neuroscience (program); nutrition science; pharmacology; physics; physiology; plant production; psychological science***; psychology (program); quantitative life sciences; software development; soil science and hydrology; statistics.

**Career possibilities**

Agricultural scientist, astronomer, biosecurity researcher, ecologist, environmental policymaker, food chemistry analyst, hydrologist, investment banker, journalist, mathematician, medical scientist, nanoscientist, nutritionist, psychologist, plant geneticist, soil scientist

The Bachelor of Science/Bachelor of Advanced Studies equips you with the breadth and depth of knowledge and the critical analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

---

**B Science/ B Advanced Studies (Dalyell Scholars including Mathematical Sciences)**

**4 years full time**

**Dalyell by application**

As a Dalyell Scholar in the Bachelor of Science/Bachelor of Advanced Studies, you have the opportunity to cultivate scientific expertise alongside the essential critical and analytical skills necessary to navigate today’s dynamic world. Your studies throughout the sciences will be complemented by distinctive Dalyell units and enrichment opportunities.

You will combine studies from a range of disciplines, undertake advanced coursework and have access to the Open Learning Environment. In the final year you will also complete either an honours project or a substantial research, community, industry or entrepreneurship project.

Dalyell Scholars have the option of completing a Mathematical Sciences program to combine your interest in mathematics with other areas of science and technology.

Refer to B Science/B Advanced Studies. A second major must also be taken from these options or from the shared pool.

As a Dalyell Scholar, you will undertake 12 credit points of distinctive Dalyell units complemented by a suite of additional enrichment opportunities, including mentoring, professional skill development and a global mobility experience.

**Assumed knowledge**

Mathematics or Mathematics Extension 1 or equivalent. All students undertake some study in mathematics. Other assumed knowledge depends on subjects chosen.

See note below

**Career possibilities**

Agricultural scientist, astronomer, biosecurity researcher, ecologist, environmental policymaker, food chemistry analyst, hydrologist, investment banker, journalist, mathematician, medical scientist, nanoscientist, nutritionist, psychologist, plant geneticist, soil scientist

The Bachelor of Science/Bachelor of Advanced Studies equips you with the breadth and depth of knowledge and the critical analytical skills to pursue an extensive range of established and emerging careers. It prepares you for the jobs of the future.

### B Science/ B Advanced Studies (Health)
#### 4 years full time
#### Dalyell by invitation

**Course description**
Health is one of Australia’s fastest-growing sectors. This course provides a thorough grounding in health and health systems at the local, national and global levels. You will graduate with the ability to navigate the complexity of health in different sociocultural, political and economic contexts. You will develop core skills in critical thinking, complex problem-solving, communication and empathy. In this combined degree, you will complete studies from a range of disciplines, undertake advanced coursework, and have access to the Open Learning Environment. In the final year you will also complete either an honours project or a substantial research, community, industry or entrepreneurship project.

**Assumed knowledge**
Mathematics or Mathematics Extension 1 or equivalent. All students undertake some study in mathematics.

**Prerequisite**
This stream requires completion of a major in health. A second major must also be taken either from those available in B Science, in human movement (only available to students enrolled in the Health stream) or from the shared pool.

**Career possibilities**
Health promotion, policymaking, healthcare administration, project and case management, work in insurance, business development, marketing and public relations, research assistant, sports and conditioning consultant.

<tr>
<td><strong>B Science/ B Laws</strong>&lt;br&gt; 5 years full time&lt;br&gt;Dalyell by invitation</td>
<td>The legal field needs professionals who can understand and translate complex science. With a Bachelor of Science/Bachelor of Laws, you will graduate with two degrees and a suite of specialist skills that will allow you to carve out a niche in the legal sector. It will prepare you for jobs across patents, intellectual property and even forensics. Refer to B Science. Please note that the only stream available in this combined degree is the Dalyell stream. Units of study for Law: First year: foundations of law, legal research I, torts. Second year: civil and criminal procedure, contracts, criminal law. Third year: torts and contracts II, legal research II, public international law, public law. Fourth year: administrative law, corporations law, equity, evidence, federal constitutional law, introduction to property and commercial law, real property and the legal profession. Final year: private international law A and seven elective units of study.</td>
<td>Assumed knowledge Mathematics or Mathematics Extension 1 or equivalent. All students undertake some study in mathematics. Other assumed knowledge depends on subjects chosen.</td>
<td>Refer to B Science. For Law: solicitor, barrister, magistrate, judge. Non-legal: diplomacy, foreign affairs, human rights, international relations, investment banking, journalism, management consultancy, public policy</td>
</tr>
<tr>
<td><strong>B Science/ D Dental Medicine†</strong>&lt;br&gt; 7 years full time&lt;br&gt;Dalyell by invitation</td>
<td>This double degree gives you the opportunity to study science before undertaking dentistry. Designed for high school leavers who have achieved outstanding results, you will study a three-year undergraduate science degree, followed by a four-year Doctor of Dental Medicine. If you become a Dalyell Scholar, you will gain a deeper understanding of the scientific fundamentals that underpin dentistry and be better prepared for any career path you choose. This double degree is delivered by the faculties of Science and Dentistry. Refer to B Science. All students undertake first-year biology and some units of study in mathematics. As a Dalyell Scholar you will also complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. You will also have access to a suite of additional enrichment opportunities. For the Doctor of Dental Medicine you will study clinical dentistry, life sciences and a research project.</td>
<td>Assumed knowledge Refer to B Science.</td>
<td>Dentist in private practice, public service (hospitals, schools, health departments), defence forces, oral health researcher, academic careers, and a variety of specialisation options upon completion of professional and research experience</td>
</tr>
<tr>
<td><strong>B Science/ D Medicine†</strong>&lt;br&gt; 7 years full time&lt;br&gt;Dalyell by invitation</td>
<td>This double degree gives you the opportunity to study science before undertaking dentistry. This pathway allows school leavers who have achieved exceptional results to commence a three-year undergraduate science degree followed by a four-year Doctor of Medicine (MD). It gives you a deeper understanding of the scientific fundamentals that underpin medicine, so you will be better prepared for any career in medicine, from specialisation to research and teaching. Students may choose to take the Dalyell stream and will have access to the shared pool and Open Learning Environment. This degree is delivered by the Faculty of Science and the University of Sydney Medical School. You may elect to complete the Medical Science stream or choose from a wide range of majors from the sciences. Refer to B Science, B Science (Medical Science) and the course website: sydney.edu.au/courses During the Bachelor of Science you will complete foundational knowledge units for medicine plus a zero-credit-point subject in Medicine. In the Doctor of Medicine component, practical experience – including contact with patients and observation of the physical aspects of disease – commences in the first year and continues to the final year. Dalyell Scholars will complete 12 credit points of distinctive Dalyell units designed to cultivate high-level graduate attributes. You will also have access to a suite of additional enrichment opportunities.</td>
<td>Assumed knowledge Refer to B Science and/or B Science (Medical Science).</td>
<td>General practitioner or specialist, surgeon, researcher, pharmaceutical industry, defence forces, oral health researcher, academic careers, and a variety of specialisation options upon completion of professional and research experience</td>
</tr>

<tr>
<td><strong>B Science/ M Mathematical Sciences</strong> 4.5 years full time Dalyell by invitation</td>
<td>Become a leader in the field of mathematics and statistics. This combined degree is designed to give you a solid foundation in mathematics and statistics and help you complete deep training in mathematical sciences including data science. You will choose a major and progress from undergraduate study to advanced, specialist course and project work in order to prepare you for further research or the workplace.</td>
<td>Students will complete a Mathematical Sciences program, including a major in mathematics, statistics, financial mathematics and statistics, or data science. The second major or minor can be chosen from those available in the B Science or from the shared pool.</td>
<td>Business analyst, bioinformatician, data scientist, economic modeller, energy forecaster, game designer, health planner, quantitative analyst in banking, statistician, market analyst, meteorologist, financial analyst, teacher, researcher, web analyst. Mathematics is a universal language – it opens doors to job opportunities around the world. Australia is experiencing an acute shortage of graduates qualified in the mathematical sciences, particularly in statistics and data science.</td>
</tr>
<tr>
<td><strong>B Science/ M Nursing</strong> 4 years full time Dalyell by invitation</td>
<td>Become a leader in healthcare and nursing. The combined Bachelor of Science and Master of Nursing program cultivates the critical thinking skills and breadth of the sciences alongside the expertise and experience to become a registered nurse. It provides a wide range of career opportunities across both clinical and non-clinical settings.</td>
<td>Refer to B Science. You will choose one major from B Science. All students must take some units of study in mathematics. Focus areas for Nursing: acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental health care and management, pharmacology, physiology, professional practice, social and health policy.</td>
<td>Registered nurse in a range of healthcare settings with the ability to use your knowledge of science in health issues such as infectious and non-communicable diseases, infection control, climate change, anatomy, pharmacology and research.</td>
</tr>
<tr>
<td><strong>B Science (Health)/ M Nursing</strong> 4 years full time Dalyell by invitation</td>
<td>Pioneer healthcare innovations and transform lives. This combined degree provides a thorough grounding in health and health systems at the local, national and global levels, while developing the knowledge, skills and experience to become a registered nurse.</td>
<td>Refer to B Science (Health) - you will complete a major in Health. Focus areas for Nursing: acute care, aged care, child and adolescent health, chronic illness, clinical practice, Indigenous health, mental health care and management, pharmacology, physiology, professional practice, social and health policy.</td>
<td>Registered nurse in a range of healthcare settings and you can apply your knowledge of health systems to industries supporting healthcare, including e-health, mental health, industrial relations and management.</td>
</tr>
<tr>
<td><strong>B Science/ M Nutrition and Dietetics</strong> 5 years full time Dalyell by invitation</td>
<td>With a solid foundation in science plus a two-year master’s degree that has full accreditation from the Dietitians Association of Australia, the five-year Bachelor of Science and Master of Nutrition and Dietetics provides the training you need to launch straight into a career in nutrition and dietetics.</td>
<td>For the B Science, you will need to complete a program in Nutrition and Dietetics, including a major in Nutrition Science, a minor or a second major and complete units of study from the Open Learning Environment. For M Nutrition and Dietetics, your studies will include clinical nutrition, nutritional science and public health nutrition. You will also complete a nutrition research project.</td>
<td>Dietitian, nutritional researcher, hospital nutritionist, biochemist, food scientist. Professional recognition Accreditation with the Dietitians Association of Australia.</td>
</tr>
<tr>
<td><strong>B Social Work</strong> 4 years full time</td>
<td>The Bachelor of Social Work allows you to qualify as a professional social worker while also taking two years of tertiary studies in other areas of interest such as sociology, diversity studies or gender studies. Combining studies in social policy and social work, you will develop skills to promote social change, problem solve in human relationships, and empower and liberate people to enhance wellbeing. You will gain strong negotiating skills, a nuanced understanding of cultural contexts and sensitivity to various religious beliefs.</td>
<td>Your studies will include Indigenous Australian studies, social policy and social work, social research, sociology. In first and second year you may choose from the areas listed under B Arts. In third and fourth year, you will undertake a professional program in social work and social policy.</td>
<td>Aged care worker, children and families support worker, community worker in programs for people with disabilities, migrant and refugee liaison officer, international development worker, social policy adviser. Professional recognition Australian Association of Social Workers.</td>
</tr>
</tbody>
</table>

<tr>
<td>B Veterinary Biology/ D Veterinary Medicine</td>
<td>This degree provides you with both a scientific foundation and specialist clinical and medical experience. With its integrated approach designed for understanding real-world situations, the six-year course will turn you into a global professional at the forefront of modern veterinary medicine. Your studies will include animal behaviour and welfare science, animal diseases and pathobiology, animal husbandry, cell biology, clinical and professional practice, pharmacology, veterinary anatomy and physiology, veterinary conservation biology, veterinary medicine, veterinary public health and veterinary surgery.</td>
<td>Assumed knowledge Chemistry, Mathematics and Physics or equivalent. Δ See note below Recommended studies Biology or equivalent.</td>
<td>Veterinarian, veterinary geneticist, small animal veterinarian, livestock veterinarian, equine veterinarian, biosecurity researcher, veterinary cardiologist, public health policymaker</td>
</tr>
<tr>
<td>B Visual Arts</td>
<td>The Bachelor of Visual Arts is offered by Sydney College of the Arts, Sydney's premier training ground for contemporary visual artists for more than 40 years. It is a hands-on degree focused on developing the conceptual, theoretical and technical skills you need to succeed as a practising artist or in a range of careers in the creative industries. You will be encouraged to work across disciplinary boundaries to realise your ideas, and you'll gain a thorough grounding in the skills and history of your chosen specialisation. A range of specialisations is available. In addition to your specialisation, you will also have access to a wide range of electives in contemporary art, as well as units of study in many other disciplines offered across the University.</td>
<td>Recommended studies Visual Arts and Design or equivalent.</td>
<td>Artist, arts writer, crafts person, curator, digital artist, educator (with further tertiary qualifications), exhibition designer, filmmaker, illustrator, painter, product designer, sound artist, web and multimedia designer</td>
</tr>
<tr>
<td>B Visual Arts/ B Advanced Studies</td>
<td>The Bachelor of Visual Arts/ Bachelor of Advanced Studies is a combined degree offered by Sydney College of the Arts (SCA), Sydney’s premier training ground for contemporary visual artists for more than 40 years. This exciting and diverse combined degree offers the opportunity to develop your visual arts specialisation with advanced coursework, access to the shared pool and the Open Learning Environment, creating a study profile that reflects your expertise in a range of disciplines. A range of specialisations is available. In addition to your specialisation, you will also take a major from the shared pool and complete either a substantial research, community, industry or entrepreneurship project, or an Honours project in the final year.</td>
<td>Recommended studies Visual Arts and Design or Technology or equivalent.</td>
<td>Artist, arts journalist, commercial art director, crafts person, creative director, cultural officer or program manager, curator, digital producer, educator (with further tertiary qualifications), film producer or filmmaker, innovation manager, web and interaction designer</td>
</tr>
<tr>
<td>Diploma of Music</td>
<td>Studying the Diploma of Music at the Sydney Conservatorium of Music will provide you with vocational training in performance skills at a high level if you are aspiring to a professional career in music performance. It is also a great pathway to our internationally regarded Bachelor of Music degrees. A major in the Diploma of Music is defined as a principal study. Students undertake principal study over four semesters in either instrument, voice (classical), or jazz performance. In addition, students complete core studies in music skills and other performance related areas.</td>
<td>Assumed knowledge Music 1 or 2 or equivalent.</td>
<td>Arts administrator, concert entrepreneur, event producer, festival or venue manager, music journalist, music producer, orchestral musician, chamber musician, private music teacher, singer/songwriter</td>
</tr>
</tbody>
</table>
For students undertaking a senior secondary qualification in Australia, Mathematics is a prerequisite for this course. See the Table notes on page 56.
Below are the Australian Tertiary Admission Rank (ATAR) or International Baccalaureate (IB) entry scores for 2019. All published scores below are fixed for 2019 to guarantee entry, except for courses marked with an asterisk* against the score, these scores are an indication of what you will need to gain entry in 2019. Find out more about fixed ATARs at sydney.edu.au/sydney-ATAR

“I feel very fortunate to study among top scholars in my field, in a learning environment that fosters collaboration and innovation.”

Fannie Couture
Doctor of Philosophy
University of Sydney Business School Research Scholarship
Home country: Canada
Where will postgraduate study lead you? Whether you want to gain new professional qualifications, change your career direction or pursue a personal ambition, the University of Sydney will steer you to places you never imagined.

With more than 450 courses on offer across nine areas of study, we make it easy for you to tailor a degree to your goals and needs – with short or long-term study.

Our coursework and research degrees offer far more than knowledge. You’ll join leading thinkers to challenge the known and explore the unknown, in a stimulating environment that encourages both learning and networking. To support research and teaching excellence, we are investing in the latest innovative technology and exceptional facilities.

The University’s people drive our greatest feats. We give you access to leading lecturers, research supervisors, industry networks, research and teaching centre staff from Australia and worldwide – across many disciplines.

We also offer the option to fast track your postgraduate studies through recognition of prior learning or credit for previous studies. For details, see page 120.
**Postgraduate coursework**

**Master’s degrees**

These are ideal if you need specialised knowledge and skills, and want to:
- take the next step in your career or start a new one
- gain professional qualifications for your next job
- upskill for your current role
- develop academic expertise in your chosen field
- expand your breadth of knowledge.

They typically require between one and two years of full-time study.

**Graduate diplomas and graduate certificates**

Graduate diplomas and graduate certificates are usually based on master’s degrees and offer a subset of the master’s units.

They are an option if you don’t meet the entry requirements for a master’s degree, or if you are unable to undertake a master’s due to time or financial constraints.

If you don’t meet the requirements for a master’s degree, for some degrees you may be offered a place in the graduate certificate or diploma instead.

Once you finish the graduate certificate (usually six months of full-time study) you may then be able to progress to the equivalent graduate diploma (usually one year full time) and a master’s degree. Not all master’s degrees offer the graduate certificate and graduate diploma options, and some graduate certificates and diplomas may not be available for study full time onshore.

Find out more about your course at:
- sydney.edu.au/courses

**Research degrees**

Whether you’re an aspiring academic, seeking a competitive edge in your career, or want to explore a passion, a research degree will put you at the pinnacle of your studies.

Embracing on a research degree at Sydney is an opportunity to work alongside some of the world’s brightest and most accomplished academics. We offer exceptional facilities that support our pioneering multidisciplinary approach. Our scholars unite using the latest technology across the physical, medical, life and engineering sciences, the humanities and social sciences.

We have the drive to challenge traditional ways of thinking. You will have the support you need to contribute to research that makes a meaningful, real-world impact.

One way we support our researchers is through scholarships, available to international postgraduate research students in any discipline.

PhD students can also apply for travel grants to facilitate research activities with our international partners, including top tier institutions in Asia, Europe/UK and North America.

For more information about our research excellence, see pages 10 and 11 or visit
- sydney.edu.au/research

Our postgraduate research degrees include:

**Master’s by research/Master of Philosophy (MPhil)**

This degree usually requires 1-2 years of full-time study, and allows a candidate to undertake research and advanced specialisation. It can also provide a pathway to further study at PhD level.

**Doctor of Philosophy (PhD)**

This is our premier research award and the highest qualification that you can attain in Australia. It comprises independent research and writing on an approved topic toward a thesis for examination. Admission to research degrees is highly competitive. In general, to be eligible for admission you need to demonstrate sufficient prior research experience and capability.

Learn more about our research degrees:
- sydney.edu.au/study/pg-research

Below is some important information you need to know about the courses presented in the tables from pages 96 to 117.

The information published in these tables is correct at the time of publication for entry in 2019, and may be subject to change. For the latest course information, including admission requirements, course structure and availability, visit:

- sydney.edu.au/courses

Courses listed in the postgraduate courses table (pages 96 to 114) are CRICOS registered for international students who intend to study full time in Australia on a student visa. For more information on CRICOS registered degrees, visit the CRICOS register.

- cricos.education.gov.au

Courses (or streams) listed in the postgraduate course table (on pages 115 to 117) do not meet the CRICOS requirements for obtaining an Australian student visa to study full time onshore. However, courses offered by online/distance modes are available to international students from their home country. International students in Australia who are not on a student visa, depending on their visa type, may also be eligible to undertake courses(streams) that are not offered full time onshore. Some courses also have intensive study periods onshore combined with online study. For the latest information, visit:

- sydney.edu.au/courses

Important tuition fee information
Tuition fees listed in this course table are:

- quoted in Australian dollars and correct at the time of publication
- indicative tuition fees for study in Year 1, in the 2019 calendar year only
- based on a full-time student enrolment load of 48 credit points per year, or 1.0 Equivalent Full-Time Student Load (1.0 EFTSL) unless otherwise indicated. If your study load for the year is more or less than 1.0 EFTSL, your tuition fee will differ.

Courses less than 1.0 EFTSL
Please note that for courses that are less than 48 credit points per year (1.0 EFTSL), such as a graduate certificate (for which we list the credit points against the tuition fee), we have indicated the tuition fee based on the credit points required to complete the course.

In those cases, the tuition fee is not based on 1.0 EFTSL as stated in the column heading.

Annual review
Importantly, tuition fees are subject to annual review by the University and will increase each year, effective at the start of each calendar year.

Other costs
There are other costs in addition to tuition fees. For important fee-related information, refer to the costs information on page 128.

Key to the table
English – IELTS Academic
The first score is the overall score required, the second score(s) (in brackets) is the minimum score required in each component (L for Listening, R for Reading, S for Speaking, W for Writing).

For information on other tests and meeting English requirements, refer to the academic and English language requirements section (page 124) or visit:

- sydney.edu.au/study/english-reqs
### Postgraduate Courses

**Available for full-time study onshore**

<tr>
<td><strong>Architecture, design and planning</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architecture</strong></td>
<td>2</td>
<td>40,000</td>
</tr>
<tr>
<td>This degree provides a dynamic studio-based learning environment that produces graduates who are forward thinking, collaborative and at the forefront of the changing architectural profession. You will be challenged to expand your conceptual and creative skills while being grounded in the requirements essential for professional registration and practice after graduation.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architectural Science</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>In our Architectural Science program, you have the option to specialise in a single stream or a double stream in Audio and Acoustics, High-Performance Buildings, Illumination Design and Sustainable Design.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architectural Science - Single stream</strong></td>
<td>1.5</td>
<td>33,500</td>
</tr>
<tr>
<td><strong>Master of Architectural Science (Audio and Acoustics)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This stream will give you a solid foundation in the design, measurement and theory of audio and acoustics. You will gain a deep understanding of how sound shapes our experience of communication, entertainment, and spatial awareness, opening up a diversity of career paths including audio production, system design and acoustic consulting.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architectural Science (High Performance Buildings)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This stream is your pathway to an exciting and rewarding career in the built environment field. On graduation, you will have acquired an evidence-based education on the design, service provision and operation of buildings in a sustainable manner, an area with increasing economic and environmental importance. With extensive experience analysing and controlling the physical phenomena affecting buildings, practitioners of architectural science have a profound impact on the function, aesthetics and efficiency of architectural spaces.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architectural Science (Illumination Design)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>In this stream, you will develop your expertise in lighting for architectural and urban environments. You will also learn how sustainable lighting technologies are changing illumination design practice and contributing to new opportunities for creative applications of contemporary materials, colours and technologies. Our entire visual experience depends on light. It has a profound impact on the function and aesthetics of architectural spaces, and is a vital part of architecture and interior design.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Master of Architectural Science (Sustainable Design)</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>This stream enables you to develop efficient and environmentally responsive buildings and retrofit existing buildings to meet today’s environmental demands. With this knowledge, you will graduate as a sustainability expert and can choose from a range of career pathways include architecture, property development, construction or urban planning. Sustainable designers are critical to ensuring that the plans on paper become a reality during and after construction. Your skills in sustainable design are enhanced through the school’s expertise in the built environment.</td>

This degree allows you to develop specific skills in assessment, interpretation, management, formulation of policy, and documentation of culturally significant places, including buildings, sites and cultural landscapes. You will be introduced to methods and practices of conservation, designing and building new buildings in old settings, and the history, theory, law and policy of this unique area. This exciting field of study is much more than just the simple preservation of existing buildings.

**Tuition fees are subject to annual increases each year. For further information, see page 95. Fees are listed for the total credit points required for course completion.**

An innovative, cutting-edge degree designed for those who aspire to professional leadership roles, display executive potential and who would like to combine their professional aspirations with an interest in the arts and social sciences. This course has a strong emphasis on public policy analysis, cultural awareness and sensitivity, ethical reasoning and critical analysis which, together with a focus on problem solving, leadership, legal strategy and communication, equips you with a highly transferable and flexible skillset.

Our Art Curating degree will provide you with a rich combination of core academic skills, historical knowledge, critical insight and community-engaged experience, creating pathways to careers and professional development in art institutions of all types. You will explore and analyse traditional institutions such as museums and galleries, as well as the expanding field of contemporary curating and its wide range of non-traditional exhibition spaces, including artist-run and community art spaces, public art projects, festivals and commercial spaces.

This degree invites you to explore and develop your skills in fiction, non-fiction, poetry and more. Throughout your studies, you will gain a deep understanding of theories and histories of writing. This degree offers intimate access to Sydney’s literary life, including major literary and cultural events and institutions with which the University has close ties, such as the Sydney Writers’ Festival.

This degree offers exciting opportunities to deepen your knowledge of linguistics and cross-cultural communication, and develop new skills as you put this knowledge into practice. Analyse the forms and functions of language, both spoken and written, and study how language connects with visual contexts – gesture, image, film and sound, and digital platforms. You will develop a critical awareness of the connections between language, culture and society. Gain experience and skills in professional practice relating to the application of cross-cultural and linguistic knowledge and skills, and pursue research as a foundation for higher degree research.

The only Master of Cultural Studies on offer in Australia, this degree covers diverse topics of popular culture, media, gender, sexuality, globalisation, cultural policy, the politics of health, embodiment and consumer culture. Using real-world examples, you will learn to analyse cultural forms and debate their significance in context. You will also engage critically with culture in its manifest expressions and gain insight into identity, self-expression and embodiment.

This degree sheds light on the challenges in achieving sustainable economic development on a local, national and global scale. Bringing together critical theories from across the social sciences, this expansive cross-disciplinary program allows you to specialise in topics such as international relations, political economy, human rights, peace and conflict studies, anthropology, linguistics, public health, human geography, economics and sociology. The degree offers exciting opportunities to put your development knowledge into practice, including chances to participate in a research project on a community-based organisation in Sydney or take internship electives at local or international organisations.

A unique degree that offers a flexible program of study in multiple aspects of digital communication and culture, including the latest developments in internet platforms, social media, research tools, digital audiences, mobile media, online governance, cross-media creative and games. This degree provides a comprehensive platform from which to engage with digital technologies and their cultural contexts. You will gain an understanding of the recent literature on technological change and its cultural contexts.

This degree is designed for students who already have a strong background in economics. Built around a core of advanced training in economic theory and econometrics, with access to electives across a wide range of applications of economics, the Master of Economic Analysis is focused on the skills required to be a professional economist or economic analyst in the public and private sector. It is also suitable if you are seeking a path to a PhD in economics.

This degree provides you with the training and knowledge for a wide range of careers and focuses on advanced coursework in economics and data analysis – critical skills in today’s workforce. Designed to be relevant to new graduates as well as professionals seeking further training in economics for career progression or a career change, the Master of Economics encourages you to apply your training in practical ways to address major challenges in business and policy.

This degree is designed for research students from Australia and overseas, secondary school teachers and those interested in studying English literature at an advanced level. Through your studies, you will bring together contemporary critical theory with literary narratives and investigate how and why literature still enjoys particular resonance in the 21st century.

This degree will provide you with the core media skills to become an effective communicator across health and medicine, public affairs, public relations, community relations and journalism. Designed for aspiring and experienced communicators, health advocates, public relations specialists, media experts, and healthcare professionals, this course encourages development of skills in clear communication of public health campaigns and policy topics; creation of public education programs that nurture a more healthcare-literate population; the ability to raise awareness of, and advocate for, specific healthcare matters; and management of communication technology, including social media, to ensure information accuracy and uphold ethical standards.
Tuition fees are subject to annual increases each year. For further information, see page 95. Fees are listed for the total credit points required for course completion.

This degree aims to train a new generation of professionals, policymakers, government officials and security sector personnel to manage complex health events and their wider social and economic consequences. In this intellectually rigorous and flexible multidisciplinary program of study and research, you can draw on diverse areas of study, including agriculture, health sciences, medicine, nursing, public health, political science, law and business.

This degree provides you with an understanding of how human rights apply in various political, social, economic and environmental contexts. You will develop critical skills in the effective use of human rights tools and language to achieve specific changes in the world while gaining skills to apply to real situations and create workable solutions. Obtain vital knowledge of international and regional human rights systems and investigate areas including sociology and political science, political economy, philosophy, history and human geography.

Learn how to better understand and address the world’s most pressing challenges: war and peace; social and economic justice; poverty; development; and environmental sustainability. You will study relations among states and between states and non-state actors, including the history, nature, and evolution of the international system. We unite political, economic, social, security and cultural dimensions to study international affairs.

Through this degree, you will develop an understanding of both traditional and emerging security challenges and apply theories to real-world situations and current policy debates. Engage with a wide range of complex and interconnected issues, including the causes and consequences of war between states; ethnic, religious and ideological conflicts; and threats to security and the stability of states from environmental degradation, infectious diseases, climate change, nuclear proliferation, and the activities of non-state actors.

This degree will provide you with skills and knowledge in the study of globalisation, development, democracies, processes of state formation, international organisations, theories of international relations, international political economy and security, global environmental politics, and Asia-Pacific and Northeast Asian politics. Gain broad-based, flexible, tailor-made training with a focus on regional studies and comparative politics that may lead to further research or employment within government, diplomacy, development, defence, intelligence, business, risk management, journalism, humanitarian and non-government organisations.

This degree focuses on media content production in a global context. You will enhance and strengthen your written and verbal communication skills, and develop production skills in print, broadcast and online media. This course will provide you with a sophisticated understanding of the media, audiences and global media environments to keep you relevant in an ever-changing and dynamic industry.

This degree offers a hands-on education in contemporary moving image production by teaching you how to develop a film project from concept to screen. It is ideal for professionals pursuing a career in the film and digital media sector, and for anyone wishing to engage with contemporary filmmaking and interactive media. You will have the flexibility to tailor the degree to your preferred pathway, be it research or professional practice, including the option of undertaking a placement that interfaces directly with the moving image industry.

This degree will equip you with a contextual understanding of core historical and theoretical developments in museum and heritage studies. You will learn the frameworks for managing collections and sites and develop a practical understanding of the modes of interpretation used in the museum and heritage sector. You will undertake object and site research, significance assessment, archival research and exhibition development and contribute to heritage studies and conservation management plans.

One of only a handful of degrees of its kind in the world, the Master of Peace and Conflict Studies provides a distinctive qualification in a growing field and can be tailored to your interests. In addition to a core program of peace and conflict studies units, you can pursue electives from a range of disciplines, including development studies, human rights, political economy, international relations and security studies. From justice and reconciliation after mass violence to the role of religion in war and peace, a broad range of subjects is on offer.

Learn to view economic questions in their social and political context, and from different perspectives. You will gain a deep understanding of issues such as power and inequality, globalisation and its impact on national economic policy settings, and the trade-offs between the free market and broader social concerns. This degree provides extensive knowledge of key trends underlying the global economy and its transformation.

This degree will equip you with the latest skills required for the dynamic world of book, magazine, digital and online publishing. You will receive both professional training with direct vocational applications, as well as a scholarly approach to the history of publishing, its cultural significance and changing directions. You will study book, magazine and online editing, manuscript preparation, making magazines, print and website production, publication design, the book production and publishing business and marketing.
Gain a critical and multidisciplinary perspective on the global, national and local levels of a rapidly changing policy environment, with growing public scrutiny, shrinking resources, and new trans-boundary challenges. Explore the opportunities and constraints stemming from political, social, economic, civil and technological factors at both the national and global levels. During this degree, you will study migration, corruption, crisis management, governance and the environment.

**Master of Strategic Public Relations**

Acquire an understanding of public relations theory and practice at a time when new styles of management and the democratisation of workplaces demand higher proficiency in communication skills from practitioners. You'll gain the critical and strategic thinking skills to engage stakeholders in priority initiatives in a complex media environment where the boundaries between information, entertainment, image and politics are increasingly blurred.

**Master of US Studies**

Deepen your understanding of American politics, culture and society, and gain high-level analytical research and writing skills and a specialist understanding of United States military, political and cultural power. This degree asks you to think critically about the underlying theories and concepts of American studies, and America's influence in the world. The course gives you an international perspective on American politics and foreign policy, and will prepare you to reach your intellectual goals, ranging from policy analysis to an appreciation of cultural power and historical change.

**Master of Arts (Research)**

This degree is designed to meet the needs of students who would like to extend their studies beyond their undergraduate degree, primarily by thesis, but do not have an undergraduate honours degree or other qualification that would allow entry into a Master of Philosophy (MPhil) or Doctor of Philosophy (PhD). The MA (Research) is a qualification for admission to higher degree research candidature. You cannot upgrade to a PhD without completing the master’s. The MA (Research) can be taken in a range of subject areas, by research and thesis only, or a combination of thesis and coursework.

**Master of Fine Arts**

The Master of Fine Arts by research gives you the opportunity to develop your art practice within the structure of a research culture. You will build on your practice by investigating a proposed area of research, and will be encouraged to produce work of an original and speculative nature. Your research supervisor will provide personalised and dedicated attention to the development of your research outcomes.

**Master of Philosophy (Arts and Social Sciences)**

Candidates for the degree of Master of Philosophy (MPhil) with research and write a thesis of 40,000 to 60,000 words on an approved topic under the supervision of a member of the academic staff. Research can be undertaken in any one of the faculty’s schools (Economics; Letters, Art and Media; Languages and Culture; Philosophical and Historical Inquiry; and Social and Political Sciences). Research in the Faculty of Arts and Social Sciences extends across a diverse range of disciplines in the humanities and social sciences, embracing traditional, emerging and cross-disciplinary subjects.

**Business**

**Master of Business Administration** (Leadership and Enterprise)

Our full-time MBA (Leadership and Enterprise) is taught over 18 months at our Sydney CBD campus and has a precise limit on class size. The program is delivered in an intensive format, where students complete two units of study at a time over a seven to eight week period. You will 'learn by doing' through workshops with industry leaders; intensive group work; and tackling real world issues with a diverse cohort. You will graduate with the skills and knowledge to build and lead future enterprises in a digital, hyper-connected world from tech start-ups to major corporations.
Master of Commerce
This degree offers great choice and flexibility, allowing you to develop the knowledge and skills to advance your career in a wide range of specialisations including Accounting; Banking; Big Data in Business; Business Information Systems; Finance; International Business; Logistics and Supply Chain Management; Marketing; People; Management and Organisations; Strategy; Innovation and Entrepreneurship; and more. Our program will give you an applied understanding of core business concepts and practices. High achieving students have the option to take a work placement in Australia or overseas.

Master of Human Resource Management and Industrial Relations
This program will give you an understanding of key employment issues and the skills to respond to the rapid changes reshaping local and international work practices and policies. You will graduate as an ethically aware, highly skilled practitioner in the field of human resources and employee relations.

Master of International Business
This degree will give you the skills to devise and implement strategic decisions that facilitate sustainable, global corporate growth. You will have the opportunity to engage in a real-life, mini-consulting project for a company’s current or prospective international operations either in Australia or overseas.

Master of Logistics and Supply Chain Management
This course is taught at the University’s Institute of Transport and Logistics Studies, recognised by the Australian Government as a key centre of excellence in transport and logistics research and education. You will learn to apply the concepts and techniques at the heart of logistics and supply chain management and benefit from placement opportunities with leading companies. Upon graduation, you will be in demand.

Master of Management (CEMS)
If you are fluent in a second language, the Master of Management (CEMS) will open doors for you internationally. We are the only university in Australia to offer this prestigious program, which enables you to complete the CEMS Master’s in International Management program as part of your degree. You will spend at least one semester overseas at a top university belonging to the exclusive CEMS network.

Master of Management
Ranked Number 1 in Australia by the Financial Times, The Economist and QS, the Master of Management will dramatically increase your employment prospects. In just one year, recent graduates or early career changers will develop the skills that businesses demand, regardless of your previous experience or undergraduate area of study.

Master of Marketing
Our Master of Marketing is accredited by the Australian Marketing Institute and offers experienced managers the strategic knowledge and practical marketing skills that businesses today demand. With small class sizes, the program provides a dynamic and creative environment to share professional experiences, cutting-edge research, applications and values. Accelerate your career with this highly regarded program.

Master of Professional Accounting
The Master of Professional Accounting offers you the opportunity to develop the knowledge and expertise you need for a rewarding career in accounting, starting with associate membership of professional accountancy bodies. You will undertake advanced learning in both theory and professional practice and learn to solve accounting and business problems in innovative ways.

Research courses (Business)

Doctor of Philosophy (Business)
The degree of Doctor of Philosophy (PhD) at the University of Sydney Business School may be undertaken within all disciplines, or in a research centre, and in association with one of our dynamic research groups. The degree requires the satisfactory completion of six coursework units of study and a research thesis of 80,000 words on an approved topic, under the supervision of an academic panel.

Master of Philosophy (Business)
The University of Sydney Business School has an outstanding reputation for the quality of its research across a wide range of academic disciplines. The Master of Philosophy takes at least one year of full-time study to complete, during which candidates undertake approved research and write a thesis of up to 50,000 words.

Education and social work

Graduate Certificate in Human and Community Services
Understand and appreciate the latest developments in policy and its application, practice and research in this vital and growing sector. Strengthen your professional knowledge and specialise in your preferred sector, including community work practice and policy, mental health practice standards, and policy responses to domestic violence in Australia.

**Tuition fees are subject to annual increases each year. For further information, see page 95.
** Fees are listed for the total credit points required for course completion.
If you are a trained teacher, the Master of Education offers advanced learning in a dynamic climate of change and innovation. Designed for leaders and future leaders of education, it enhances your knowledge and practical skills and deepens your understanding of educational theory and research. This degree is designed to develop and support the careers of trained teachers who are teaching professionals, educational administrators, researchers and policymakers. You can complete the degree with units of study that suit your interests, including educational management and leadership, educational psychology, international education, special and inclusive education, sports coaching, and teaching English to speakers of other languages (TESOL).

The Master of Education (Educational Management and Leadership) examines concepts in educational administration and management, the theories and models of organisational behaviour to understanding change processes and their effects on organisations. You’ll research a range of human resources development and management issues and their relationship to other developments in education, the economy and society.

If you aspire to develop a deep understanding of learning, motivation, human development, thinking skills and individual differences, to apply to your career in education or human resource management, the Master of Education (Educational Psychology) is the degree for you.

Develop the specialised skills and knowledge to teach children with special education needs, and for leadership, consultancy and resources roles in special and inclusive education. This degree will equip you to tackle the real-world challenges that teachers face in the classroom every day. You will explore how to work with students who have special education needs, how to prevent disruptive behaviour and teach students with learning difficulties. You’ll gain a broad perspective on the issues, practices and philosophies in special and inclusive education.

This degree will equip you to apply a significant range of coaching principles and complex techniques across a wide variety of coaching situations. You’ll acquire the capacity to apply professional and academic knowledge in developing and implementing effective learning experiences in the field of sports coaching, examine the technological resources available to support the implementation of specific strategies in coaching athletes and teams, and develop an integrated model with the right mix of training activities, coaching pedagogy and sports science to optimise athletic performance.

Develop the skills and knowledge to successfully face the practical challenges of English language teaching in a second language context. Using the latest research, this degree investigates the theoretical basis of issues relating to applied linguistics and sociocultural contexts of education. This degree will develop your professional expertise and knowledge in the areas of applied linguistics and English language education whether you are, or are aspiring to become, an English language teacher of children, adolescents or adults. (Note: this degree does not in itself lead to a professional teaching qualification.)

This degree will equip you to apply a significant range of coaching principles and complex techniques across a wide variety of coaching situations. You’ll acquire the capacity to apply professional and academic knowledge in developing and implementing effective learning experiences in the field of sports coaching, examine the technological resources available to support the implementation of specific strategies in coaching athletes and teams, and develop an integrated model with the right mix of training activities, coaching pedagogy and sports science to optimise athletic performance.

This degree gives you unparalleled insight into the design, management and research of technology-supported learning. The professional pathway will appeal if you’re looking to work as a learning and development manager, an instructional designer, a multimedia learning designer or a learning strategist. The faculty’s Centre for Research on Computer-Supported Learning and Cognition (the CoCo Research Centre) offers specialised technologies and facilities, including a combination of virtual and physical spaces equipped with the latest learning technology.

The design and management of e-learning systems is a complex task that requires specialist skills and an understanding of how people and organisations learn. This research pathway will suit you if you want to conduct research in ICT-supported learning or if you’re planning to progress to a higher research degree. If you pursue the research pathway, you’ll complete a dissertation (12 credit points) on a topic chosen in consultation with your supervisor along with core units of study in psychology and the design of technology-supported learning, emerging educational technologies and research frontiers.

This degree invites you to reflect on your practice, appraise alternative practices and theories, and assess your clients’ needs in new ways. You’ll have the opportunity to critically evaluate your existing practice and provision, and gain skills to promote change, improve services and affect outcomes in the lives and situations of your clients.

Become an accredited social worker by completing the Master of Social Work (Qualifying). You’ll advance your career and be ready for social work roles in health and community services. This degree equips you to take on leadership roles in social work, the health and community services sector and related fields of practice. If your ambition is to make a positive difference in mental health, women’s services, corrections, disability support, child and family services, migrant and refugee services or international development, this is the program for you.

The Master of Teaching (Early Childhood) enables you to qualify to teach children from birth to five years. You will develop the knowledge and skills to become an outstanding early childhood teacher, professional decision maker, ethical leader, and theoretical and practical thinker.

This degree will give you the knowledge, skills and practical experience to teach personal development, health and physical education (PDHPE) in secondary schools. With a strong focus on practical workplace training, your coursework is enhanced by more than four months of practical experience. You’ll learn first-hand how to tackle everyday teaching challenges as well as school visits and a nine week internship in a high school. As part of the final internship, you will also complete a professional research project.
### Tuition fees are subject to annual increases each year. For further information, see page 95.

Fees are listed for the total credit points required for course completion.

---

Master of Teaching (Primary)

This degree prepares you to teach all primary school subjects from kindergarten to Year 6 (K–6). As well as learning about the policy frameworks that shape teaching in NSW, Australia and internationally, you will attend lectures and complete assignments about issues in teaching, learning and curriculum in all school years, from Kindergarten to the Higher School Certificate.

Master of Teaching (School Counselling)

Make a positive difference to the lives of children and adolescents through the Master of Teaching (School Counselling). This degree you to become an accredited school counsellor as well as a teacher in one area of the secondary school curriculum. In New South Wales, accredited school counsellors are qualified teachers who also have postgraduate qualifications in psychology (honours or the equivalent of a fourth year of study in psychology) sufficient for eligibility for registration with the Psychology Board of Australia. On completion of this degree, you may choose to complete the necessary additional requirements to become a registered psychologist, which includes a period of supervised practice.

Master of Teaching (Secondary)

Specialise in either one or two teaching areas at secondary education level, depending on your areas of interest. If your ambition is to teach science, mathematics or languages, you can study one of these as a ‘double method’ teaching area, and you won’t need to study a second area. Alternatively you can choose to study two ‘single method’ teaching areas, potentially broadening your future employment options.

Research courses (Education and social work)

- **Doctor of Philosophy (Education)**
  - Duration: 3–4 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - Lead educational transformation and change. In the Doctor of Philosophy (Education), you will design and undertake an independent research project under the guidance of a senior academic and an associate supervisor, culminating in an 80,000-word thesis. Cultivate research expertise and specialist knowledge as you enhance your professional and academic opportunities.

- **Doctor of Philosophy (Social Work)**
  - Duration: 3–4 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - Lead transformational and life-changing research. In this degree, you will design and undertake an independent research project under the guidance of a supervisor and an associate supervisor, culminating in an 80,000-word thesis. Cultivate research expertise and specialist knowledge as you enhance your professional and academic opportunities.

- **Doctor of Social Work**
  - Duration: 3–4 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - The Doctor of Social Work (DSW) is a professional higher degree that involves directly relevant coursework, practice–development research at a high standard, and a research thesis of 50,000 words that links the other two components. The DSW allows you to review and develop theoretical approaches to the changing context of welfare. It also enables experienced practitioners in social work to develop excellence in field–based research and practice. Graduates are equipped to lead in social work research as well as in instructing and mentoring social workers.

- **Master of Education (Research)**
  - Duration: 1–2 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - This degree offers advanced training in education research and provides a research path to doctoral study in education. It is designed for people who wish to undertake a research degree, but not one of the length and scale of a Doctor of Philosophy (PhD) or Master of Philosophy. It is also applicable for those who in the future, wish to enrol in a PhD or Doctor of Education degree, but lack either an honours year or a degree that would permit them direct admission. It is also an opportunity to enrol in a higher degree that contains some coursework, but not the amount required by the current Master of Education (coursework) program.

- **Master of Philosophy in Education**
  - Duration: 1–2 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - Become a leader in research and education. In this degree, you will design and undertake a supervised research project, culminating in a 30,000-word thesis, while developing invaluable research skills as you enhance your career and open pathways to further research.

- **Master of Philosophy in Social Work**
  - Duration: 1–2 years
  - Commencing semesters: Mar/Jul
  - Tuition fee: $40,000
  - Transform social work through innovative research. In this degree, you will design and undertake a supervised research project, culminating in a 30,000-word thesis. Cultivate invaluable research skills as you enhance your career and open pathways to further research.

---

Engineering and information technologies

- **Graduate Diploma in Computing**
  - Duration: 1 year
  - Commencing semesters: Feb/Aug
  - Tuition fee: $43,500
  - Our Graduate Diploma in Computing provides the ideal pathway to master’s level study for those without a background in IT. Non-IT graduates wishing to upskill or enhance their existing career with technology-based qualifications will gain a strong foundation in information technologies. They will also learn to design specialist systems, and develop skills integral to a wide range of disciplines such as business, health, engineering and science.

- **Master of Complex Systems**
  - Duration: 2 years
  - Commencing semesters: Feb/Aug
  - Tuition fee: $43,500
  - Complex systems such as smart cities, mega-projects, power and data grids, ecosystems, and communication and transport networks, are composed of numerous diverse interacting and interdependent parts. This degree will give you the expertise to design and manage such systems. You’ll learn to model, analyse and design resilient technological, socioeconomic and socio-ecological systems, and develop strategies for crisis forecasting and management.
### Master of Data Science

The Master of Data Science is a professional degree for people who are passionate about drawing meaningful knowledge from data to drive business decision-making or research output. It will develop your analytical and technical skills to use data science to guide strategic decisions in your area of expertise. It also offers the flexibility to tailor learning to your professional and personal interests. Data is a vital asset to any organisation. It holds valuable insights into areas such as customer behaviour, market intelligence and operational performance. Data scientists build intelligent systems to manage, interpret, understand and derive key knowledge from big data sets.

### Master of Engineering

If you are a qualified engineer seeking to move into a management role or to specialise or update your skills, this degree will build on your engineering undergraduate degree by developing specialised technical knowledge in your chosen area. See the Master of Engineering specialisations below for more information.

**Master of Engineering (Automation and Manufacturing Systems)**
By learning about automation and manufacturing systems, you’ll be able to apply engineering principles to understand, modify or control the manufacture, delivery and maintenance of technology components.

**Master of Engineering (Biomedical Engineering)**
Biomedical engineering develops technology to monitor physiological functions and assist in the diagnosis and treatment of patients.

**Master of Engineering (Chemical and Biomolecular Engineering)**
You’ll develop specialised technical knowledge in chemical and biomolecular engineering, focusing on the design and management of industrial processes guided by economic, environmental and societal considerations.

**Master of Engineering (Civil Engineering)**
Develop specialised skills for planning, designing and testing structures within the built environment including dams, bridges, pipelines, roads, towers and buildings.

**Master of Engineering (Electrical Engineering)**
Receive technical knowledge in electrical engineering, and learn about designing and building systems that generate, transmit, measure, control and use electrical energy.

**Master of Engineering (Fluids Engineering)**
Develop specialised technical knowledge in fluids engineering, learning about fluid mechanics and engineering systems associated with the fluid environment.

**Master of Engineering (Geomechanical Engineering)**
Geomechanical engineering involves learning how to examine soil and rock layers and determine their physical and chemical properties to design foundations and earthworks structures.

**Master of Engineering (Mechanical Engineering)**
Mechanical engineering provides an advanced understanding of the design of mechanical components, whole machines, mechanical systems and mechanical processes.

**Master of Engineering (Power Engineering)**
Power engineering develops advanced skills to plan, design, construct, operate and maintain power systems and equipment.

**Master of Engineering (Risk Management)**
Risk management provides an understanding of the standards applied to manufacturing and processing industries through project management, industrial processing and risk management operations in an engineering context.

**Master of Engineering (Software)**
Software engineering develops specialised technical knowledge covering all aspects of software production from strategy and design to coding, quality and management.

**Master of Engineering (Structural Engineering)**
Structural engineering gives an understanding of how structures and buildings resist and transfer natural and other forces to the ground.

**Master of Engineering (Sustainability and Environmental Engineering)**
Sustainability and environmental engineering explores the development of sustainable products and processes that maximise efficiency and minimise environmental impact.

**Master of Engineering (Telecommunications Engineering)**
Telecommunications engineering covers the design, construction and management of systems that carry out wireless transmission and broadcasting of information.

### Master of Health Technology Innovation

If you are a health practitioner, engineer, IT professional or scientist, this unique program will equip you with the skills to deliver improved health outcomes for patients through the innovative use of health technologies. Recognising the changing healthcare landscape, this degree will help you bridge the gap between the technical and clinical arenas. Healthcare solutions are increasingly dependent on the innovative use of modern technologies. If you are seeking to broaden your career options and take advantage of exciting opportunities in this emerging field, this professional degree is for you.

This degree is designed for IT professionals looking to update and extend their technical knowledge of advanced computing subjects, or move into a new IT specialisation. Internationally recognised, it can help advance your career in diverse fields such as software engineering, health, telecommunications and more. The program is also an excellent retraining opportunity for professionals who want to specialise in a different area of IT.

| **Master of Information Technology Management**                             | ✓                             | ✓                         | 6.5 (6.0)      | Feb/Aug              | 1.5                         | 43,500                                            |

If you are an IT professional or technically skilled graduate aiming to make the transition into management, this degree will help you develop the skills to manage the design, delivery and operation of business technologies effectively. It will equip you with an in-depth understanding of key areas such as data analytics, business intelligence, IT strategy and IT project management, to prepare you to succeed in managing areas that use technology to expand business endeavours.

| **Master of Information Technology and Master of Information Technology Management** | ✓                             | ✓                         | 6.5 (6.0)      | Feb/Aug              | 2                           | 43,500                                            |

If you are an IT professional or graduates wanting to develop both technical and management skills specifically related to technology, this combined degree will improve your understanding of the latest advancements in IT and how to use them to drive organisational transformation. The degree’s accelerated two-year structure gives you the opportunity to undertake specialist study in a range of IT-related disciplines along with a program in IT management. It will deepen your technical knowledge of complex IT environments while developing your ability to manage the design, delivery and operation of business technologies. The combined degree is accredited by the Australian Computer Society as a professional-level course.

| **Master of Professional Engineering**                                       |                             |                           | 7.0 (6.0)      | Feb/Aug              | 3                           | 44,500                                            |

If you are looking to make the transition from a science or mathematics-based career to become an engineer, or if you already have an engineering degree and would like to change paths to a different specialisation, the Master of Professional Engineering offers an accredited qualification that will enable you to practise in Australia and overseas. It will also help you develop the sound communication, management and decision-making capabilities necessary to interpret and discuss complex issues in your area of specialisation. See the Master of Professional Engineering specialisations below for more information.

- **Master of Professional Engineering (Aerospace)**
  The aerospace specialisation covers spacecraft and satellite design, aerodynamics, aircraft design analysis, and smart materials.

- **Master of Professional Engineering (Biomedical)**
  The biomedical specialisation covers biomaterials engineering, applied tissue engineering, advanced engineering materials and computational fluid dynamics.

- **Master of Professional Engineering (Chemical and Biomolecular)**
  The chemical and biomolecular specialisation explores industrial processes in which material in bulk undergoes physical or chemical changes.

- **Master of Professional Engineering (Civil)**
  The civil specialisation will teach you about planning, designing and testing structures within the built environment, including dams, bridges, pipelines, roads, towers and buildings.

- **Master of Professional Engineering (Electrical)**
  The electrical specialisation covers designing and building systems that generate, transmit, measure, control and use electrical energy.

- **Master of Professional Engineering (Fluids)**
  The fluids specialisation will teach you about fluid mechanics and engineering systems associated with the fluid environment.

- **Master of Professional Engineering (Geomechanical)**
  In the geomechanical specialisation, you’ll learn to examine soil and rock layers and determine their physical and chemical properties to design foundations and earthworks structures.

- **Master of Professional Engineering (Mechanical)**
  The mechanical specialisation will provide you with an advanced understanding of the design of mechanical components, whole machines, mechanical systems and mechanical processes.

- **Master of Professional Engineering (Power)**
  The power specialisation will provide you with advanced skills to plan, design, construct, operate and maintain power systems and equipment.

- **Master of Professional Engineering (Software)**
  The software specialisation addresses all aspects of software production from strategy and design to coding, quality and management.

- **Master of Professional Engineering (Structural)**
  The structural specialisation is concerned with the design of high-rise buildings, industrial complexes, bridges, stadiums, and sporting and exhibition centres.

- **Master of Professional Engineering (Telecommunications)**
  The telecommunications specialisation covers the design, build and management of systems that carry out the transmission and broadcasting of information using wireless signals.
Master of Project Leadership

Acquire the skills to establish and tailor sophisticated interdependent project frameworks, and develop an understanding of high-level concepts of open-systems innovation, dynamic social networks and design thinking. This program is designed for experienced project managers and senior managers seeking to develop the critical complex thinking and communication skills required for successful project leadership. An innovative and challenging program, it will develop your strategic thinking capability and broaden conventional concepts of leadership, management, governance, risk, resilience and sustainability.

Master of Project Management

This degree will provide you with the advanced project management skills you will need for hands-on project management. This course is an ideal complement to your on-the-job experience and will equip you with the fundamental methodologies, modelling and analytical techniques for the design and implementation of projects across a wide range of industries. You will have the opportunity to work in small groups, sharing your industry knowledge and expertise with fellow professionals.

Research courses (Engineering and information technologies)

Doctor of Philosophy (Engineering and IT)

The Doctor of Philosophy (PhD) program involves preparing a thesis that will make a substantial and original contribution to the specific subject area. The Faculty of Engineering and Information Technologies focuses on multidisciplinary research centred on various key themes: field robotics; agricultural engineering; biomedical engineering and technologies; human-centred technology; complex systems; materials and structures; food processing; clean, intelligent energy networks; and water and the environment. This degree is awarded if your thesis is considered to be a substantial and original contribution to the subject concerned.

Master of Philosophy (Engineering and IT)

The Master of Philosophy (MPhil) program involves preparing a thesis that will make an original contribution to the specific subject area. The Faculty of Engineering and Information Technologies focuses on multidisciplinary research centred on various key themes: field robotics; agricultural engineering; biomedical engineering and technologies; human-centred technology; complex systems; materials and structures; food processing; clean, intelligent energy networks; and water and the environment.

Law

Juris Doctor

Embark on your next journey and learn from some world-renowned experts in law. One of Australia’s most reputable graduate entry degrees, the Juris Doctor develops your skills of analysis, research, writing and advocacy. Join us to prepare for legal practice in the modern global age. The JD program includes study of all the required areas of knowledge for admission to practise in Australia. The curriculum focuses on international, comparative and transnational aspects of law. Whether you are planning to undertake further postgraduate study or research, or pursue a career as a solicitor, at the bar or in government service, industry or the not-for-profit sector, your JD will equip you with the analytical, ethical and problem-solving skills you will need to excel.

Master of Administrative Law and Policy

The Master of Administrative Law and Policy is designed to develop your understanding of the relationship between law and the analysis and implementation of public policy. It examines the values inherent in administrative law and those of public administration, together with the practical aspects of the application of the law.

Master of Business Law

This specialist qualification in business law and regulation offers you an opportunity to choose from the entire range of units of study offered through Sydney Law School’s commercial law, corporate, securities and finance law, international business law, international taxation and taxation programs. This degree reflects the growing importance of legal literacy and business law expertise among non-lawyers working in business, finance, commercial and corporate environments. It also provides a master’s-level qualification that builds on the completion of professional accountancy qualifications.

Master of Criminology

Gain a critical understanding of criminology through a broad selection of interdisciplinary units delivered by some of Australia’s leading criminologists. Designed for anyone with an interest in crime, punishment and criminal justice, the criminology program addresses contemporary questions about crime and control within theoretical and policy contexts.

Master of Environmental Law

The unique and innovative Climate and Environmental Law program at Sydney Law School is at the forefront of contemporary issues in climate and environmental law. It has been designed to meet the needs of both Australian environmental specialists and those from other countries. Climate and environmental law form one of the most rapidly expanding areas of specialisation in the law. At Sydney Law School, this expansion is reflected in the abundance and variety of units available in the study of this field.

Master of Health Law

Sydney Law School offers one of the nation’s leading postgraduate programs in health and medical law. The Master of Health Law is a flexible, specialist postgraduate qualification providing wide-ranging interdisciplinary coverage of contemporary legal and social issues in health care.

Master of International Law

An acknowledged leader in international law, Sydney Law School offers a unique program that focuses on core areas of international law with a variety of specialisations. Our program allows you to undertake units of study with a comparative focus, or those that examine the international rules governing the world as a whole.
Course name | Graduate certificate available | Graduate diploma available | IELTS Academic | Commencing semester | Duration (full time in years) | 2019 indicative year fee (A$)/1.0 EFTSL
---|---|---|---|---|---|---
Master of Jurisprudence | ✓ | | 7.0 (6.0) | Feb/Aug | 1 | 46,500

One of Sydney Law School’s key strengths, jurisprudence comprises the teaching of legal theory with a focus on the philosophical and sociological aspects of law. The Master of Jurisprudence is an interdisciplinary program suitable if you are interested in the principles and operations of legal systems or interdisciplinary research methodology. The course is designed to expose you to the importance of legal theory in its broad sense, which includes philosophical reflection, sociological theory and comparative enquiry.

Master of Labour Law and Relations | ✓ | | 7.0 (6.0) | Feb/Aug | 1 | 46,500

Sydney Law School offers a rare and flexible program in employment and labour law that allows law graduates to pursue specific units in labour law, employment law, discrimination law and dispute resolution. The Master of Labour Law and Relations is a sought-after qualification for people with or without a law degree that merges the expertise of Sydney Law School with the Discipline of Work and Organisational Studies (part of the University of Sydney Business School) and the Department of Political Economy.

Master of Laws | ✓ | | 7.0 (6.0) | Feb/Aug | 1 | 46,500

The University of Sydney’s Master of Laws (LLM) program is one of the leading postgraduate coursework programs in law in Australia. It is a flexible and highly sought-after degree that caters specifically for the needs of the legal profession. We cater to more than 20 areas of specialisation as well as offering a number of specialised units of study, with units taught by our own experts as well as by international visitors. As a law graduate, you may choose from the entire range of units of study offered through Sydney Law School’s postgraduate coursework program, allowing you to tailor an LLM program that suits your academic and professional needs.

Master of Taxation | ✓ | | 7.0 (6.0) | Feb/Aug | 1 | 46,500

The Master of Taxation is a specialist qualification in Australian tax law, drawing upon the Sydney Law School’s taxation program, one of the world’s most respected and established. The curriculum has been designed to meet professional requirements at a national and international level and is relevant to those in the Australian tax profession, whether as lawyers, accountants, public administrators or academics, who wish to build on their experience and attain a high level of specialist tax expertise. Sydney Law School is internationally renowned for tax education.

Research courses (Law)

Doctor of Philosophy (Law) | | | 7.0 (6.0) | Mar/Jul | 3–4 | 46,500

The Doctor of Philosophy (PhD) at Sydney Law School equips you for careers in advanced research, policy development, public service, tertiary teaching or professional leadership. You will benefit from a vibrant and dynamic research culture and engage with internationally renowned faculty members who are experts across a range of fields. Student will submit a thesis of approximately 80,000 words.

Master of Criminology – Research | | | 7.0 (6.0) | Mar/Jul | 1–2 | 46,500

The Master of Criminology by Research enables you to further explore aspects involving criminal law, forensic psychiatry, drug policy and the law, gender and race relations, youth and crime, policing in society, and other social and cultural aspects of criminal justice. Your 50,000-word supervised thesis must make a substantial contribution to the knowledge of the subject concerned. Candidates are also required to undertake the compulsory research-support unit of study, LAWS6077 Legal Research 1.

Master of Laws – Research | | | 7.0 (6.0) | Mar/Jul | 1–2 | 46,500

The Master of Laws by thesis equips candidates for careers in advanced research, policy development, public service, tertiary teaching or professional leadership. It will enable you to acquire and develop sophisticated research and analysis skills, honed through work on a topic of your choice that expands legal thinking and understanding. Your 50,000-word supervised thesis must make a substantial contribution to the knowledge of the subject concerned. Candidates are also required to undertake the compulsory research-support unit, LAWS6077 Legal Research 1.

Medical and health

Allied health

Master of Diagnostic Radiography | | | 7.0 (6.0 R/L; 6.5 W/S) | Feb | 2 | 51,500

This course prepares graduates for clinical practice in the profession of diagnostic radiography with a commitment to lifelong learning and evidence-based practice. The course is a graduate-entry program (students are required to have completed an undergraduate degree prior to entry), however it is designed to accommodate all suitably qualified candidates regardless of their previous discipline. As the course leads to eligibility to practise, you will be assisted with achieving prescribed professional competencies through practical and theoretical skill acquisition and clinical placements.

Master of Exercise Physiology | | | 7.0 (7.0) | Feb | 2 | 46,500

This course is designed to produce graduates who possess the knowledge, competencies and clinical experience required for safe and effective clinical exercise practice. You will explore metabolism and physiology, human motor learning and control, the principles of exercise programming, nutrition and pharmacology, and musculoskeletal principles of exercise. Integrated clinical practice instruction, practicums, and case studies will provide the advanced skills and experience essential for professional practice. Clinical placements are undertaken in both the public and private sectors.

Master of Occupational Therapy | | | 7.0 (7.0) | Feb | 2 | 49,500

This course prepares graduates for clinical practice in the profession of occupational therapy. Occupational therapists work with their clients to overcome barriers that may be preventing them from participating more fully in life. This might involve teaching alternative techniques to achieve a given task, or facilitating improvement of skills. Occupational therapists collaborate with family and carers where needed, and typically work in teams with other health professionals. The course is a graduate-entry program (you are required to have completed an undergraduate degree prior to entry), however it is designed to accommodate all suitably qualified candidates regardless of their previous discipline.

*Tuition fees are subject to annual increases each year. For further information, see page 95.
** Fees are listed for the total credit points required for course completion.
This course prepares graduates for professional practice as physiotherapists. Physiotherapists use highly-developed clinical reasoning skills to assess, diagnose and treat people with movement problems caused by a wide variety of joint, muscle, nerve and metabolic disorders. They use a range of drug-free techniques to treat and prevent injuries, and assist their clients to maintain fit and healthy bodies. The focus of physiotherapy is upon patient-centred care. The core areas of the course are introductory and advanced musculoskeletal, neurological, and cardiopulmonary physiotherapy, applied to patients across the lifespan.

Master of Rehabilitation Counselling

This course prepares graduates for professional practice as rehabilitation counsellors. Graduates attain professional status as a rehabilitation counsellor and are qualified to provide specialist counselling, rehabilitation and case management services to people who have experienced injury, disability or social disadvantage. You will gain the information and skills you need to assist people to attain maximum participation in employment and community life through appropriate assessment, counselling, service provision and support.

Master of Speech Language Pathology

The Master of Speech Language Pathology prepares graduates for professional practice as speech pathologists. Speech pathologists work with children and adults who have communication and speech difficulties, including problems with speaking, comprehension, reading, writing, voice problems and stuttering. They also work with children and adults who have swallowing difficulties or need alternative ways to communicate. The curriculum for this master’s degree has been designed to enable students to learn in a way that resembles the clinical practice of speech pathology.

Research courses (Allied Health)

Doctor of Philosophy (Health Sciences)

The Doctor of Philosophy (Health Sciences) provides an opportunity for intensive research training across our broad priority research areas of cancer diagnosis and rehabilitation, communication and sciences disorders, disability and mental health, musculoskeletal health and physical activity, lifestyle, ageing and wellbeing. As a doctoral student, you will engage with a community of world-class research scholars to develop your expertise through seminar presentations and collaborative relationships with government, industry and international organisations. Over the 3–4 year period, you will gain advanced research and critical thinking skills that will see you publish work in journals and influence health policy that will culminate in the completion of a significant thesis of work.

Doctor of Applied Science – Research

This course allows you to conduct high-impact, multidisciplinary research that spans the broad areas of cancer diagnosis and rehabilitation, communication and sciences disorders, disability and mental health, musculoskeletal health and physical activity, lifestyle, ageing and wellbeing. You will work individually on your research project under the direction of a supervisor who is a leader in the allied health field. Across the 1–2 year research period, you will gain advanced research and critical thinking skills that will see you publish work in journals, influence health policy and expand your career prospects.

Dentistry

Graduate Diploma in Clinical Dentistry (Advanced Restorative)

The Advanced Restorative course will provide you with a high level of knowledge and advanced skills in the areas of advanced restorative dentistry, prosthodontics and oral implants. Building on the foundation of the graduate certificate, this graduate diploma provides more intensive theoretical and clinical work, which can then be followed by the Doctor of Clinical Dentistry (Prosthodontics) or a higher degree by research in this field.

Graduate Diploma in Clinical Dentistry (Surgical Dentistry)

This course provides the opportunity for dentists registered in Australia to develop skills and acquire knowledge essential for oral surgery through a comprehensive curriculum of theoretical and clinical studies. It has a foundation of evidence-based practice, will enable the provision of a range of oral surgery services including appropriate oral surgical management of medically compromised patients, and will include oral medicine and oral pathology components as well as implants. You will also complete a research project in the field of oral surgery under the supervision of an academic staff member.

Doctor of Clinical Dentistry (Oral Medicine)

The Oral Medicine program will develop your skills in the non-surgical management of the full range of oral diseases as well as for the care of medically compromised patients in hospital and non-hospital settings. You will learn about the diagnosis and non-surgical treatment of diseases of the oral mucosa and salivary glands, facial pain and oral manifestations of systemic diseases such as HIV. This course will give you an understanding of the oral healthcare needs of medically compromised patients, including transplant recipients, in close cooperation with the medical and surgical units of Westmead Hospital. Diagnostic oral and general pathology form integral parts of the course. You will also complete a research project in the field of oral medicine and oral pathology under the supervision of an academic staff member.

Doctor of Clinical Dentistry (Orthodontics)

The Orthodontics program provides the opportunity for you to develop skills and acquire knowledge essential for specialisation in orthodontics through a comprehensive curriculum of theoretical and clinical studies. Technique instruction is based on fixed appliance therapy, comprising Begg and Edgewise philosophies, including a self-ligating bracket technique. As a capstone to your studies, you will complete a research project in the field of orthodontics under the supervision of an academic staff member.

Doctor of Clinical Dentistry (Periodontics)

The Periodontics program trains qualified dentists who wish to specialise in periodontics. You will complete a research project in the field of periodontal surgery or practise under the supervision of an academic staff member, develop technical skills in periodontal implants and clinical periodontics, and acquire a comprehensive understanding of the field of periodontology.
### Tuition fees are subject to annual increases each year. For further information, see page 95.

Fees are listed for the total credit points required for course completion.

---

**Doctor of Clinical Dentistry (Prosthodontics)**

The Prosthodontics program trains qualified dentists who wish to specialise in prosthodontics. The course will develop your clinical skills in advanced restorative dental surgery and contemporary prosthodontics and you will acquire a comprehensive understanding of orofacial pain. You will also complete a research project in the field of prosthodontics or restorative dentistry under the supervision of an academic staff member.

**Doctor of Clinical Dentistry (Special Care Dentistry)**

The Special Care Dentistry program is aimed at qualified local and international dentists who wish to practise in fields of special care. Oral biology, oral medicine, oral pathology and internal and general medicine will form the basis of your foundation year in the course. You will then complete advanced studies in behaviour and dental management, restorative dentistry, and growth, development and ageing. You will also complete a research project in the field of special care dentistry under the supervision of an academic staff member.

**Doctor of Dental Medicine**

The Doctor of Dental Medicine is a graduate-entry program that qualifies you to practise as a dentist. It is presented across four years and uses postgraduate methods of delivery and assessment. Four units of study, each composed of a number of cognate disciplines, have an initial theoretical and practical component, in association with simulated learning, progressing to eventually become exclusively patient-based clinical education in Year 4.

**Research courses (Dentistry)**

**Doctor of Philosophy (Dentistry)**

At the Faculty of Dentistry, our aim is to put the mouth into health. Our research strengths include microbial pathogenicity, biomaterials, implant technology, tissue regeneration and minimal intervention therapies for management of caries. This course is aimed at those who intend to pursue academic careers in oral health or a related field and can be undertaken in a range of dental specialisations. The PhD culminates in a thesis, which is the examinable assessment requirement for the degree.

**Master of Philosophy (Dentistry)**

At the Faculty of Dentistry, our aim is to put the mouth into health. Our research strengths include microbial pathogenicity, biomaterials, implant technology, tissue regeneration and minimal intervention therapies for management of caries. If you aim to pursue a research career in oral health or a related field, this course is for you. It may also be used as a foundation to commencing a Doctor of Philosophy (PhD). The examinable components of the MPhil degree are a thesis and successful completion of a unit of study in research methods.

**Medicine**

**Doctor of Clinical Surgery**

The Doctor of Clinical Surgery prepares you to become a surgical leader with attitudes and skills that meet the challenges of modern specialist surgical practice. This degree will also enhance your research skills for an academic career, combining surgical studies and training with research.

**Doctor of Medicine**

The Doctor of Medicine (MD) is a four-year professional postgraduate medical degree offering you clinical experience at leading hospitals, research opportunities at world-renowned institutes, and established elective placements throughout Europe, Africa, North America and Asia. Our course will provide you with current best practice in medical education, high teacher–student ratios and extensive scholarship support. You will graduate as a medical practitioner who is responsive to the health needs of individuals, families and communities and committed to improving the healthcare system at all levels. Our students come from a range of backgrounds and academic disciplines. The MD program comprises four broad themes that run through all four years of the course: Basic and Clinical Sciences; Patient and Doctor; Population Medicine; and Personal and Professional Development.

**Master of Bioethics**

Bioethics is concerned with ethical questions that arise in the contexts of biological and health sciences. Social concern about such issues has grown with the advancement of biomedical and reproductive health technologies, genetic engineering, cloning and stem cell research. The study of bioethics has traditionally addressed issues such as abortion, euthanasia, the relationships between healthcare providers and patients, research involving humans and animals and justice in the distribution of health resources. Emerging ethical issues are related to risk and health, nanotechnology and global public health.

**Master of Brain and Mind Sciences**

The Master of Brain and Mind Sciences provides focused education and training for the next generation of science, medical, nursing, psychiatry and psychology workforces, preparing them to meet the needs of those suffering from disorders of the brain and mind. The course will promote interdisciplinary research, encouraging investigation into disease in areas of the brain and mind. The course also draws on the strengths of the Brain and Mind Centre to assist you in your professional and clinical skill development.

**Master of Global Health**

We have reimagined our public health degrees to prepare you for a future full of possibilities. In 2019 our Master of International Public Health will be renamed the Master of Global Health, the only degree of its kind in Australia. Our new, premium degree will increase in duration from 12 to 18 months (from 48 credit points to 72 credit points), providing you with the time to specialise in your chosen field, and the opportunity to undertake a diverse range of international and professional placements.
The inter-professional and multidisciplinary structure encourages students to develop effective collaborative approaches to employment in a variety of healthcare settings. This newly enhanced program enables students to address the challenges of sexual and reproductive health through a wide range of core and elective units, with an option to choose one of four distinct pathways (HIV and STIs, Psychosexual Therapy, Reproductive Health and Fertility, and Public Health).

### Master of Medicine (Sexual and Reproductive Health)
- Duration: 1 year
- Tuition Fee: $46,500

### Master of Science in Medicine (Sexual and Reproductive Health)
- Duration: 1 year
- Tuition Fee: $46,500

### Master of Health Policy
- The Master of Health Policy program at the School of Public Health provides you with a comprehensive and practical understanding of health systems and policymaking processes. It offers a critical perspective on how health systems operate and the forces that shape the health policy environment. Graduates will have a comprehensive and practical understanding of policymaking, including economic evaluation; health financing and budgets; power, politics and agenda setting and the critical use of evidence. This course is designed for health practitioners who are interested in learning more about how health priorities are set and wish to gain a broader understanding of health systems. It is also for those already engaged in or planning careers in public policy who wish to extend their knowledge of health policy and policymaking.

Research courses (Medicine)

Doctor of Philosophy (Medicine)

Master of Public Health

Master of Medicine (Sexual and Reproductive Health) and Master of Philosophy

Master of Science in Medicine (Sexual and Reproductive Health) and Master of Philosophy

Master of Surgery - Research

Nursing

Master of Advanced Nursing Practice

Master of Cancer and Haematology Nursing

Master of Emergency Nursing

Master of Intensive Care Nursing

---

Tuition fees are subject to annual increases each year. For further information, see page 95.

* Fees are listed for the total credit points required for course completion.
Mental Health Nursing is designed for registered nurses working in mental health settings. This course focuses on current clinical issues in mental health, as well as therapeutic skills and role development. You will learn how to deal with a range of conditions across the variety of healthcare environments in which clients present with mental illnesses, mental disorders and psychological distress that require specialist assessment and treatment.

Master of Nursing

This is an intellectually stimulating and challenging nursing program for students who already hold a degree in any field and want to become a registered nurse in Australia. The course attracts students from diverse academic disciplines and promotes critical thinking and engaged debate in a vibrant learning environment. You will develop clinical practice knowledge and skills, explore healthcare systems and develop an understanding of your profession within local and global contexts. You will investigate workforce and professional practice issues, contemporary health problems, ethical issues in health care, community expectations for healthcare quality and safety, and many more interesting topics.

Master of Primary Health Care Nursing

Primary Health Care Nursing is tailored specifically for registered nurses working or intending to work in primary health care. It will assist you to develop the specialist knowledge and skills required to practise effectively within complex primary healthcare settings. The program focuses on the health needs of individuals, families and communities and providing accessible and equitable healthcare. You will explore the foundational principles and practices of primary healthcare. You will learn about chronic disease prevention and management, including relevant evidence-based decision-making processes and practices, concepts of self-management and coordinated, quality care.

Research courses (Nursing)

Doctor of Philosophy (Nursing)  
This course provides an opportunity for intensive research training across our priority research areas, including cancer; chronic disease and ageing; infection and immunity; injury and acute illness; and mental health. You will engage with world-class researchers to develop your expertise and gain advanced research and critical thinking skills that will see you publish work in journals, improve patient experiences and influence health policy.

Master of Philosophy (Nursing)  
This course provides an opportunity for research training across our priority research areas including: cancer; chronic disease and ageing; infection and immunity; injury and acute illness; and mental health. You will engage with world-class researchers to develop your expertise and gain advanced research and critical thinking skills that you can take into your professional life, or advance into a Doctor of Philosophy (Nursing).

Pharmacy

Master of Pharmacy  
The Master of Pharmacy offers an entry pathway to fast-track your career into the pharmacy profession. This course is an accredited and innovative two-year graduate-entry coursework program designed to prepare you for all aspects of the pharmacy profession, including leadership in innovative and evidence-based practice.

Research courses (Pharmacy)

Doctor of Philosophy (Pharmacy)  
Research conducted at the Faculty of Pharmacy covers a broad spectrum of pharmaceutical and clinical sciences around five key themes: cancer; cardiovascular and diabetes; health services and patient safety; mental health; and respiratory diseases. This course provides an opportunity for intensive research training with the University of Sydney’s internationally renowned Faculty of Pharmacy. Students will undertake research culminating in the submission of an 80,000-word thesis.

Master of Philosophy (Pharmacy)  
This course may be used as a foundation to the Doctor of Philosophy (Pharmacy) and is awarded on the successful examination of a thesis based on original research. Research conducted at the Faculty of Pharmacy covers a broad spectrum of pharmaceutical and clinical sciences around five key themes: cancer; cardiovascular and diabetes; health services and patient safety; mental health; and respiratory diseases.

Music

Master of Music Studies (Conducting)  
The Master of Music Studies (Conducting) at the Sydney Conservatorium of Music is a four-semester postgraduate coursework degree. It trains conductors to a level that allows them to seek professional placements with music ensembles. The degree program combines detailed study of conducting techniques, in-house experience of working with ensembles and conductors, and supporting academic units of study. The program of study culminates in a fourth semester examined performance – a concert of 30 to 45 minutes to be conducted by the candidate.

Master of Music Studies (Opera Performance)  
The Vocal and Opera Studies Unit reflects the Sydney Conservatorium of Music’s strong commitment to singing, an environment in which our students have excelled (opera singer Dame Joan Sutherland is the most famous example). The Master of Music Studies (Opera Performance) focuses on text-related matters in various kinds of vocal music, with the aim of fostering your skills as an interpreter in all the major operatic languages.

Master of Music Studies (Performance)  
The Master of Music Studies (Performance) will extend your technical mastery of your chosen instrument or voice, while deepening your knowledge of repertoire and performance practice. This master’s course may be taken in any of the Conservatorium’s instrumental areas, including orchestral and solo instruments, early music and jazz.
### Tuition fees are subject to annual increases each year. For further information, see page 95.

Take part in a unique opportunity to study science, environment and law in a single degree. If you’re a science graduate looking to learn about environmental policy, the Master of Environmental Science and Law integrates diverse disciplines into an outstanding program. As a graduate of this program you can expect to leave with a practical and theoretical background in aspects of environmental science and environmental law, which opens doors to careers in environmental management and policy development.

**Master of Marine Science and Management**

In this degree, you will be taught by world-renowned experts in some of the best coastal locations in the country. In-depth study in marine science and management subjects, plus lots of hands-on experience in incredible aquatic field sites, will give you the skills, knowledge and confidence to work in the multidisciplinary field of marine science. This degree offers a unique opportunity to learn about the science and management of marine environments.

**Master of Mathematics Sciences**

Becomes a leader in the field of mathematics and statistics. This degree is designed to give you deep training in mathematical sciences and will also assist you if you wish to transition from undergraduate studies to research in mathematical sciences in the future. The focus can be on mathematics, statistics, financial mathematics and statistics, or data science.

**Master of Medical Physics**

The Master of Medical Physics will set you on the path to becoming a working medical physicist in Australia. This entry-level qualification will give you the technical expertise to work within a clinical setting across areas of medicine including cancer treatment, diagnostic imaging, physiological monitoring and medical electronics. The program provides specialist postgraduate training in the application of radiation physics, dosimetry, imaging and radiobiology to cancer diagnosis and treatment, and to radiation detection and protection.

**Master of Nutrition and Dietetics**

For science graduates, the Master of Nutrition and Dietetics will launch you straight into a career as an accredited dietitian. With practical training in human nutrition plus access to eminent dietitians, this highly regarded postgraduate course will bring you to the forefront of dietetic and nutrition research and practice. Fully accredited by the Dietitians Association of Australia, this degree is a pathway into professional practice as a dietitian and nutritionist.

**Master of Science in Coaching Psychology**

Learn to help people improve their performance with a Master of Science in Coaching Psychology. Providing a solid grounding in theory and practice, this unique course will give you the skills to enhance productivity and quality of life of individuals, organisations and the broader community.

**Master of Sustainability**

By tackling key global issues, the Master of Sustainability will equip you to further your career in diverse areas from environmental science to finance, law to urban planning, and sustainable building design to public health. You’ll learn about energy conservation, population health, food security, sustainability policy, and sustainability analysis tools.

**Research courses (Science, agriculture, environment and veterinary science)**

**Doctor of Philosophy (Science)**

The Doctor of Philosophy (PhD) in the Faculty of Science will allow you to pursue research from one of the fields in which the faculty has expertise. Candidates will complete the degree in three to four years. During that period they will undertake research, culminating in the submission of an 80,000-word thesis. In the Faculty of Science, you can undertake research in the following areas: agriculture, chemistry, geosciences, history and philosophy of science, life and environmental sciences, mathematics and statistics, physics, psychology and veterinary science.

**Master of Philosophy (Science)**

The Master of Philosophy (Science) opens the door to the world of scientific research. MPhil (Science) students become independent researchers of exceptional quality. They learn to manage extensive projects, use advanced scientific tools and write reports suitable for publication. Their skills enable them to go on to prominent careers, not just in research, but also in policy, industry, management, government, business and international development. This degree enables research across the same disciplines as the PhD (Science).

**Master of Veterinary Clinical Studies**

The Master of Veterinary Clinical Studies provides clinical veterinarians with the opportunity to conduct advanced clinical research at the University of Sydney, which is ranked first in Australia and 11th in the world for veterinary science (QS World University Rankings by Subject, 2018). From research in preclinical, paraclinical and clinical disciplines, to animal health, animal husbandry, nutrition, anatomy and animal genetics, the degree will give you the opportunity to develop a research project that has global significance.
These courses are not available for full-time study in Australia on a student visa. International students offshore or in Australia who are not on a student visa, depending on their visa type, may be eligible to undertake these courses.

*** Tuition fees are subject to annual increases each year. For further information, see page 95.

## Fees are listed for the total credit points required for course completion.
**Course name**

**Medicine and health**

**Master of Medical Imaging Science**
- Graduate certificate available
- Graduate diploma available
- IELTS Academic 6.5 (6.0)
- Commencing February or August
- Duration 1.5 years in full time (46,500)

This newly designed program will help you develop research skills and knowledge in the field of medical radiation sciences, including the areas of computed tomography, magnetic resonance imaging, hybrid imaging, breast imaging and radiographic image interpretation and research. The rapid evolution of medical imaging technology calls for expert researchers to develop optimised imaging techniques and advance diagnostic efficacy. Professionals in this field need high-level technical expertise and communication skills to provide optimal patient care.

**Master of Biostatistics**
- IELTS Academic 6.5 (6.0)
- Commencing February or August
- Duration Part time 46,500

Biostatistics can be used to show the most effective treatment in the spread of disease, or determine risk factors in genetic inheritance and mutation. The Master of Biostatistics covers areas such as the design of randomised controlled trials, categorical data and generalised linear models, survival analysis, and longitudinal and correlated data analysis. Our biostatistics programs are accredited with the Statistical Society of Australia.

**Master of Clinical Trials Research**
- IELTS Academic 7.0 (7.0)
- Commencing February
- Duration Part time 46,500

This distinctive course, targeted at medical doctors and allied health professionals, will allow you to acquire the expertise needed to design, develop, lead and conduct clinical trials. The course is led by the NHMRC Clinical Trials Centre (CTC) – Australia’s premier academic clinical trials research organisation – and is specifically focussed on clinical trials design and research methodology. The course is offered via distance learning. As a result of participation, you will have a solid understanding of clinical trials methodologies underpinning the design of good quality studies, as well as the knowledge to lead and/ or design, conduct and appropriately interpret the results of single and multi-centre clinical trials.

**Master of International Ophthalmology**
- IELTS Academic 6.5 (6.0)
- Commencing February or August
- Duration 1 year 46,500

This degree will provide you with the skills to practise ophthalmology at the highest possible standard with an emphasis on the specific diseases and pathologies within developing countries. Our ophthalmology programs have been developed and are taught by the Save Sight Institute at the Sydney Eye Hospital. They have extensive experience in providing the best quality ophthalmic care in developed and developing countries.

**Master of Medicine (Cataract and Refractive Surgery)**
- IELTS Academic 6.5 (6.0)
- Commencing February or August
- Duration 1 year 46,500

Refractive surgery is an ever-expanding area within the field of ophthalmology that encompasses laser and non-laser vision correction. Such surgery has traditionally been performed by surgeons in large private clinics, but in recent years has become accepted as part of mainstream ophthalmic care. Laser eye surgery is now the most frequently performed eye operation in Australia. Upon completion of this course you will be equipped with knowledge of cataract and refractive surgery theory and practice.

**Master of Medicine (Critical Care Medicine)**
- IELTS Academic 7.0 (6.5)
- Commencing February or August
- Duration 1 year 46,500

This innovative program has been designed by critical care clinicians for doctors interested in emergency medicine, anaesthetics and intensive care medicine. It is the first such course to be offered in Australasia. A broad range of subjects relevant to the practice of critical care are available and include the basic sciences (in preparation for college examinations) retrieval medicine, pain medicine, clinical neurophysiology and clinical reasoning and communication.

**Master of Medicine (Clinical Neurophysiology)**
- IELTS Academic 7.0 (6.5)
- Commencing February
- Duration 1 year 46,500

Clinical neurophysiology is a broad discipline, encompassing diagnostic services for patients presenting with neurological dysfunction, systemic diseases and critical illnesses, through to the provision of intraoperative monitoring of the nervous system during at-risk procedures. This course is designed for anaesthetists, neurologists, neurophysiology scientists and technologists, and trainees in these areas. It aims to provide structured educational programs in neurophysiological monitoring to complement experiential learning in the workplace. This is believed to be the only postgraduate coursework of its kind in Australia.

**Master of Medicine (Internal Medicine)**
- IELTS Academic 7.0 (6.5)
- Commencing February or August
- Duration Part time 46,500

The Internal Medicine program is the first of its kind in Australia. It is a collaboration between the University of Melbourne and the University of Sydney, which provides a unique depth of teaching and clinical experience. While the course is focused on doctors undertaking training with the Royal Australasian College of Physicians, it offers a strong background in internal medicine to trainees and established clinicians in emergency medicine, intensive care medicine and general practice who want to develop their knowledge and skills in adult internal medicine.
Tuition fees are subject to annual increases each year. For further information, see page 95.

Fees are listed for the total credit points required for course completion.

---

**Master of Science in Medicine (Metabolic Health)**
- 7.0 (6.5) Feb/Aug Part time
- 46,500

There is a global epidemic of diabetes and obesity and clinicians need to understand these diseases and be equipped to manage them. Our program is developed and delivered by international leaders in the field of diabetes and metabolic health. It provides students with knowledge and skills to manage diabetes, obesity and associated cardiovascular complications in the general population as well as particular groups, such as pregnant women. This course is suitable for medical practitioners working in primary care, emergency medicine, paediatrics and those planning to train in endocrinology and nurses, dietitians, pharmacists and other health professionals with an interest in the field.

**Master of Medicine (Paediatric Medicine)**
- 7.0 (6.5) Feb/Aug Part time
- 46,500

The course provides you with the latest practical and theoretical knowledge of paediatric medicine. Practical topics taught in this course are delivered in a case-based interactive online format by expert clinicians. The course comprises units of study focusing on recent advances and controversial or novel topics. With its unique, flexible educational model, the Master of Medicine (Paediatric Medicine) affords busy clinicians the opportunity to extend and update their knowledge in a number of specialist areas.

**Master of Science in Medicine (Ophthalmic Science)**
- 6.5 (6.0) Feb/Aug Part time
- 46,500

Ophthalmic science aims to prevent blindness, promote eye health and rehabilitate those with a visual disability. The program includes study in ocular anatomy, physiology, optics, genetics, pathology and practical ophthalmic science. You will gain skills in the practical applications of ophthalmic equipment, familiarity with anatomical specimens, projections, radiographs and electron micrographs, and the ability to apply psychometric testing to obtain reliable and repeatable data.

**Master of Science in Medicine (Pharmaceutical and Medical Device Development)**
- 7.0 (6.5) Feb/Aug Part time
- 46,500

The Pharmaceutical and Medical Device Development program has been developed to meet the growing need for expertise in modern drug development practices and provide training in state-of-the-art techniques, approaches and requirements for the registration of medical products. The program is tailored to professionals working in the pharmaceutical and bio-pharmaceutical industry, regulatory affairs, drug product evaluation, registration and therapeutic marketing sectors. This program is designed to introduce students to modern approaches to drug and device design and development, providing an up-to-date set of skills essential for the current industry environment.

**Master of Medicine (Sleep Medicine)**
- 7.0 (6.5) Feb/Aug Part time
- 46,500

The Sleep Medicine program is designed for professionals already working in the area of sleep medicine, or for graduates wishing to embark on a career in the field. The course offers you a unique opportunity to gain a deeper insight into this rapidly growing discipline of sleep medicine. This course is taught in an online/distance mode.

---

This course provides advanced education in pain management for graduates in medicine, dentistry, nursing, physiotherapy, psychology and other disciplines involved in pain management. The course is offered in the form of online distance education mode and you may complete the course full time or part time. The course is recognised for Continuing Medical Education/Maintenance of Professional Standards Program points by the Royal Australian College of General Practitioners, the Royal Australasian College of Physicians and the Australian and New Zealand College of Anaesthetists.

---

This distance/online course is open to pharmacy graduates as well as registered pharmacists currently working or looking to re-enter the workforce and who are looking to develop specialist knowledge in complementary medicines that are increasingly required in patient care, government and industry. You will learn how to identify reliable and reputable information resources that provide information on the efficacy and safety of complementary medicines commonly used in the management of health and disease. Furthermore you will learn how to translate this information into day-to-day practice that is evidence based.
HOW TO APPLY
As an international student, there are several important things you need to know about the application and enrolment process.

**Students younger than 18**

If you will be younger than 18 years when you start your course, you need to provide evidence to the Department of Home Affairs (DHA) that you have appropriate welfare and accommodation arrangements in place.

If you will not be accompanied by a parent, legal custodian or approved nominated relative and would like the University to arrange this for you, please visit our website for information.

− sydney.edu.au/under-18-student-visas

**Fast track your studies**

The University of Sydney recognises that students commence their studies with different levels, areas and forms of prior learning.

Depending on your previous studies or work experience, you may be eligible to apply for recognition of prior learning (RPL) or credit that will reduce the total credit points or time required to complete your course.

**Recognition of prior learning**

If you have completed previous study in a relevant discipline or have significant professional work experience in a related field, you may be eligible to reduce the length of time and unit requirements of your postgraduate course by 1-2 semesters.

Not all courses offer RPL and where it is offered the RPL reductions and eligibility requirements can vary.

**Credit for previous studies**

You may be eligible for credit at the undergraduate or postgraduate level if your previous studies are assessed as being directly equivalent to units of study at the University of Sydney.

Credit can reduce the overall number of credit points required to complete your course and can also reduce your course duration.

Credit is often assessed on a case-by-case basis but some faculties or courses have existing credit arrangements for some qualifications.

− sydney.edu.au/study/credit
**HOW TO APPLY**
UNDERGRADUATE AND POSTGRADUATE COURSEWORK

---

### Step 1
Choose your course

Visit sydney.edu.au/courses

### Step 2
Check the entry requirements

Admission to the University of Sydney is highly competitive. You need to meet specific academic and English language requirements before we can make an unconditional offer of admission to you. Some courses also have prerequisites and assumed knowledge. Learn more on pages 124 and 125.

For some courses, including medicine, dentistry, education, music, oral health, visual arts and veterinary medicine, there may be additional selection criteria, such as an interview, portfolio or performance. See pages 126 and 127.

Double degrees listed in this guide, such as those combined with the Doctor of Medicine or Doctor of Veterinary Medicine, have progression requirements that must be satisfied before students can be admitted to the second degree. Find out more about progression rules in the relevant faculty handbook at:

- sydney.edu.au/handbooks

Before you apply, check our website for important document submission guidelines that apply to all applications and supplementary forms that may be required for some courses.

- sydney.edu.au/study/how-to-apply

### Step 3
Submit your application

As an international student,* you should apply as early as possible to allow time for visa and travel arrangements.

All postgraduate and most undergraduate students apply direct to the University of Sydney, on our website:

- sydney.edu.au/courses

Application deadlines vary by course. Check the specific closing date for your course on our 'Find a course' website:

- sydney.edu.au/courses

For personalised advice, talk to our regional experts:

- sydney.edu.au/study/regional-contacts

You can also apply through a University-approved agent (representative).

There is a A$125 application processing fee.

- sydney.edu.au/study/overseas-agents

You should apply through the Universities Admissions Centre (UAC) if you are an undergraduate international student studying:

- a current Australian Year 12 qualification in or outside Australia; or
- a current International Baccalaureate (IB) diploma in Australia.

- www.uac.edu.au/international

If applying through UAC, there will be separate application fees.

If you are applying for a Sciences Po Dual Degree, you need to apply directly to the University of Sydney, even if you are applying through UAC for your other preferences.

---

* An international student is anyone who is not an Australian or New Zealand citizen (or dual citizen of Australia or New Zealand), permanent resident of Australia or holder of a permanent Australian humanitarian visa. If you are an Australian or New Zealand citizen, and you hold citizenship for another country, you are still assessed for admission as an Australian domestic student. All international students studying on-shore in Australia need to hold a visa that allows them to study here.
These steps will guide you in applying for a research master's or PhD degree at the University of Sydney.

You need to secure the support of a supervisor before you can proceed to the application stage. This is an important step, and we encourage you to think carefully about your research proposal and how it aligns with the work of your potential supervisor.

This is your opportunity to showcase your previous experience and the strength of your research project.

* An international student is anyone who is not an Australian or New Zealand citizen (or dual citizen of Australia or New Zealand), permanent resident of Australia or holder of a permanent Australian humanitarian visa. If you are an Australian or New Zealand citizen, and you hold citizenship for another country, you are still assessed for admission as an Australian domestic student. All international students studying onshore in Australia need to hold a visa that allows them to study here.
Step 1
Choose a degree
Start by reviewing the types of degrees we offer and check the eligibility requirements for the research degree you want to apply for. We encourage you to apply well ahead of time; even before completion of your current qualifying degree. In these circumstances, referee reports are essential as part of the application for admission.

− sydney.edu.au/study/pg-research

Step 2
Develop your research ideas
Carefully consider the subject of your research and find out if your interests align with any academic members of staff. At this point you need to develop an initial research proposal. While this initial proposal will probably not fully capture all the details of your final project, it is important to think seriously about it, clearly explaining your ideas about your research. It should not be a generic or vague proposal but should actively seek to show why your research is noteworthy and how it aligns with your proposed supervisor’s own work.

For guidelines on preparing your research proposal for admission, refer to our website:
− sydney.edu.au/study/pg-research

Step 3
Find a supervisor
You’ll need a staff member who has agreed to mentor you for the duration of your research. Use the Research Supervisor Connect database to search for current supervisors and projects.

− sydney.edu.au/research/opportunities

Use the ‘Contact research expert’ button to contact a potential supervisor. To support your enquiry, describe your academic background and research experience, the topic you’d like to research, and how your proposed research project aligns with their background. Include your resumé, academic transcript for all completed degrees and your initial research proposal (up to 2000 words).

For business, law and medicine, you will need to submit an Expression of Interest form directly to the school.

Step 4
Submitting your application
When you have secured a supervisor, you will discuss and refine the project together. As an international student*, once your research proposal is finalised, you can submit a direct online application to the University of Sydney through our website.

− sydney.edu.au/courses

You will need to include the following documents:
− academic transcripts
− English language proficiency, where required
− resumé
− referee reports
− finalised research proposal
− evidence of an academic staff member’s agreement to supervise you
− portfolio of work or audition may be required for certain courses (refer to sydney.edu.au/courses).

You can save and return to your application, upload documentation, and formally accept an offer if your application is successful.

Most faculties accept applications all year round and offer four research periods each year when you can start your study with us.

For key research dates, visit:
− sydney.edu.au/study/admissions-timeline

You can also engage the services of a University agent (representative) to help with your application.
− sydney.edu.au/study/overseas-agents
Admission to the University of Sydney is highly competitive. You need to meet specific academic and English language requirements before we make an unconditional offer of admission.

**Academic requirements**

The University accepts a range of Australian and overseas senior secondary (high school) qualifications and successful tertiary studies for admission into its courses. Learn more at:

− sydney.edu.au/study/entry-reqs

**Undergraduate**

Applicants are required to meet course-specific academic requirements through one of the following:

− an accepted senior secondary qualification
− at least one year of tertiary study in a bachelor’s degree at a recognised tertiary institution
− an equivalent tertiary qualification accepted by the University
− a recognised university foundation program, such as the University of Sydney Foundation Program.

Some courses have additional selection criteria such as interviews, auditions, portfolios and admission tests. For details, see pages 126 to 127.

Refer to the tables on pages 46 to 53 for a guide to entry scores for some of the senior secondary qualifications we accept. For a full list of accepted senior secondary qualifications, visit:

− sydney.edu.au/study/secondary-qualifications

If your qualification isn’t recognised, you can complete a university preparation course through the University of Sydney Foundation Program. See page 132 or visit:

− sydney.edu.au/foundationprogram

**Prerequisites**

Some courses have prerequisites.

**Mathematics course prerequisites**

If you are undertaking a senior secondary (or Year 12) qualification such as the New South Wales (NSW) Higher School Certificate (HSC) or International Baccalaureate (IB) in Australia, the mathematics prerequisite will apply for some courses. It will help students thrive in science, technology, engineering and mathematics-related degrees, commerce and economics degrees, and some medicine and health degrees. Refer to the A to Z course table on pages 60 to 84 for courses which have the mathematics prerequisite. For more information visit

− sydney.edu.au/study/maths

The following courses require three Band 5s in the HSC (or equivalent), including one in English (English Standard or English Advanced):

− Bachelor of Education (Health and Physical Education)
− Bachelor of Education (Primary)
− Bachelor of Music (Music Education).

Similar requirements will be applied to the IB and other Australian Year 12 qualifications. For other secondary qualifications you need to achieve the relevant minimum scores, and have good results in English (equivalent of English Standard or English Advanced). If you need to meet English proficiency requirements through a test such as IELTS, you will complete those requirements separately.

**Assumed knowledge and bridging courses**

Some courses expect you to have a certain level of knowledge in areas such as mathematics, physics, biology and chemistry.
Refer to the A to Z course table on pages 60 to 84 for course-specific assumed knowledge requirements. The subjects listed refer to the NSW HSC subjects, but equivalent subjects in other recognised senior secondary qualifications will be accepted (see also ‘Prerequisites’). For a guide to the standard required in other senior secondary qualifications, refer to the syllabus of HSC subjects:

- www.boardofstudies.nsw.edu.au/syllabus_hsc

If you have not studied these subjects in high school, we recommend you undertake appropriate bridging studies before you commence your course. The University offers some bridging courses to help get you up to speed.

- sydney.edu.au/ug-bridging

**Postgraduate coursework**

You need to meet the minimum eligibility criteria. This may include an acceptable academic qualification (usually the equivalent of an Australian bachelor’s degree) and compliance with any special entry requirements for your course. Refer to the ‘Additional selection criteria’ on pages 126 and 127. For specific requirements, visit:

- sydney.edu.au/courses

**Postgraduate research**

In general, to be eligible for admission to a postgraduate research degree, you need to demonstrate sufficient prior research experience and capability, such as:

- a bachelor’s degree with first or upper second class honours, or
- a master’s degree performed at a high academic standard, and which includes a substantial component of original research, or
- an equivalent qualification that demonstrates research experience, excellence and capability.

The above criteria are the minimum requirements for eligibility and do not guarantee admission. That remains at the discretion of the faculty. For specific requirements, see:

- sydney.edu.au/research-entry

You are encouraged to apply well ahead of time, and even before completion of your current qualifying degree. In these circumstances, referee reports are essential as part of the application for admission.

**English language requirements**

If English is not your first language, you need to demonstrate that your English language skills meet the minimum level required for your chosen course. You can do this by fulfilling one of the following:

1. For undergraduate study: a recognised senior secondary (high school) qualification conducted in English, English subjects in secondary school qualifications specified by the University or tertiary studies (at least one year of full-time university study) in English at a recognised institution.

2. For postgraduate study, show that you have successfully completed tertiary studies in which the language of the institution and of instruction, examination and assessment was English. You need to have completed these tertiary studies no more than five years before the date of application. For some courses, there may be additional requirements, including completion of studies within a shorter time frame.

3. Complete an accepted English proficiency test with results that meet the minimum entry requirements for your course. English language test scores are valid for two years.

Accepted tests are the:

- IELTS (International English Language Testing System)
- TOEFL iBT (Test of English as a Foreign Language: internet based)
- Pearson’s Test of English (PTE)
- Cambridge English Scale scores for Cambridge English: Advanced (CAE) and Cambridge English: Proficiency (CPE)

4. Complete an approved English course at the University of Sydney Centre for English Teaching (CET), with results that meet the minimum entry requirements for your course. For more information, see pages 130 to 131. You can also package your English language studies with your degree studies. Refer to

- sydney.edu.au/cet/packaging

**English language tests concordance table**

This table will help you to figure out the test score you need to achieve for a number of English language tests. Find out the IELTS score required for your course on pages 46 to 53. Then look up the relevant English test (overall and Individual scores) on the concordance table.

For more information about English language requirements and the concordance table, visit

- sydney.edu.au/study/english-reqs
For entry to some of our courses, we consider more than your academic qualifications. We may ask you to submit a portfolio or attend an interview or audition. The following courses have additional requirements.

### Arts and social sciences

**Sciences Po**

Bachelor of Arts and Bachelor of Economics Sciences Po Dual Degree applicants need to be recent school leavers – transfer applicants are not eligible to apply. In addition to meeting the academic requirements of an accepted Year 12 qualification (or equivalent), you need to submit an online application directly to the University, including a personal statement, curriculum vitae and school reports or transcripts from the past three years. Short-listed applicants will be invited to attend an interview in Sydney or Paris.

For more information about entry requirements, tuition fees and application processes, visit the relevant course page:

- sydney.edu.au/courses

**Visual arts**

For courses at Sydney College of the Arts, in addition to your academic qualifications you need to submit a portfolio of artwork by the relevant deadlines. We assess this on a broad range of criteria, including your creative thinking, cultural awareness, critical skills, communication skills, potential for skill development, and evidence of resolved ideas. For portfolio guidelines, visit:

- sydney.edu.au/sca

### Business

The following courses require a statement of motivation and a selection interview as part of the application for admission:

- Master of Management
- Master of Management (CEMS)
- Master of Business Administration (Leadership and Enterprise)

For more information visit

- sydney.edu.au/courses/business

### Education

Applicants to all undergraduate education degrees (except Early Childhood) and Bachelor of Music (Music Education) will be required to complete a brief personal statement. See also the academic requirements on page 124.

Master of Teaching and Master of Social Work (Qualifying) applicants are required to complete and upload a supplementary form and supporting documentation. For more information, visit the relevant course page:

- sydney.edu.au/courses

### Medicine and health

**Dentistry**

**Double Degree Dentistry**

We offer a small number of high school leavers who have achieved outstanding results a place in the Double Degree Dentistry pathway:

- Bachelor of Science/Doctor of Dental Medicine.

Entry into the Double Degree Dentistry degree is based on:

- very high results in your senior secondary qualification (expected to be the equivalent of an ATAR of 99.5 or higher)
- satisfactory performance in an assessment process comprised of a written assessment and a panel discussion.

Applicants are only eligible for admission to the first available course intake following receipt of final results. Find out more:

- sydney.edu.au/dentistry/dddp

There are separate requirements for progression to the Doctor of Dental Medicine component of the double degree. For details visit the course page.

- sydney.edu.au/courses

**Bachelor of Oral Health**

Entry to our Bachelor of Oral Health is based on your academic qualifications and performance in Multiple Mini-Interviews (MMI), a series of short interviews in which applicants move between interview stations. For more information and application timelines, visit

- sydney.edu.au/dentistry/oral-health
Doctor of Dental Medicine
This is a graduate-entry program, available to applicants who already have a bachelor’s degree. Make sure you start the application process at least 12 months before the course begins.

In addition to your bachelor’s degree, as an international applicant you need to submit results for the Graduate Australian Medical School Admissions Test (GAMSAT), the Medical College Admission Test (MCAT), US Dental Admissions Test (DAT) or the Canadian Dental Aptitude Test (CDAT). You also need to complete Multiple Mini-Interviews (MMIs) and a biology prerequisite.

– sydney.edu.au/dentistry/apply.php

Medicine
Double Degree Medicine
If you are finishing high school and expect to achieve outstanding results, you may be able to take the Doctor of Medicine (MD) via our Double Degree Medicine pathways:
– Bachelor of Arts/
  Doctor of Medicine
– Bachelor of Science/
  Doctor of Medicine.

Entry to the Double Degree Medicine degrees is based on:
– very high results in your senior secondary qualification (expected to be an ATAR of 99.95 or equivalent)
– satisfactory performance in an assessment process including a written assessment and a panel discussion.

Applicants are only eligible for admission to the first available course intake following receipt of final results. If you are a United States citizen, national or permanent resident, you are required to submit Medical College Admission Test (MCAT) results, regardless of whether you are also a citizen or permanent resident of a country other than the United States.

For more information, application timelines and entry requirements for the double degree, visit
– sydney.edu.au/medicine/ddmp

There are separate requirements for progression to the Doctor of Medicine component of the double degree. For details visit the course page.
– sydney.edu.au/courses

Doctor of Medicine
Most Doctor of Medicine students join us through our graduate entry scheme (available to applicants who already have a bachelor’s degree). If you plan to apply for graduate entry, you should start the application process at least 12 months in advance.

In addition to your bachelor’s degree, as an international applicant you need to submit results for either the Graduate Australian Medical School Admissions Test (GAMSAT) or the Medical College Admission Test (MCAT). You will also need to attend an interview.

– sydney.edu.au/medicine/study/
  md/admission

Music
To apply to study at the Sydney Conservatorium of Music, you will need to meet the academic requirements and complete an audition (or portfolio) and/or interview by the relevant deadlines. An audition fee applies and you may then be invited to an audition and/or interview.

For Bachelor of Music (Music Education) also refer to Education requirements.
– sydney.edu.au/music

Veterinary medicine
Bachelor of Veterinary Biology and Doctor of Veterinary Medicine combined degree
In addition to meeting academic requirements, you need to have relevant work experience in animal handling, which should be confirmed on the ‘Commitment to Veterinary Science’ form.

Separate requirements apply for progression to the Doctor of Veterinary Medicine component of the combined degree. See:
– sydney.edu.au/handbooks/
  science

Doctor of Veterinary Medicine
In addition to meeting academic requirements, you are expected to have successfully completed the prerequisite units, and confirm that you have gained a minimum of 28 days of relevant work experience and animal handling experience through the Doctor of Veterinary Medicine Admission Statement.

– sydney.edu.au/courses/
  doctor-of-veterinary-medicine
Tuition fees

Tuition fees vary between courses and the year in which you study. Look up your course in this guide (pages 60 to 117) to see the indicative tuition fees for Year 1, for study beginning in 2019.

Tuition fees in this guide are:
- quoted in Australian dollars
- based on a full-time student enrolment load of 48 credit points per year, or 1.0 Equivalent Full-Time Student Load (1.0 EFTSL) unless otherwise indicated; if your study load for the year is more or less than 1.0 EFTSL, your tuition fee will differ
- exclusive of the cost of textbooks, additional course costs, health insurance or living expenses such as food, accommodation and transport
- exclusive of the Student Services and Amenities fee (SSA fee), which was introduced by the Australian Government to fund services and support programs at universities.

Tuition fee for courses less than 1.0 EFTSL
For courses that are less than 48 credit points per year (1.0 EFTSL), such as a graduate certificate and some graduate diplomas, our course tables show the tuition fee based on the credit points required to complete the course, along with the credit points against the tuition fee.

Annual increase
Tuition fees are subject to an annual review (and indexation, when required) by the University and will increase for each year of your study, effective at the beginning of each calendar year.

Estimating the total tuition fee
For courses that are longer than one year, we are unable to provide you with a precise indication of tuition fees beyond your year 1 2019 tuition fee. Tuition fees increase annually, and your fees will be higher in future years. Tuition fees are published annually on our website. Please check your course here each year to confirm your tuition fee.

Additional costs
On top of tuition fees, you should budget for:
- additional course costs – some costs are substantial including but not limited to; faculty-specific materials and textbooks, tools, protective clothing, and equipment. For more information, visit: sydney.edu.au/additional-course-costs
- Student Services and Amenities fee (SSA fee) of up to A$298 (2018 rate indexed annually for the duration of your course) as an initiative to increase student support and services in Australian universities: sydney.edu.au/ssa-fee
- health insurance through the Overseas Student Health Cover scheme (OSHC). This is an Australian Government requirement for student visa holders: sydney.edu.au/study/oshc
- education expenses for students’ children: www.schools.nsw.edu.au/international
- living expenses such as food and rent: sydney.edu.au/study/living-costs

Payment methods
There are several ways you can pay the fees that apply to your study. A surcharge of 1.53 percent will apply for payments made by Visa or Mastercard. The surcharge is subject to review and may change. Find out more about payment methods, including refund procedures and policies: sydney.edu.au/study/paying-your-fees

As an international student, your budget will need to cover tuition fees, course-related expenses, and living costs including health insurance.
SCHOLARSHIPS AND STUDENT LOANS

A number of scholarships and student loans are specifically designed for international students.

Postgraduate research scholarships

Many students apply for a scholarship and a place in a research degree at the same time. Research Training Program International Scholarships, funded by the Australian Government, cover tuition fees, Overseas Student Health Cover, relocation costs and a living allowance to high-achieving international postgraduate research students.

The University provides additional international scholarships to allow high-achieving students to undertake research projects at the University. They may cover tuition fees and provide a living allowance for up to three years, with the possibility of an extension up to six months for PhD students.

- sydney.edu.au/scholarships/research

Australia Awards

Australian Government scholarships are open to students from countries that have a development partnership with Australia. They cover full tuition fees and a living allowance. The University of Sydney attracts Australia Awards scholars of the highest academic calibre.

- sydney.edu.au/study/australia-awards

University scholarships

The Vice-Chancellor’s International Scholarship provides up to A$40,000 and is awarded to international students based on academic merit.

More information

You can find detailed information about scholarships at:
- sydney.edu.au/scholarships/international

International student loans

As an international student, you may be eligible for student loans or benefits from your home government.

The University of Sydney administers United States Federal Student Aid (FAFSA) and funding from private United States lenders.

The University is also accredited to administer benefits from the United States Department of Veteran Affairs.

Canadian citizens may also claim tuition fee tax credits, and assistance is provided with loan administration. In addition, Lånekassen and Centrala Studiestödsnämnden (CSN) loan support is provided to Norwegian and Swedish citizens.

- sydney.edu.au/study/int-loans

Other options

We encourage you to look for funding from sources outside the University. For example, you may be able to apply for scholarships from companies or universities in your home country.

“I am really thankful for my scholarship as it has allowed me to attend many international conferences and conduct a three-month research visit to Nanyang Technological University in Singapore. On completing my candidature, I will miss the research environment and all the lovely Australian people and friends I’ve made.”

Dipesh Khanal
Doctor of Philosophy (Pharmacy)
Australia Awards Scholar
Home Country: Nepal
4-2-1 learning model
To help prepare you for an increasingly globalised and connected world, we have developed the 4:2:1 learning model, which involves:
- 4 hours in class – engage in an innovative learning experience and develop interactive language skills
- 2 hours personalised online learning – join the CET online learning community and achieve your study goals using our online modules
- 1 hour engagement – develop language skills outside the classroom. Join CET’s co-curricular activities and earn rewards on our student app, CET Connect.

Co-curricular activities
Inside and outside the classroom, you can transform your life through meaningful intercultural engagement and a great range of free co-curricular activities, including:
- CET Connect activities program
- student engagement
- weekly workshops
- CET Leaders Network
- monthly social calendar
- University of Sydney Union (USU) Access Card.*

Wellbeing
Student wellbeing is important and we offer comprehensive counselling and student welcome services – all free of charge and easy to access. These include:
- student welcome services
- interactive services map
- CET concierge support
- CET counselling services.

Study at university
If you want to study at university, we have four courses you can enrol in:

Direct Entry Course (DEC)
- CRICOS code 083314F
- 36 weeks: A$19,800
- 25 weeks: A$13,750
- 15 weeks: A$8250
- 10 weeks: A$5500
- 5 weeks: A$2750

Developed in consultation with University faculties, this enabling course is for students who have a conditional offer at the University of Sydney. It is a customised, quality-assured program targeting your English and academic skills needed for studying at an Australian university. For course start dates and English entry requirements for DEC, visit
- sydney.edu.au/cet/university-english-pathways
Graduate Academic Skills (GAS)  
- A$2550 CRICOS code 083314F  
This course is for students who have an unconditional offer for study at university. It is a high-level academic skills course that provides an introduction to the expectations and values of academic culture in an Australian university.

Intensive Test Preparation (ITP)  
- A$450 per week  
CRICOS code 085557D  
This is a test preparation program that enables you to reach your career, study or migration goals.

Communicate across cultures  
We offer two programs to help you improve your communication skills in English and gain confidence interacting in social and professional contexts globally:

Global English (GE)  
- A$450 per week  
CRICOS code 086060K  
GE is a new course that builds communication and employability skills, and helps you develop confidence for successful social and professional communication in Australia and abroad.

Customised Summer and Winter programs**  
These are tailor-made programs for groups of students who are looking to improve their language skills and intercultural awareness during the summer or winter holidays.

Develop professionally  
At CET we offer a range of professional development programs for English language teachers, university lecturers and professional staff.

English Language Teaching (ELT) Teacher Training**  
This course covers the latest theory and provides the practical experience needed to teach English.

English for Academic Purposes (EAP) Teacher Training**  
This is a professional development program that develops knowledge and skills in the specialised area of English for Academic Purposes.

Occupational English Test (OET) Preparation Course  
- A$900  
This is a training program for healthcare students and professionals who want to register and practise in an English-speaking country.

Learn online  
At CET we have created a series of online modules to help your language learning process as well as your critical thinking, communication and problem-solving skill development.

University Heroes App  
This free app allows you to test your English language levels while fighting global monsters.

Academic Skills for University Success Specialisation – Coursera membership fees apply  
This is a series of five Massive Open Online Courses (MOOCs) that provide an introduction to academic culture and prepare students for study at an English-medium university.

All of our courses are taught by highly qualified instructors who have extensive experience teaching English at universities, in Australia and internationally.

The fees listed above are for 2018 course commencement only, exclude administration and materials fees, and are subject to change. At the time of publication a precise indication of 2019 fees cannot be provided.

Please refer to the CET website for more information:  
- sydney.edu.au/cet

“During the GE course we learned the basics as well as the most complex structures in English to communicate in real life. I gained confidence to go outside the classroom and express myself in the Australian workforce.”

Evelyn Herrera Avina  
Global English  
Home country: Mexico  
#myCETstory

* Available for Direct Entry Course students.  
** Price on application (POA)
These preparation programs are alternative pathways that provide a strong academic foundation to progress to university study.

These enabling courses, which are conducted by Taylors College on behalf of Study Group Australia and the University of Sydney, provide a pathway to university study if you do not have the qualifications or grades to gain direct admission to a course. You will be eligible to apply for entry to our courses after completing the program.

What are the advantages?
These enabling courses ensure you achieve the strong academic foundation needed to enter the University of Sydney. Its advantages include:

- **Security**
  An offer of a place at the University if you successfully complete the program and meet the requirements of your chosen course. Some courses have a limited number of places available. Admission to these courses can only be guaranteed while places are still available and where the course is being offered.

- **Relevance**
  A program designed by the University which includes subjects that prepare you for your degree, and any other subjects of wider interest to you.

- **Quality assurance**
  The University oversees the setting and moderation of all examinations, so you are assured of the highest quality assessment.

- **Academic and personal support**
  Taylors College staff will assist you with settling into life in Australia, and support you to achieve your academic goals. Each intake has student advisers who are available to help you with academic or personal issues. There are also careers advisers, welfare counsellors, nurses and first aid officers on site to care for your health and wellbeing.

---

**The University of Sydney Foundation Program**

This program is available in intensive, standard or extended formats. This means you can complete your course in as little as 30 weeks or up to 59 weeks, depending on your ability. Intakes include:

- 59-week extended program (commencing in February and August): A$43,220
- 40-week standard program (commencing in February and July): A$33,150
- 30-week intensive program (commencing in April and October): A$33,150.

For more information, visit sydney.edu.au/foundationprogram

---

**High Achievers Preparation Program (HAPP)**

This is an 18-week enabling course designed for high achieving students who have excellent academic results and English skills. If you just missed out on direct entry to the University, this program will fast-track you into the first year of a bachelor’s degree at the University within five months. Our dedicated mentoring program will keep you on track for success.

The program is available only for certain international qualifications. For more information, visit taylorssydney.edu.au/programs/the-high-achievers-preparation-program

Intakes for this course include:

- 18-week HAPP program (commencing February and September): A$23,500

The fees listed above are for 2018 course commencement only and are subject to change. At the time of publication, a precise indication of the 2019 fees cannot be provided. For more information, visit www.taylorssydney.edu.au/how-to-apply/fees
Advanced coursework
Advanced coursework is undertaken in the fourth year of the Bachelor of Advanced Studies. It provides you with further experience and knowledge of your field to better prepare you for your career.

Assumed knowledge
For some courses or units of study, we assume you have reached a certain level of knowledge or have passed a relevant subject – this is called assumed knowledge. It often refers to a New South Wales Higher School Certificate (HSC) subject, but equivalent subjects in other recognised Year 12 qualifications will be accepted (see also ‘prerequisite’).

For a guide to the standard required in other Year 12 qualifications, refer to the syllabus of HSC subjects:

Australian Tertiary Admission Rank (ATAR)
The ATAR is a ranking between 0 and 99.95 that is allocated to all students who complete an Australian Year 12 (secondary school) qualification. It is a measure of the student’s overall academic achievement relative to other students who have undertaken an Australian Year 12 qualification. If you have completed another recognised secondary qualification your results will be translated to an ATAR equivalent to determine whether you have met the standard required for admission.

Combined degrees
When you complete degrees from two different faculties or schools side by side. For example, if you complete a combined Arts/Laws course, you will be awarded a Bachelor of Arts and a Bachelor of Laws. You can complete two degrees in less time than if you studied the two degrees separately.

Core unit
A compulsory unit of study that you need to complete to be awarded a particular degree.

Credit for previous study
The recognition of previous studies, either at the University of Sydney or another institution that can be granted as specific or non-specific credit towards your current course. Credit for previous study is also called ‘advanced standing’ or ‘transfer credit’.

Credit point
A credit point is the value that each unit of study (single subject) contributes towards the completion of your course. Most units of study are worth six credit points.

CRICOS
The Commonwealth Register of Institutions and Courses for Overseas Students (CRICOS) is the official register of all Australian education providers and the courses available to international students who wish to study here on an Australian student visa.
– cricos.education.gov.au

Dalyell Scholars
For high-achieving students with an ATAR (or equivalent) of 98+, Dalyell Scholars have access to a range of enrichment opportunities that will challenge you alongside your most promising and talented peers.

Degree
The name for the overall course that you are enrolled in (such as Bachelor of Arts).

Domestic student
You are considered a domestic student if you are:
– an Australian or New Zealand citizen (including dual citizens)
– a permanent resident of Australia
– a holder of a permanent Australian humanitarian visa.

Double degrees
When you complete two separate qualifications in succession. In these programs you commence in one degree then transfer to the second degree to complete the remainder of your studies (if you meet certain criteria). For example, you can undertake an undergraduate degree followed by a specific postgraduate program, such as the Bachelor of Science and Master of Nutrition and Dietetics.

Elective unit
An elective unit of study is one that can be taken outside of a major or minor. Electives allow you to explore interests outside of your primary field(s) of study.

Enabling course
A course of instruction that enables a person to undertake a course leading to a higher education award. An enabling course is designed to provide students with the skills needed for success in further study and to assist in the transition to tertiary education (eg, courses in study techniques or English language skills).

Enrolment
The process that secures your place in a course at the University. It includes accepting the University’s conditions of being a student and selecting units of study for the coming semester or year.
**Graduate-entry course**
A bachelor’s (undergraduate) degree that requires you to have completed another undergraduate degree first, as a prerequisite for entry.

**Honours**
Some degrees may be completed with honours. Honours differs depending on the degree, and usually involves:
- the completion of a large project and some advanced-level coursework
- additional work in the later years of the course, or
- high-level achievement over all years of the course.

**International student**
You are considered an international student if you are not an Australian or New Zealand citizen (or a dual citizen of Australia or New Zealand and another country), a permanent resident of Australia or a holder of a permanent Australian humanitarian visa. To enrol at university, international students need to hold an appropriate visa that allows them to study in Australia.

**Major**
A major is a defined sequence of units of study that deepens your experience in a field of study. Majors are recorded on your academic transcript; requirements for majors are outlined in your handbook.

**Minor**
A minor is a defined sequence of units of study that develops your expertise in a field of study. All liberal studies degrees (Bachelor of Arts, Bachelor of Science, Bachelor of Commerce) and the specialist degree Bachelor of Economics now require you to complete a minor or a second major.

**Open Learning Environment**
The Open Learning Environment provides subjects – online modules and workshop-supported courses – that you can complete at your own convenience and supplement with workshops and master classes.

**Postgraduate degree**
A postgraduate degree course leading to the award of a graduate certificate, graduate diploma, a master’s degree or doctorate. A postgraduate award usually requires previous completion of a relevant undergraduate (bachelor’s) degree or diploma.

**Prerequisite**
Course prerequisite is a subject you need to have completed at the required standard to be eligible for admission to a course.

**Program**
A combination of units of study that develops expertise across several disciplines or a professional or specialist field. It includes at least one recognised major in a field of study.

**Semester**
A semester is the academic teaching period; about 16 weeks in duration. There are two semesters each year and they usually run from late February to June, and August to November.

**Stream**
A stream is a version of a course that you apply for separately, but is linked to a common or parent course by components and rules. You need to complete a core program of study in addition to a set of units of study for that particular stream, which appears on your testamur with the award course name. For example, Bachelor of Arts/Bachelor of Advanced Studies (International and Global Studies). Find out more about course rules at sydney.edu.au/handbooks

**Undergraduate**
The term used to describe a course leading to a diploma or bachelor’s degree. It is also used to describe a student enrolled in such an award, eg, ‘undergraduate student’.

**Undergraduate degree**
An undergraduate degree is your first degree, usually after finishing high school. It can be a diploma or a bachelor’s degree.

**Unit of study**
This is an individual subject that you study as part of your degree. It is the smallest stand-alone component of a course that can be recorded on your academic transcript. For information about course rules and unit of study requirements, visit sydney.edu.au/handbooks

**Universities Admissions Centre (UAC)**
UAC receives and processes applications for admission to undergraduate courses at recognised universities in New South Wales (NSW) and the Australian Capital Territory (ACT).

Most domestic and certain international undergraduate students apply through UAC. For more information visit sydney.edu.au/study/how-to-apply
