Publications for Gianluca Ranzi

2019

2018

Ranzi, G., Ferrarotti, A., Piccardo, G. (2018). Overview of the dynamic approach for the full and partial interaction analysis within the Generalised Beam Theory (GBT). *Ninth International Conference on Advances in Steel Structures (ICASS2018)*, Hong Kong, China: Hong Kong Institute of Steel Construction.

2018), Hong Kong, China: Hong Kong Polytechnic University.

2017

2016

2015

Chen, L., Li, G., Jiang, S., Wang, W., Ranzi, G. (2015). Improvements of fire design specifications for composite...

**2014**

2013

Castel, A., Gilbert, R., Ranzi, G. (2013). Overall stiffness reduction of cracked reinforced concrete beams due to long term effects. CONCREEP-9@MIT on Creep, Shrinkage, and Durability Mechanics, Reston: American Society of Civil Engineers (ASCE).

2012

Ranzi, G., Al-Deen, S., Uy, B. (2012). An experimental study on the service and ultimate behaviour of post-tensioned composite slabs. 18th International Association for Bridge and Structural Engineering (IABSE) Congress, Seoul: 18th IABSE Congress.

Ranzi, G., Leoni, G., Zandonini, R. (2012). Long-Term Behaviour of Composite Steel-Concrete Structures: An Overview of the State of the Art. 7th International Conference on Advances in Steel Structures (ICASS 2012), Nanjing: Southeast University Press.

Al-Deen, S., Ranzi, G., Vrecij, Z. (2012). Long-term experiments on composite beams and connections. Magazine of

**2011**

shear deformability of composite beams on their long-term and ultimate behaviour. The 2011 International Conference on Advances in Structural Engineering and Mechanics (ASEM '11).

2010

2009

Gara, F., Ranzi, G., Leoni, G. (2009). Analysis of the shear-lag effect in steel-concrete cable stayed bridges by means of deck finite elements. Sixth International Conference on Advances in Steel Structures, Hong Kong: Hong Kong Institute of Steel Construction.

Gara, F., Ranzi, G., Leoni, G. (2009). Analytical design equations for the calculation of the effective width for the analysis of composite steel-concrete bridge decks. The 5th International Symposium on Steel Structures ISSS 09, Seoul,
Korea: Korean Society of Steel Construction.

Ranzi, G., Vrcelj, Z. (2009). Closed form solutions for the long-term analysis of composite steel-concrete members subjected to non-uniform shrinkage distributions. *Sixth International Conference on Advances in Steel Structures*, Hong Kong: Hong Kong Institute of Steel Construction.
