

We invite you to join the

## Sydney Early- and Midcareer Academic Network (SEMCAN) Networking Event: STRATEGIC WRITING & PUBLISHING

Writing and publishing are central activities in academia. How you write and where you publish influence the impact your research has in your discipline and beyond. For their first event of the year, the Sydney Early- and Midcareer Academic Network (SEMCAN) presents a panel discussion with speakers from diverse disciplinary and publishing backgrounds to address making your publication and writing strategies count. Academic and science communication writers, book series and journal editors and writers will offer hints, tips and suggestions on how to strategically approach your writing and publishing opportunities. Come along, ask your questions and meet EMCR colleagues from across the university. We look forward to seeing you there.

session		presenters and panellists
