TEACHING @ SYDNEY

November 2012

Register now: Technology-mediated course design

Would you like to learn more about how you can use technology in the design of your unit of study or degree program?

In one of the sessions in the [Sydney Teaching Colloquium](#) this year, some participants sought further clarification on current working examples and principles of technology-mediated program design at the University.

A workshop will be held in November for those interested. Facilitators will be Jo Lander, Meg Vost, Dorian Peters and Rob Ellis.

If you:

- Haven't gone down the path of thinking about technology at the program level (or unit of study level) and you want to get an idea of what's happening;
- Want to learn from the experiences of others in their faculties;
- Want to contribute to some shared principles for how to go about this; and/or
- Want to understand how the University is pursuing a vision of integrating physical and virtual learning and teaching space ...

then please register with [Melanie Young](#). **Please RSVP by Monday 12 November 2012.**
