Mr Professor Raymond Le Fevre

Former students of Professor Raymond Le Fevre gathered in the Great Hall on Saturday, 18 May 1985, to honour their former teacher who was awarded an Honorary Degree of Doctor of Science at a special graduation ceremony to mark the Centenary of the Science Faculty. His former students came from all over Australia and from Singapore.

Report

Professor Le Fevre was Professor of Chemistry from 1946 to 1970, and Head of the School from 1948 to 1970. He turned 80 on 31 March, just before the Science Centenary program began. Many of his former students, including some of those pictured above, attended the special birthday lunch held for him at The Royal Yacht Squadron, Kirribilli.

The Vice-Chancellor, Professor John Ward, said Professor Le Fevre could look back with pride on a career in which he produced more than 450 scientific papers and in which his influence and labours made the School of Chemistry ‘a place of high prestige and scientific influence’.
