

The Personal Archives of Tannatt William Edgeworth DAVID (1858-1934)

Born in Wales, David studied at Magdalen College School, Oxford (1870-1876) and Oxford University from which he graduated as Bachelor of Arts in 1880. In 1881, David carried out geological research in Wales. In 1882, he accepted the position of Assistant Geological Surveyor to the NSW Government; he worked on the NSW Geological Survey, especially mapping and correlating the coalfields of NSW. In 1886, David and his assistant, GA Stonier, discovered the South Maitland coalfield in the Hunter River valley.

The University of Sydney Senate, at its meeting of 2 March 1891, appointed David to lecture on geology during Lent Term. He was appointed Professor of Geology and Physical Geography at the Senate meeting on 18 May 1891. This decision was opposed by the Committee in England appointed to select a Professor. On retiring in December 1924, David was appointed Emeritus Professor (Senate Minutes 22 Dec 1924).

In 1900, David was awarded fellowship of the Royal Society of London after organising successful expeditions to Funafuti, a coral atoll in the Pacific Ocean, then in the British colony of the Gilbert and Ellise Islands, now in Tuvalu. This followed the failure of an expedition organised by the Royal Society in 1896. The objective of the expeditions was to bore a column of coral to a depth of 600 feet. It was hoped that analysis of such a column would provide evidence to help support or refute Charles Darwin's theory on the origin of coral atolls.

Numerous works authored by David were published by scientific and daily presses. A major work, "Geological Map of the Commonwealth of Australia" was published in 1932.

Glaciation was of especial interest to David. He was a member of the Glacial Research Committee of the Australasian Association for the Advancement of Science (AAAS). In 1907-09, David took leave from the University to accompany the British Antarctic Expedition led by Ernest Shackleton. In the company of Douglas Mawson and Alistair Mackay, he was the first to reach the Magnetic South Pole.

After retiring from the University, David continued work on a treatise on the geology of Australia, a work he failed to complete. In the late 1920s, he became involved in a controversy on the fossil nature of samples of South Australian rock.

David was an accomplished fund-raiser. For example, he used his influence to obtain essential funds to enable Shackleton's expedition to Antarctica in 1907-09 to proceed. Subsequently, he gave public lectures to raise further funds for this expedition and funds for the Australasian Antarctic Expedition led by Douglas Mawson in 1911-14.

In 1885, David married Caroline Martha Mallett, then Principal of the NSW Government Department of Public Instruction's Hurlstone Training College for Women. In 1916, he served in battlefields in France and Belgium. Awards included FRS (1900), honorary DSc degrees from universities of Oxford (1911), Manchester, Wales, Cambridge, Sydney, Bigsby Medal (1899) and Wollaston Medal (1920) both

from the Geological Society of London, Clark Medal of AAAS, CMG (1910), and KBE (1920).

References used and not cited in the text: SU Archives P11; David's application for Chair at the University of Sydney dated 1891 in SU Archives: Biog 909; DF Branagan and TG Vallance, "Australian Dictionary of Biography".

P.011 DAVID Tannatt William Edgeworth

Series 1 British Antarctic Expedition 1907-09: Erebus/Magnetic Pole jourr

Date Range: 1908 - 1909?

Accessions: 1/24, 1/69

Quantity: 0.07

Item List: no

Series Description:

Annotated typescripts of the "Narrative of the Northern Party" (5cm), original handwritten folios (1.5 cm) comprising meteorological notes made on the northern journey to the Magnetic South Pole; the latter are dated 10 October to 27 November 1908.

Also manuscript describing the ascent of Mt Erebus; this includes records of barometric pressure readings dated 5th to 9th March 1908.

The British Antarctic Expedition of 1907-09 was described by Ernest Shackleton in "The Heart of the Antarctic" volume 1 page 5 as "entirely my own venture". It was funded by the governments of Britain (20,000 pounds sterling), Australia (6000 pounds sterling) and New Zealand (a ship), by the proceeds of public lectures and the sale of the book "The Heart of the Antarctic" describing the Expedition.

The Northern party comprised David, Douglas Mawson, and Alistair Mackay. The party left the Expedition's winter quarters at Cape Royds on the west coast of Ross Island on McMurdo Sound (latitude 77.5 degrees south) on 3rd October 1908 and walked north along the coast of South Victoria Land to Drygalski ice barrier (latitude approx 75.5 degrees south) and then north-west to latitude 72.25 degrees south and longitude 155 degrees 16 minutes, estimated by the party to be the location of the South Magnetic Pole. The party returned to their depot on Drygalski Glacier on 3 February 1909 where they boarded the ship "Nimrod" at nearby Relief Inlet. The Northern Party had trekked a distance of 1260 miles (over 1700 kilometres), dragging their sledges by hand. The objectives of the journey as specified by Shackleton were to carry out a geological survey of the coast of Victoria Land and to prospect for minerals of economic value in Dry Valley, to determine the position of the South Magnetic Pole and to journey to the pole if resources permitted, and to take possession of these lands for the British Empire by hoisting the British flag.

P.011 DAVID Tannatt William Edgeworth

Series 2 British Antarctic Expedition 1907-09 - miscellaneous scripts by D

Date Range: 1910? - 1910?

Accessions: 1/24, 1/69

Quantity: 0.07

Item List: no

Series Description:

Observations on geology - handwritten, mainly in ink, probably for joint papers with R E Priestly (quantity : 1 cm); also notes for addresses/lectures, a carbon copy of a handwritten list of photographs (28 pages), a four page handwritten script entitled "Retrospect" and other papers relating to this expedition.

It was impossible to differentiate script written for the Stockholm Conference* from script for other papers co-authored with R E Priestly. Hence, manuscript in David's hand has been arranged in this series; typescript which was probably used for the publication by W Heinemann, London 1914 entitled "British Antarctic Expedition 1907-09 - Reports on Scientific Investigations - Geology" is in series 3, and unidentified typescript in series 6.

*The Stockholm Conference refers to the International Geological Conference XIth Session held in Stockholm in 1910. David's paper, in collaboration with Priestly and Mawson, was read by Professor Sollas (refer to series 7: letter received by David dated 11 January 1911).

Regarding original order: it is assumed that David kept papers relating to Antarctica together. Some of the papers had been boxed by subject viz "Antarctica", "Funafuti", "Geology of Australia", "fossils", "War", "lecture notes", "maps and plans".

P.011 DAVID Tannatt William Edgeworth

Series 3 British Antarctic Expedition 1907-09: David/ Priestly collaboratio

Date Range: 1908? - 1911?

Accessions: 1/24, 1/69

Quantity: 0.22

Item List: no

Series Description:

Includes manuscripts and annotated typescripts ascribed to David and Raymond E Priestly.

The only dated script, January 1911, is an annotated copy of a typescript "Geological Notes of the British Antarctic Expedition 1907-09".

The papers are draft scripts for the publications by William Heinemann London entitled "British Antarctic Expedition 1907-9 - Reports on Scientific Investigations: Geology" published in 1914) and appendix II published in the book "Heart of the Antarctic" 1909.

Priestley was born in 1886. He was a final year student at Bristol University when appointed geologist to the Expedition. He was a member of the Western Party and undertook geological surveys in the western mountains.

Refer to series 7 and 32 for letters written by Priestly and series 9 for annotated photographs and other typescripts by Priestly.

Series 6 British Antarctic Expedition 1907-09 - miscellaneous records

Date Range: 1908 - 1909

Accessions: 1/24, 1/69

Quantity: 0.12

Item List: no

Series Description:

Includes typescripts authored by R Priestley entitled "Scientific Results of the Western Journey" and "Meteorological Notes Dec 1, 1908 to Jan 24, 1909", by E W Skeats entitled "Report on Some Limestones from the Antarctic" (also manuscript original), by Griffith Taylor dated 1910 and titled "Notes upon Archaeocyathinae".

Results of analyses of rock samples and table of measurements of latitude, longitude and magnetic declination made on the journey to the magnetic pole; the folios are annotated by David. Also lists of photographs and specimens and miscellaneous notes in David's handwriting possibly used for lectures given by David, and copies (7 photographic prints) of sketches made by David in 1908.

Typescript of extracts from a diary dating from 7 November 1908 to 28 February 1909 ascribed to Wild, copy of letter to Shackleton from King Edward and two documents registering Shackleton's copyright in articles about the Expedition published in the "Sydney Morning Herald" and the "Daily Telegraph".

Handwritten copy of meteorological report of the "Nimrod" dated May - June 1909 (designated item no. 1).

Copies of printed matter pertaining to the expedition, including articles describing the expedition written by David and published in the "Sydney Morning Herald" in March - April 1908.

An early copy of photograph taken at the celebration to mark David's return from the Expedition is located in Archives record group no. P8 (Liversidge collection).

Lawrence Hargrave's instructions on using the cellular kite are in series 28 item 5. These instructions were probably written to accompany the replica of Hargrave's cellular kite made for the Expedition; refer to guide to series 28.

P.011 DAVID Tannatt William Edgeworth

Series 7 British Antarctic Expedition 1907-09/ Australasian Antarctic Exp

Date Range: 1894 - 1934

Accessions: 1/24, 1/69

Quantity: 0.20

Item List: no

Series Description:

Comprises drafts and copies of letters authored by David between 1908 and 1914 (quantity: 1 cm) and letters received by David (date range: 1907-1934) pertaining to the British Antarctic Expedition 1907-09, the Australasian Antarctic Expedition 1911-14 and the British Australian and New Zealand Antarctic Research Expedition (BANZARE) 1929-1931. Correspondents include Douglas Mawson, Raymond Priestly, Orme Masson, J Davis. Refer to index to authors of letters in series 32 for other letters written by Mawson and Priestly. The 1894 material is a manuscript copy of a letter sent to Government Astronomer Russell.

One-third of the correspondence was received by David as a member of the Australian Committee of BANZARE; this comprises letters addressed to David from the Australian Government Department of External Affairs and copies of BANZARE records. It appears that David was not a founding member of the Committee. The purpose of BANZARE was hydrographic survey, annexation of land for the British Empire, and scientific study especially meteorological and oceanographic and investigation into faunal resources for the purpose of economic exploitation. By instruction of the Prime Minister, S Bruce, 12 September 1929 (ref 1), all written records, photographs and specimens of the expedition became the property of BANZARE.

A significant proportion of the correspondence pertains to the 1911-14 expedition led by Mawson. The objectives of this expedition were scientific. Because Mawson did not return to Australia in summer 1912, administration of the expedition at this time was carried out by David. David was also active in raising funds for the expedition. Other records pertaining to the Australasian Antarctic Expedition 1911-14 are located in the papers of foundation Professor of Biology at the University of Sydney W A Haswell: Archives P168 series 4.

Series 8 Antarctica - various expeditions - lecture notes /working papers m

Date Range: 1898 - 1933

Accessions: 1/24, 1/69

Quantity: 0.11

Item List: no

Series Description:

Most papers in the series are undated. The 1898 papers are a book of notes and diagrams compiled by David for a lecture on Antarctica; the title is "Notes on Antarctic Rocks Collected by Mr C E Borgrevnik"; the authors are listed as David, WF Smeeth and Schofield. Refer to series 9 for copies of newspaper articles on the Borgrevnik Expedition to Antarctica. Other dated papers relate to the Australasian Antarctic Expedition 1911-13, especially to David's efforts in raising funds for the Expedition.

There are notes written by David in his capacity as member of the Australian Committee of BANZARE 1929-1933. See also description for series 7.

Other papers include abstracts of the literature, and handwritten notes thought to be lecture notes; also miscellaneous typescripts which may have been drafts for scripts in series 1 and 2. Brochures relating to public lectures given by David on the expeditions to Antarctica are located in series 6 (British Antarctic Expedition) and series 9 (Australasian Antarctic Expedition).

P.011 DAVID Tannatt William Edgeworth

Series 9 Antarctica - various expeditions - photographs/ other records

Date Range: 1898 - 1933

Accessions: 1/24, 1/69, 995

Quantity: 0.11

Item List: no

Series Description:

The greatest number of photographs are prints annotated by RE Priestly; they depict the northern party of Scott's expedition in 1912-13. There are a number of unidentified prints; some depict the ship "Aurora" and Mawson's hut and other views thought to have been photographed during the Australasian Antarctic Expedition led by Mawson in 1911-14.

There is also an album of photographs of micro-organisms with annotations ascribed to David (designated item 1). The photographs, 42 gelatin prints approximately 6.5 cm x 6.5 cm are not dated; the magnifications are given. They depict microorganisms contained in a series of slides made from a specimen of limestone breccia collected by Frank Wild during the sledge journey of the Southern Party up the Beardmore Glacier during the British Antarctic Expedition 1907-1909. The specimen was collected from a lateral moraine located near 85 degrees south latitude. The typescripts were authored by RE Priestly, CE Tilley, and unidentified authors. One script is a copy of diary notes by an unidentified author for the period January-February 1911.

Most of the printed matter is in the form of press cuttings pertaining to the Australasian Antarctic Expedition 1911-14, Amundsen's expedition and Australian control of the Antarctic Territory in the early 1930s. There is also a set of postcards published by the Scottish Antarctic Expedition of 1904. Records of David's work for the Antarctic Committee of the Australasian Association for the Advancement of Science are in series 43.

Series 10 Funafuti (Tuvalu) Coral Boring Expeditions 1897-98 - original let

Date Range: 1897 - 1901

Accessions: 1/24

Quantity: 0.01

Item List: no

Series Description:

Letters in David's hand. Most letters are addressed to BG Corney, Resident Medical Officer in Fiji. Drafts of correspondence in David's hand are in series 11. How the letters came into custody of the Geology Department of Sydney University is not known. Series 12 contains letters addressed to Corney by persons other than David.

Funafuti is an island in the Pacific Ocean at 8 degrees 30 minutes south latitude and 179 degrees 13 minutes east longitude, now in Tuvalu and formerly part of Britain's colony, Gilbert and Ellice Islands. David organised the Second and Third Expeditions to Funafuti in 1897-98. The first expedition to Funafuti, in 1896, was organised by the British Association for the Advancement of Science and the Royal Society of London with the purpose of examining the structure of a coral atoll by analysing the contents of a column bored to a depth of at least 600 feet. Charles Darwin had proposed a hypothesis to explain the origin of coral atolls. This hypothesis was challenged. It was hoped that the expedition to Funafuti would clarify the situation.

The first expedition to Funafuti was a failure owing to the use of inappropriate machinery for drilling. The Royal Society of London then contacted David and Professor Anderson Stuart with the aim of having the British colony of New South Wales organise another expedition to Funafuti. Funds for the Second Expedition to Funafuti came initially from Miss Eadith Walker of "Yaralla" in Concord. They were supplemented by the NSW Government and other sources.

P.011 DAVID Tannatt William Edgeworth

Series 11 Funafuti coral boring expeditions, 1897-98.

Date Range: 1897 - 1900

Accessions: 1/24, 1337.

Quantity: 0.03

Item List: no

Series Description:

Material relating to the coral boring work carried out at Funafuti. Most of the correspondence consists of drafts of letters written by David to the Royal Society of London, the Royal Geographical Society, the New South Wales Government, and the Commander-in-Chief, Australia Station.

There is a manuscript entitled "geological Relation of the Ellice Group to the Fiji Group" and two untitled manuscripts - one report on the second expedition and one report on the third expedition. David's account of the second and third expeditions to Funafuti in 1897-98 was published by the Royal Society of London in 1904 in a volume titled "The Atoll of Funafuti. Borings into a Coral Reef and the Results".

Some archival estrays have also been added. These consisted of loose diary entries, accounts of boring, reports on dredging, the geology of the atoll, and some miscellaneous notes.

P.011 DAVID Tannatt William Edgeworth

Series 12 Funafuti Coral Boring Expeditions 1897-98 - field notebooks/ oth

Date Range: 1897 - 1898

Accessions: 1/24

Quantity: 0.10

Item List: no

Series Description:

There are 2 notebooks (items 2, 4) containing field notes documenting surveys undertaken in both the 1897 and 1898 expeditions. A large notebook (item 3), relating to the 1897 expedition, contains data headed "Section through Diamond Drill Bore at Funafuti". An exercise book (item 1) contains extracts from literature on coral reefs, observational and analytical data especially on lagoon dredgings compiled by David and others. The series includes a map in pencil (item 5), possibly drawn by David, and typescripts authored by G Halligan, A Finckh, G Sweet, and annotated by David; also photographs of 2 folios written by David, now in an especially fragile state. Most of the records are undated.

In 1904, the Royal Society of London published "The Atoll of Funafuti" which includes papers authored by David in collaboration with G Sweet entitled "The Geology of Funafuti", with Halligan and Finckh entitled "Report on Dredging at Funafuti", and two papers authored by Halligan entitled "Report of Lagoon Borings" and "Permanent Reference Marks on the Island of Funafuti".

Series 13 Funafuti Coral Boring Expeditions, 1896-98 - correspondence.

Date Range: 1891 - 1914

Accessions: 1/24,1337.

Quantity: 0.10

Item List: no

Series Description:

Many letters are originals, others transcripts. Includes letters and working papers addressed to David by A E Finckh, by New South Wales Government Hydrographer G Halligan, together with copies of 2 related letters written by David to Halligan in 1914, by G Sweet, the Leader of the second Expedition after the departure of David. Other correspondents include the NSW Government Chief Inspector of Mines and Superintendent of Diamond Drills, W H Slee, the Australian Museum Sydney, and Royal Society of London Coral Reef Committee members, T G Bonney, J W Judd, G J Hinde, J Sollas, W Wharton, and W. W. Watts. Also letters written by B G Corney to David, and correspondence between Corney and others. Also included are some archival estrays, which had been in the custody of at least two members of the Department of Geology.

Finckh was Leader of the Third Expedition to Funafuti. He also carried out biological observations. Finckh's report on the "Biology of the Reef-forming Organisms at Funafuti Atoll" was published in 1904 by the Royal Society as part of a work entitled "The Atoll of Funafuti". See index to authors of correspondence in series 32 for other letters written by Bonney, Sollas, Hinde, Judd and Halligan.

Series 20 Snowy Mts field trips 1905-07/other glaciation - maps/ working p

Date Range: 1905? - 1929?

Accessions: 1/23, 1/24

Quantity: 0.20

Item List: no

Series Description:

Field notebooks documenting David's visits to the Cooma, Kiandra, Tumut, Kosciusko region in December 1905 to February 1906 and to the Snowy River (Thredbo, Jindabyne) in June 1907 are arranged in series 25 (items 90.1, 90.2 and 90.3). David's maps include 2 outsize folios viz.: a map of Blue Lake drawn to scale and a published map annotated by David. Other records in this series pertaining to Kosciusko include numerical data, calculations and notes in David's handwriting and some typescript.

Other series containing records documenting David's excursions to Kosciusko are series 35 item 36 (photographs), series 39 items 2, 3 10 (records of student excursions) and series 52 (press cuttings). This series contains various scripts on glaciation attributed to David. These include manuscript and typescript pertaining to A P Coleman's book on Ice Ages, manuscript (ink) for a reply to a paper by Professor Schuchert, manuscript draft of a paper on the "Permian and Carboniferous Glaciations of Australia", abstracts from the literature (typescript / manuscript in David's hand).

Other scripts may have been written for lectures or for the "Geology of Australia". Related records are in series 40 :London University lecture notes, and series 32 (refer to subject index to correspondence in series 32). Records pertaining to David's work for the Glacial Research Committee of the Australasian Association for the Advancement of Science are arranged in series 43 and in item 82 of series 25.

P.011 DAVID Tannatt William Edgeworth

Series 21 Treatise on geology of Australia - working papers

Date Range: 1920 - 1934

Accessions: 1/24,1337.

Quantity: 0.40

Item List: no

Series Description:

Half the papers in the series are in handwriting ascribed to David. The other papers comprise typescript with annotations of various length ascribed to David and others. The material consists of documentation relating to David's proposed

"Geology of Australia", and was compiled by David over many years, especially after 1924. Some data was used in "Geological Map of Australia/ Explanatory Notes" published 1932; see series 22. Scripts, maps & photographs were sent to David by geologists in Australia & overseas. Scripts are arranged in series 28, maps in series 29, photographs in series 36; other related series: 30, 32.

The arrangement of the material is ascribed in part to W R Browne, a member of the Department of Geology. After David's death, Browne was commissioned to complete the "Geology of Australia"; and the book was published in 1950 by Edward Arnold & Co, after extensive modification, of text, which had become outdated with the passage of time. Extra large folios and manuscript ascribed to David have been itemised as follows:

Item 1 : 24 extra large documents ascribed in part or in toto to David, including a 14 folio draft manuscript for "Geology of Australia" and maps/plans with annotations by David.

Item 2 : Maps and geological sections (10 extra large folios) - ascribed in toto to David or annotated by David.

Item 3 : Tables, in handwriting ascribed to David or in typescript, some with annotations (0.5 cm of extra large documents).

Items 4-9 : Manuscripts in David's hand - appear to be drafts for his book, and other notes. The subjects of manuscripts in items 4-8 are listed on the outside of each item. Item 9 contains very fragile folios.

Items 10-21: annotated typescripts.

Item 22: Memoranda of Agreement between David and Edward Arnold Ltd, 1914-1926. These documents were archival estrays, and had been in the custody of W.R.Browne and T.G.Vallance.

P.011 DAVID Tannatt William Edgeworth

Series 22 Geological Map of Australia/ Explanatory Notes - letters received

Date Range: 1932 - 1933

Accessions: 1/24

Quantity: 0.02

Item List: no

Series Description:

Most letters were written to acknowledge David's gift of a copy of his publication "Geological Map of Australia" (see copy in series 26) published in 1932 by Edward Arnold and Company London together with "Explanatory Notes" published by CSIRO Sydney. There are also copies of published reviews of the publication and a signed review by E C Andrews. There are 2 related typescripts annotated by David and a typescript of "Explanatory Notes to accompsny new Geological Map of the Commonwealth".

Other correspondence is in series 32. Related working papers are in series 21.

Custody: University of Sydney

Series 23 Coalfields New South Wales - data/ working papers

Date Range: 1890? - 1928

Accessions: 1/24

Quantity: 0.20

Item List: no

Series Description:

The longest documents are geological sections from the Port of Newcastle to Moon Island situated at the ocean entrance to Lake Macquarie, length :4 metres (item 1), and from Wyong to Raymond Terrace, length : 2.3 metres (item 3). Both are ascribed to David.

Although of the all documents appear to be originals, about half are ascribed to persons other than David. Most documents pertain to the Newcastle region, some to Bulli and Sydney. Numerical data relates to bores in the Hunter River Valley. There is a detailed "calculation as to probable quantity of coal under the holding of the Sydney Harbour Collieries Co." (5 folios, item 6).

Items not mentioned above :

2. - section Redhead-Newcastle; borehole data;
4. - manuscripts/annotated typescripts partly ascribed to David;
5. - authored by persons other than David.

Related series include series 25 (field notebooks), 26 item 2 (a volume of "Geological maps and sections of the coal measures in the Hunter River District" by TWE David, 32 (correspondence), and 35 (photographs) especially item 1, and series 52 (press reports). It was decided to arrange these records in one series rather than leave them in the series of miscellaneous working papers and plans because of David's major contribution to the coal industry in NSW before his appointment to the University. As Assistant Geological Surveyor with the Government of NSW, he systematically mapped and correlated coalfields in the British colony.

P.011 DAVID Tannatt William Edgeworth

Series 24 Miscellaneous working papers/manuscripts

Date Range: 1905? - 1934

Accessions: 1/24

Quantity: 0.45

Item List: no

Series Description:

Few records in the series are dated. The majority of the papers are in handwriting ascribed to David.

Manuscripts for the "Geography of New South Wales" are included in this series, although only preface and introduction are in David's hand. Some typescripts bear no identification regarding their author. It is likely that a number of the records were used as lecture notes for students.

Other records in the series have been arranged in folders and itemised under the following subject headings:

1. Wegener Hypothesis.
- 2,3. Tectonics
4. Kerosene shale
5. Coal: Queensland/West Australia
- 6a. Thursday Island: photographs/map
- 6b. Southport Queensland: submarine volcanoes (1f)
7. Oil
- 8,9. Graphite/petroleum/ diamonds
10. Artesian
- 11, 12, 13. Extracts from the literature/notes taken at seminars
14. South Africa
- 15-17. Antiquity of man (refers to Australian Aborigines) 17. incl material by Grafton Elliot Smith
18. Talgai skull
19. Tasmania/South-Central Australia
20. Diatoms/rivers in NSW
21. Miscellaneous titled scripts 22. Miscellaneous
- 23-25. Geography of NSW
26. Broadsound Coal Prospecting Company - consultancy.
27. Notes on F W Whitehouse's Research Expeditions 1932-1934
28. Biographies of Mawson, Liversidge, Pollock, W W Ingram
29. Re Organization of NSW Geological Survey 1920

See also series 32 item 9 for working papers pertaining to correspondence with FW Whitehouse, University of Queensland.

Series 25 Geological survey, mainly in Australia - field notebooks

Date Range: 1882 - 1932

Accessions: 1/24

Quantity: 1.35

Item List: yes

Series Description:

The records especially document David's geological surveys for coal in the Hunter valley - Lake Macquarie region of New South Wales. Before David became Professor of Geology at the University of Sydney in 1891, he worked as a geologist with the NSW government, commencing on his arrival in Australia in late 1882. It could be argued that the NSW Government owns copyright to field notebooks compiled during David's employment with the NSW Geological Survey.

Other records document surveys carried out in Queensland in 1888, 1895, 1910, 1921, 1925, 1929, Tasmania in 1892, 1906, 1910-1912, 1921-1923 and 1925, South Australia in 1897, 1901, 1919, 1921, 1924, 1925, 1930 and 1932, Victoria in 1894, 1923 and 1928, in Western Australia in 1910, 1921 and 1925. The earliest notebook pertains to David's geological work in the district of his birth, Glamorganshire in Wales. This and some of the other volumes contain illustrations in pencil/ink. Only 5 volumes document David's visits overseas to USA in 1906, South Africa in 1925, Britain in 1926.

Field notebooks documenting visits to Funafuti in 1897-1898, to Kosciusko in 1905-1907, and to Antarctica in 1908-1909 are arranged in series 12, 20 and 5 respectively. Field notebooks pertaining to David's research into fossil fauna in the Adelaide series of rocks in South Australia from 1929 to 1933 are arranged in series 19.

P.011 DAVID Tannatt William Edgeworth

SERIES 25

Item Number	Description	Date Range
1.1	Most notes appear to have been compiled by David in Wales; a few notes pertain to NSW; folio, formerly glued on cover, is wrapped separately inside notebook pocket	1882/nd
1.2	Notes pertain to glaciation in Glamorganshire, Wales; there are some illustrations in pencil	1882
2	Field notes documenting surveys for coal in the Hunter River valley, details of accounts paid from Dec 1883 to March 1884; also notes on reports about Aborigines, including Boolwarra and Lake Macquarie tribes and parties who visited Buttai district	1883-1884
3	Field notes documenting surveys in 1886-87 of the Great Northern coalfield of NSW	1886
4	Field notes documenting surveys in May 1886 of Uralla gold field and Grass-tree glacial beds; also notes on discovery of tin in the New England district	1886 May
4.1	Field notes, 5 folios, documenting surveys in Hunter River valley	1886
5	Field notes documenting surveys for coal in between April and June in the Newcastle and Maitland district including the coast between Newcastle and Redhead	1886
6	Field notes documenting surveys between June and August in the Hunter River valley	1886
7	Field notes documenting surveys in August-September in the Hunter River valley	1886
8	Field notes documenting surveys for coal between September and October in the Maitland and Newcastle districts	1886
9	Field notes documenting surveys between October and November for coal in the Hunter River valley and Fassifern goldfield; also 1 page of questions set for Technical College examination	1886
10	Field notes documenting surveys between December 1886 and January 1887 for coal in the Hunter River valley	1886-1887
11	Field notes documenting surveys for coal in the Hunter River valley between December 1886 and February 1887	1886-1887

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
12	Field notes documenting surveys for coal in the Hunter River valley between February and June 1887	1887
13	Field notes documenting surveys for coal in the Hunter River valley between April and October 1887	1887
14	Field notes documenting surveys for coal in the Hunter River valley between June and July 1887	1887
15	Field notes documenting surveys for coal in the Hunter River valley between August and October 1887	1887
16	Field notes documenting surveys in the Maitland - Newcastle district in October and November 1887	1887
17	Field notes documenting surveys in the Hunter River valley	1887
18	Field notes documenting surveys in NSW at locations including St Peters, Waterloo brickpits, Liverpool, Curl Curl, Wyong, Gosford, Teralba	1888 Mar
19	Field notes; David's annotation on the disintegrating cover page reads, in part, " Maitland - Tracing ??? traversing outcrop to greta coal measures from Hebblewhite Shaft to Homerville May 1 to..1888 T W E David"	1888 May
20	Field notes documenting David's survey work in NSW; the cover is annotated "crossing from Minmi over North Sugarloaf in search of kerosene shale", "coal near Richmond Vale and in Fahey's Selection"; quotes are taken from cover	1888 May
21	Field notes documenting surveys in the Port Stephens district; first 2 pages bear notes pertaining to coalfields in South Wales	1888 Aug
22	Field notes documenting surveys in the Hunter River valley; also 6 pages of undated notes refer to Aborigines - described by David as "yarns about the blacks" narrated by W M Rothery of Blayney	1888 Sep
23	Notes, including field notes, documenting visit to the Rockhampton district in Queensland	1888 Dec
24	Field notes documenting surveys in the Port Stephens district of NSW when David was employed with NSW Government Department of Mines	1889

P.011 DAVID Tannatt William Edgeworth

SERIES 25

Item Number	Description	Date Range
25	Field notes documenting surveys in locations including Port Stephens and Raymond Terrace; the notebook is a continuation of item 24	1889 May
26	Field notes documenting survey in the Hunter River valley while David was employed with NSW Government Department of Mines	1889
27	the cover is annotated in David's hand as follows "Bathurst Water Supply Second report on Baas's Land near Clarencetown March- April 1889"	1889
28	Field notes documenting survey in the Hunter River valley while David was employed with NSW Government Department of Mines	1887
29	Field notes documenting surveys at South Redhead near Newcastle	1889 Jul
30	Field notes documenting surveys at Fassifern and Buttai near Lake Macquarie while David was employed with NSW Government Department of Mines	1889 Jul
31	Field notes documenting surveys in the Stroud district of NSW	1889 Aug
32	Field notes documenting surveys at Port Stephens	1889 Aug
33	Field notes documenting surveys in the Hunter River valley	1889 Oct
34	Mostly field notes documenting surveys in the Hunter River valley in October - November	1889
35	Field notes documenting visit to Port Stephens; on the second page, there is a draft of correspondence to the Town Clerk of Bathurst	1889
36	Field notes documenting surveys in the South Maitland district	1889 Dec
37	Report on kerosene shale, Megalong near Katoomba	1890
38	Field notes/diagrams relating to coal in the Hunter Valley	1890

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
39	Field notes/diagrams relating to coal in Hunter Valley, Liverpool, Coal Cliff	1890
40	Accounting 1883-1884; field notes 1890 - coal, Hunter Valley	1883-1890
41	Field notes/diagrams relating especially to coal and locations around Newcastle, Maitland, Wyong, Peak Hill	1890
42	Field notes/diagrams relating to Junction Mine at Mandurama, south of Orange NSW	1890
43	Field notes/diagrams documenting second visit to Sunny Corner (between Bathurst and Lithgow NSW)	1890
44	Field notes/diagrams relating to coal at Nowra, Clyde, Maitland and other locations.	1890
45	Field notes/diagrams relating to Silver King Mine, Sunny Corner (between Bathurst and Orange NSW)	1890
46	Field notes/diagrams relating to Silver King Mine, Sunny Corner (between Bathurst and Lithgow NSW) - sketch plans of workings	
47	Field notes/diagrams relating to coal at Nowra, Arona Bay, Myall Lake, Mount Argent, Mount Gladstone and other locations.	1890
48	Field notes/diagrams referring to Mudgee, Gulgong, Mount Stuart and other locations	1890
49	Field notes/diagrams referring to coal at Glen Innes, Tenterfield, Gerringong, Nowra, Bulli and other locations	1891
50	Field notes/diagrams relating to kerosene shale and locations including William town, Hartley, Penrith.	1890
50.1	Field notes/diagrams relating to lodes of topaz, emeralds, and other minerals and locations including Inverell, Tenterfield and Glen Innes	1891
51	Field notes pertaining to extended tunnel at Raymond Terrace; miscellaneous memoranda	1891
52	Field notes/diagrams documenting surveys in NSW; some are	1891

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
	records of drawings by Aborigines in cave near Wollombi, south-west of Cessnock; other notes include a section, Scholie's Diamond Drill Bore	
53	Field notes documenting surveys at Branxton, Pokolbin and other locations in the Hunter River valley.	1892-1907
54	Field notes documenting surveys at locations in the Hunter River valley including Cessnock, East Greta.	1894 Jan
55	Field notes documenting surveys in NSW at locations near Armidale, Tamworth, Muree, Inverell, East Greta, Werris Creek, Murrurundi.	1894 Jan
56	Field notes documenting surveys in NSW at Katoomba, Wallerawang, Bowenfels, Homebush, Glenbrook, Sutton Forest, Mudgee, Capertee	1894
57	Field notes documenting surveys carried out near Yass NSW, at Bacchus Marsh and other locations in Victoria and near Adelaide, Halletts Cove, in December 1894 and on Boggo Gaol Road in Jan 1895.	1894-1895
58	Field notes documenting surveys in NSW at locations including Hawkesbury Bridge, Dubbo, Gilgandra Bore, The "Spire".	1895
59	Field notes documenting surveys in NSW in the vicinity of Tamworth	1896
60	Field notes documenting surveys in NSW in the Hunter River valley, and between Mt Victoria and Jenolan Caves; also notes on interview with Teall regarding radiolarian rocks.	1896
61	Field notes documenting surveys in South Australia at locations including Crystal Brook	1897
62	Field notes documenting surveys in South Australia including in the vicinity of Port Victor and Normanville	1897 Mar
63	Diary which also field notes documenting surveys relating to coal at South Bulli and Tamworth	1898
64	Field notes documenting surveys in NSW at locations including Glen Innes, Tamworth, Ashford, Fassifern, Berowra, Helensburgh, Rookwood, Cremorne, Mosman's Bay, Bondi, Berry's Bay, Glebe Pt Road, Petersham	1898

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
65	Field notes documenting surveys in NSW in the Hunter River valley	1899-1903
66	Field notes documenting surveys in NSW including Narrabeen and locations in the Hunter River valley	1899
67	Field notes documenting surveys in the Hunter River valley	1899
68	Field notes documenting surveys in NSW at Mandurama, south of Orange, (David's hand) and in the Hunter River valley; the volume has been annotated "Gregson's ? note-book"	1899
69	Field notes documenting surveys in NSW in the Hunter River valley and Richmond - Kurrajong	1899-1902
70	Field notes documenting survey at Ironbark Brush near Maitland	1899
71	Includes field notes (Hunter valley), and notes pertaining to teaching ; the volume has been annotated "Gregson's ? note-book"	1899?
72	Field notes documenting surveys in the Hunter River valley	1900
73	Field notes documenting surveys in the Hunter River valley, especially Pokolbin	1901
74	Field notes documenting surveys of lower Cambrian glacial beds in South Australia; other notes	1901
75	Field notes documenting surveys in the Yass district of NSW	1902?
76	Field notes documenting surveys in 1892 in Tasmania, incl Ben Lomond and other locations in the north-east; also in NSW in 1902 at locations in the Blue Mts, in the vicinity of Lue (in the foothills of the Dividing Range, east of Mudjee);	1892-1902
77	Field notes documenting surveys in the Blue Mountains NSW in 1903 and in the Parish of Marwood in 1921	1903-1921
78	Field notes documenting surveys in the Hunter River valley especially at Heddon Greta Mine, Minmi Pelaw Mine and Hebburn Colliery	1903

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
79	Field notes documenting surveys in the Hunter River valley; also draft of a letter to the Sydney Morning Herald dated 9 Oct 1903 pertaining to meeting on Rhodes Scholarship	1903
80	Field notes documenting surveys at Cessnock	1904
81	Field notes documenting surveys in the Swansea - Toronto area	1904
82	Field notes documenting surveys at Glenbrook in 1904; notes pertaining to New Zealand, Glacial Committee and other matters	1904
83	Field notes documenting surveys of coal deposits in the Hunter River valley especially Pokolbin, Mt View and Hebburn Colliery	1904
84	Field notes documenting surveys of coal deposits in the Hunter River valley including Stockton, Wallsend, Merewether, Wallarah, Fern Valley	1905
85	Field notes documenting surveys at locations on the coast south of Sydney including Nowra	1905
86	Field notes documenting surveys in the Newcastle district; other notes	1905
87	Field notes documenting surveys of coal seams in the Newcastle district; other notes	1905-1906
88	Documenting surveys in Newcastle-Lake Macquarie incl Rhondda/ Killingworth Mines	1905
89	Documents surveys in Tasmania incl Tamar R estuary/ Wynyard; & NSW	1906
89.1	Document surveys of coal - Cessnock district; other notes	1907
90.1	Documents visit to Cooma, Tumut, Kiandra, Kosciusko	1906
90.2	Documents visit to Snowy River (Thredbo, Jindabyne)	1907 June

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
90.3	Documents visit to Kosciusko	1905-1906
91	Notes compiled during visit to USA	1906
92	Notes compiled during visit to USA	1906
93	Documents surveys in W A: at Kalgoorlie, Boulder, Coolgardie, Oribanda; other notes refer to Assyria, Antarctic meteorology etc	1910
94	Document surveys at Mount Bischoff/ other Tasmanian locations, at Gympie/ Mount Morgan in Queensland, and West Maitland; other notes	1910
95	Field notes documenting visit to Broken Hill	1910
96	Field notes documenting surveys in NSW in the vicinity of Yass, Tamworth, Glen Innes, Wellington and other locations	1911
97	Field notes documenting surveys in the northern rivers district of NSW	1912
98	Includes field notes of surveys, presumed near Tamworth	1912-1913
99	Document surveys in Tasmania, especially near Sheffield	1911-1912
100	Document surveys in Tasmania, especially in the Forth valley	1912
101	Field notes documenting surveys in Tasmania in the north - north-east	1912
102	Field notes documenting surveys in NSW in the Kosciusko, Tamworth and Hunter valley districts of NSW	1914-1915
103	Field notes documenting surveys in NSW at Luskintyre in October 1914, Wallarah colliery in February 1915, Rockdale, Lamb's Valley in 1921	1914-1921
103.1	Field notes documenting surveys in Queensland in the Warwick district in relation to David's interest in the Talgai skull; also notes pertaining to JB Henderson on Roma gas	1914
104	Field notes documenting surveys in NSW at locations	1919

P.011 DAVID Tannatt William Edgeworth

SERIES 25

Item Number	Description	Date Range
	including Gloucester, Lochinvar, Hillsborough; there are notes pertaining to the Northern territory	
105	Field notes documenting surveys in NSW in the Maldon, Douglas Park, Campbelltown district; other notes describe fossils at Altunga in South Australia	1919
106	Notes documenting visit to South Australia	1919
107	Field notes documenting surveys in South Australia at locations including Mt Gambier, Millicent, Wankwine Bay, Rivoli Bay, Burra, Iron Knob	1921
108	Field notes documenting surveys in NSW at Aberdare and Abermain collieries, at Burrinjuck and Jenolan Caves, Cooma, Bombala, Bega, Tilba, Twofold Bay and other locations on the south coast	1921
109	Field notes documenting surveys in Tasmania in the vicinity of Burnie, Zeehan, Strahan, Queenstown, Launceston; also draft letter to the Premier of Victoria in David's capacity as president of ANRC and notes compiled during a visit to South Australia	1921-1922
110	Notes compiled on a visit to Queensland relating to Blair Athol coals, Dunstan's fossils and other matters	1921
111	Field notes documenting surveys with Walter Howchin in the north of South Australia	1921
112	Field notes documenting surveys in South Australia; includes a number of words in an Aboriginal language with the meaning in English (eg entries dated 1, 3 September) and notes describing lives of individuals living on the Nullabor	1921
113	Notes documenting journeys in South and Western Australia in Sept - October	1921
114	Field notes documenting surveys in NSW at locations including West Maitland and Allandale, Seaham, in Aug - Sep, 1922 and in the Wamberal - Avoca district in Jan 1924	1922-1924
115	Field notes documenting surveys with Cotton and Enright in NSW between Murrurundi and Kempsey in NSW	1922
116	Field notes documenting surveys in the Bairnsdale - Snowy River district in March and in the West Maitland district with	1922

P.011 DAVID Tannatt William Edgeworth**SERIES 25**

Item Number	Description	Date Range
	W R Browne in October	
117	Field notes documenting surveys in Tasmania; also notes pertaining to Papua	1923
118	Field notes documenting surveys in Tasmania at locations including Regatta Point Launceston, Penguin, Rostella Beach, Maria Island; also notes compiled at National Museum Melbourne and Victorian Geological Survey	1923
119	Field notes documenting surveys between Hornsby and Gosford NSW	1924
120	Field notes documenting surveys with J M Morris in the Muswellbrook district of NSW	1924
121	Field notes documenting surveys in South Australia at Victor Harbour with Mawson and Thomas and other locations including Patchawarra, Outalpa, Blanche Cap, Myponga, Inman Valley, Rosetta Head	1924
122	Field notes documenting surveys in NSW especially at Bulahdelah lying between Maitland and Gloucester, and in the Toowoomba district of South Queensland	1925
123	Field notes documenting surveys in Western Australia	1925
124	Field notes documenting surveys in April-May in Tasmania including locations in the Queenstown, Rosebery, and Launceston districts	1925
125	Field notes documenting visit to Queensland; other notes	1925
126	Field notes documenting surveys in South Australia and across the Nullarbor to Western Australia	1925 Aug
127	Field notes documenting journey in late November overland from Melbourne to Perth and visit to South Africa in December; the 1926 notes are a few pages relating to methodology, apparently compiled in Britain	1925-1926
128	Field notes documenting surveys in Scotland with Bailey and C E Tilley in July with emphasis on Schiehallion mountain, Tayside	1926
129	Field notes documenting visit in September - October to	1928

P.011 DAVID Tannatt William Edgeworth

SERIES 25

Item Number	Description	Date Range
	Victoria, including the Bairnsdale district; other notes refer to Ipswich west of Brisbane; the notes compiled in 1933 appear to be a draft for a letter to E W Skeats	
130	Field notes documenting visit with W S Dun to Ashford north of Inverell NSW	1929
131	Field notes documenting visit to Queensland to locations including Sandgate, Ashford, Shorncliff, Gympie in September 1929; records relate especially to fossils; a few other notes	1929
132	Notes, mainly referring to fossils, made during a visit to Victoria to locations including Anglesea, Mt John Osmond Ranges, Torquay, in April 1929	1930 Apr
133	Field notes documenting visit to South Australia to locations including Port Keats, Waterhouse Ranges, Arltunga	1930
134	Notes made on a visit to South Australia in October 1932; apparently pages of notes on Tasmania were removed prior to deposition of volume in the University Archives	1932 Oct
135	notes pertain to Science Conference in Sydney in 1932, Nullagine.	1932

P.011 DAVID Tannatt William Edgeworth

Series 26 Printed publications authored by David

Date Range: 1896 - 1933

Accessions: 1/24

Quantity: 0.10

Item List: no

Series Description:

Includes copy of "Geological Map of the Commonwealth of Australia" (item no 1) - refer to series 22 and "Geological Maps and Sections of Coal Measures in the Newcastle District" published circa 1905 (1 volume : item no 2). Also copies of articles authored by David and published in the daily press including a copy of an article "The Diamond" written by David for the "Sydney Morning Herald" in Jan 1907 and printed on an outsize folio (item no 3). Published articles written by David on the British Antarctic Expedition 1907-09 are in series 6.

Custody: University of Sydney

P.011 DAVID Tannatt William Edgeworth

Series 27 Cartographic drawings ascribed to David

Date Range: 1920s? -

Accessions: 1/24

Quantity: 0.02

Item List: yes

Series Description:

Most drawings are geological sections. There are also sketches, using watercolour paint, depicting Central Australia and the Barrier Ranges in NSW. None are dated.

P.011 DAVID Tannatt William Edgeworth

SERIES 27

Item Number	Description	Date Range
1	Section of ocean east of Southport, Queensland towards Norfolk Island - soundings by "SS Britannica" for Eastern Telegraph Company; refer also to series 22 item 6	nd
2	diagram of the oscillations of the crust in Australia since Archaen time	nd
3	rough section based on reports of geological survey of Tasmanian west coast to east coast - section goes near to Mt Heemskirk and Mt Roland; meridians 146E, 147E, 148E are marked; latitude is not given	nd
4	section "Geosyncline of the Fly Delta" (Papua-New Guinea); related to series 24 item 5	nd
4.1	section of the Irwin River, Western Australia	undated
5	section Strathfield - Askwith (Asquith)	undated
6	sketch - discovery of skeleton of whale off Grafton NSW; section Sydney-Tamworth; sketch/numerical data: Parramatta River tunnel from Greenwich to Long Nose Point	undated
7	sections (cores) Karoo, South Africa (2 folios); sections: South Australia/? Australia (1 folio)	undated
8	sketches of Central Australia and Barrier Range NSW	undated
9	ascribed to David: geological sketch (in ink) to illustrate report on Peake and Dennison Ranges	undated
10	ascribed to David: geological plan Dandarega-Gin Gin-Perth	
11	geological section Mt Lyell (Tas) - Wilson's Promintory - Yarrogon (Vic)	undated

P.011 DAVID Tannatt William Edgeworth

Series 28 Miscellaneous authors - manuscripts

Date Range: 1895 - 1933

Accessions: 1/24

Quantity: 0.15

Item List: yes

Series Description:

Handwritten and typescript material, some photographs. The instructions for flying the cellular kite were probably written by Hargrave for the kite which he arranged to made for David, by the carpenter Worsfold in Missenden Rd, apparantly to take to the Antarctic to assist in meteorological observations. Manuscripts by Mawson are annotated by unknown source indicating that they were written when Mawson was a student of Sydney University. Other manuscripts are located with correspondence in series 32.

P.011 DAVID Tannatt William Edgeworth

Series 29 Miscellaneous maps and plans

Date Range: 1912 - 1931

Accessions: 1/24

Quantity: 0.03

Item List: no

Series Description:

Most documents are not dated. The series includes maps drawn by T Griffith Taylor, W Howchin, A Gibbs Maitland and others as well as copies of published documents. A number of documents bear annotations in David's hand. It is thought that a number of these maps and plans were drawn in preparation for the "Geology of Australia" (refer to series 21). See series 32 for related correspondence.

Custody: University of Sydney

P.011 DAVID Tannatt William Edgeworth

Series 30 Isabel Houison's notebooks - shorthand drafts of letters/scripts

Date Range: 1920 - 1924

Accessions: 1/24

Quantity: 0.10

Item List: no

Series Description:

Comprises 12 notebooks; 1 volume (item 1) apparently compiled in 1920, 4 volumes (items 2-5) in 1923 and 7 volumes (items 6-12) in 1924. The majority of the notes are written in shorthand with the occasional word in longhand. However, there are pages of notes in longhand. Some of the shorthand appears to have a longhand translation superimposed.

The notes include drafts of letters and chapters of a book, possibly David's treatise on the Geology of Australia. At least one volume (item 4) contains annotated sketches in David's hand.

Notes on the covers of volumes often provide a guide to the contents eg. item 1 is annotated on the cover : "I. Houison Letters July 1920", item 2 : "I. Houison Letters", item 9 : "Feb 11th 1924 Permo-Carb Trias", item 10 : "Trias", item 11 : "end of Trias, Jurassic and Cretaceous", item 12 : "Tertiary (continued) Nov 6 1924". A letter (item 13) dated Jan 1924 addressed to Miss Houison by Mildred Musico relating to Houison's cottage at Woodford is also in this series. There is no record of a Isabel Houison in the University of Sydney.

Custody: University of Sydney

Series 31 Addresses given by David - scripts/notes

Date Range: 1895 - 1923

Accessions: 1/24

Quantity: 0.11

Item List: no

Series Description:

The papers in this series are mostly manuscript or annotated typescript in David's hand; they mainly document addresses given by David to bodies of scientists. The papers have been arranged in boxes of acid-free board as follows:
Item 1 : First Clarke Memorial Lecture, 1903 - on the life and work of Clarke and NSW geology since Clarke's death - manuscript;

Item 2 : address to London Geological Society 1904: "Continental Elevation and Subsidence"; address given at the opening ceremony for the Australian Museum Sydney in 1910; tentatively identified as an address given in 1921 at Centenary Celebrations of Royal Society of NSW - subject: biographies of Australian geologists; paper by David & JB Guthrie "The Flood Silts of the Hunter and Hawkesbury Rivers" read to the NSW Royal Society 1904 - manuscript.

Item 3 : Ms notes apparently for presidential address to the NSW Royal Society 1911.

Item 4 : Manuscript/typescript for Presidential address to the Australasian Association for Advancement of Science, Melbourne 1913. See also ser 43.

Item 5 : Undated manuscripts for speeches at the unveiling of a commemorative tablet at Jenolan Caves (possibly in 1929), and at an occasion celebrating visit of representative of Spain to Australia; annotated typescripts of paper in French read by David at the International Geological Congress in 1906 in Mexico; notes prepared for President's address to Royal Society in 1913.

Item 6 : Draft, for publication, of inaugural R M Johnston Memorial Lecture read by David to the Royal Society of Tasmania Oct 1923; the draft, paginated 1-59 consists of typescript with extensive annotations; its title: "Geological Evidence of the Antiquity of Man in the Commonwealth with special reference to the Tasmanian Aborigines"; see ser 24, items 15-17 for related papers.

Item 7 : Miscellaneous papers dated 1895-1913. See also ser 43, 44, 50.

P.011 DAVID Tannatt William Edgeworth

Series 32 Miscellaneous correspondence

Date Range: 1894 - 1933

Accessions: 1/24

Quantity: 0.33

Item List: yes

Series Description:

Correspondence, addressed to David, mostly original documents, some copies including transcripts. The letters pertain to research to a greater or lesser extent. Some letters provide considerable personal information about the writer eg. Douglas Mawson. The most frequently discussed matters pertain to fossils, glaciation and David's treatise on the Geology of Australia.

Those who wrote to David over a period of a decade or more include Walter Howchin (25 letters 1899-1934), W G Woolnough (18 letters, 1902-1933), Frederick Chapman (19 letters, 1921-1934), Douglas Mawson (10 letters, 1903-1934), T Griffith Taylor (16 letters, 1910-1933) and A Gibbs Maitland (8 letters, 1900-1933) and L K Ward (27 letters, 1909-1934). Other correspondents include L C Ball and B Dunstan (Queensland Geological Survey), W N Benson University of Otago Dunedin New Zealand, W Baragwanath (Victorian Dept of Mines), Herbert Basedow (consulting geologist), T Blatchford (West Australian Geological Survey), W H Bryan and F W Whitehouse (University of Queensland Geology Dept), W S Dun (NSW Govt Geological Survey), T S Hart (School of Mines Bairnsdale Vic), L Hills and W H Twelvetrees (Tasmanian Geological Survey), C T Madigan (University Adelaide), J H Maiden (Botanic Gardens Sydney), A Pike (Oakey Creek NSW), R T Wade (University of Sydney graduate, see also Professorial Board minutes 23 Oct 1933) and R J Tillyard. Most of the correspondence pertaining to expeditions to Antarctica and Funafuti, "Adelaide fossils" and David's "Geological Map of Australia with Explanatory Notes" is in series 7, 13, 16 and 22 respectively.

P.011 DAVID Tannatt William Edgeworth

Series 33 Diaries

Date Range: 1904 - 1923

Accessions: 1/24

Quantity: 0.05

Item List: no

Series Description:

Comprises 6 volumes for the years 1904, 1905, 1906, 1914, 1923. The diaries are relatively small, the largest having dimensions 16cm x 10cm x 1cm. There are some entries pertaining to David's teaching and administration duties at the University.

P.011 DAVID Tannatt William Edgeworth

Series 34 Browne WR/ David - fossils - drawings of E T Talbot/ Dorothy M

Date Range: 1927 - 193?

Accessions: 1/24

Quantity: 0.05

Item List: no

Series Description:

Black ink and pencil sketches, some signed by E T Talbot. Most are not signed. Some are assumed to be the work of Dorothy M Yorke (refer to series 17).

Most documents are not dated. Photographic prints of the drawings are included.

Custody: University of Sydney

Copyright: various

Provenance: David TWE/ Browne WR

Access Status: open

mrd 15.11.90

P.011 DAVID Tannatt William Edgeworth

Series 35 Miscellaneous photographic images.

Date Range: 1870 - 1931

Accessions: 1/24, 1337.

Quantity: 0.67

Item List: yes

Series Description:

William Rowan Browne arranged at least part of David's collection of photographs after David's death in preparation for publishing the treatise on the Geology of Australia. The dates of some photographs suggest that Browne added to the collection, but to what extent is not known. There was clear evidence of original order in the cases of photographs of fossils, economic geology and "antiquity of man". Photographs which did not appear to fit into these categories have been arranged mainly according to field trip where possible and geographical location.

Photographs document geological excursions undertaken by David, especially to Central Australia and across the Nullarbor in 1921 and to Kosciusko in 1906. Photographs of expeditions to Funafuti and Antarctica are located in series 9 and 15 respectively. Other photographs depict fossils and other geological subjects mostly in Australia, as well as economic geology, and Tasmanian and Australian Aboriginal peoples. The latter relate to scripts on the "antiquity of man" (series 24: items 15-17, series 31: item 6, series 40: item 18 and series 50: item 2). Photographs documenting David's research on fossils in rocks of the Adelaide series in South Australia are located in series 18.

Many of the photographs are annotated, some by David. Many photographs are not dated; thus very rough estimates have been made of the approximate decade of the photographs were taken. There are original negatives of some snapshots, presumably taken by David. In addition, some of the images were archival estrays in the custody of T.G.Vallance.

P.011 DAVID Tannatt William Edgeworth

SERIES 35

Item Number	Description	Date Range
1	depict economic geology : artesian bores especially in Central Australia - many taken by L K Ward, South Australian Govt Mines Dept; mining of coal /other substances - incl albumin prints depicting mining in Queensland, West Australia and Tasmania	1897-1927
2	depict Aust & Tas Aboriginal people & their artifacts. Albumin prints incl photos published by Kerry's Studios George St Sydney. Gelatin prints are copies of photos by SA White on expedition with David to Central Aust in 1921-22 & by Francis Birtles	c1900-24
3	depict fossils in Australia. Many of the prints were deposited in envelopes, arranged by geological age, for the purpose of the publication "Geology of Australia". Some prints bear annotations in David's hand	1887-1941
4	depict views of geological features, agriculture, mining & timber industries in south-west West Australia. David may have acquired the prints during visit to WA in 1925; field notebook series 25 item 123 page 97 indicates David visited Collie	1925?
5	depict geological features in Western Australia, mainly in the mid/north west; the prints were deposited in an album with index prepared by AG Maitland, WA Govt Geologist; for conservation reasons, only the prints & copy of index/cover are retained	c1900
6.1	depict geological features in Western Australia; some bear the imprint of the West Australian Government Geological Survey	1910s?-20s?
6.2	depict geological features in Western Australia especially in the north-west and Kalgoorlie areas; most photographs bear the imprint the Western Australian Government Geologist or Western Australia Geological Survey	1910s?-20s?
7	Depict geological features at Hallett's Cove, Onkaparinga and other locations in South Australia, documenting glaciation. Some prints are annotated "W Howchin"	ND
8.1	depict geological features in South Australia, mostly towards the north; Taylor (presumably T Griffith Taylor) is depicted in a photo taken near Beltana; one print shows an unidentified group at Aldinga	1890?
8.2	appear to document geological excursion to Flinders Ranges, South Aust in 1923, especially the Moolawatana region; some annotations are in David's hand; annotations on the deposit envelope include "photographs from Prof Woolnough	1923-1925

P.011 DAVID Tannatt William Edgeworth

SERIES 35

Item Number	Description	Date Range
	19.10.25"	
9	photos taken in July 1921, depicting excursion to Central Australia; photos are ascribed to Howchin, LK Ward and others; David, White, Kemp, Howchin, others are depicted; other prints of Central Australia by H Basedow, Sergeant, H Gooch	1920-1921
10	taken at an altitude of 8000 feet by G H Halligan and Mustard depicting the Lake Eyre - Lake Torrens region of Central Australia. Lists of descriptions are handwritten and signed by Halligan. Photos bear 2 numbering systems : negative no and print no	1922
11.1	depict geological features and aspects of life on the Nullarbor Plain; incl photos taken during David's visit to the Nullarbor in Aug 1921, documented in field notebook ser 25 item 112; annotations by David, LK Ward/other; incl group photo with David	1921/nd
11.2	depicts excursion to Western Australia: ES Simpson, Matheson, Mr/Mrs Stone at Bonnie Downs Station 18.9.1921; in David's note, Bonnie is deleted, but David's field notebook (series 25 item 113 page 31) records David at Bonnie Downs on 19.9.21	1921
12.1	depict geological features in South Australia, mostly on the south-east coast especially Encounter Bay, Aldinga (presumably on excursion with Madigan & Tilley), Rivoli Bay; other locations incl Olary, Boolcamata; refer to series 25 items 107, 111,121	1920circa
12.2	depict geological features in South Australia, on/near the south-east coast including Mt Schank and Mt Gambier, and in the mid-northwest in the Stuart's Range opal field and Corunna Hills; ascribed to L K Ward	1921/nd
13	depict Aboriginal people/their activities, and town/countryside in N Terr. Prints are copies of photos taken by i)Captain SA White of Fulham S Aust with signed annotations, ii) H Basedow, geologist Adelaide depicting Kolaia Tribe of Cambridge Gulf WA	1922-1925
14	depict "canoe trees" near Bairnsdale, kitchen middens & other remains of habitation by Aboriginal people (photos by AS Kenyon), & geological formations in Victoria; David surveyed in Bairnsdale district in 1922 - refer to field notebook ser25 item116	1921-1937
15	depict aerial views of geological features in south-west	1920s?

P.011 DAVID Tannatt William Edgeworth

SERIES 35

Item Number	Description	Date Range
	Queensland especially sandhills and watercourses incl Cooper's Creek near Windorah, the Diamantina, Lake Yamma Yamma	
16	depict geological features & landscapes in various parts of Queensland incl Warwick district in 1921 with one print depicting David & 3 others (named), Barkly Tableland; few annotations are David's; the 1894 prints depict the Glass Mts near Brisbane	1899-1937
17	depict Tasmanian geological features especially glaciation, mainly in the Central Plateau; the latter include aerial photos of HJ King & FD Cruickshank accompanied by detailed annotations; also aerial view of Mt Anne in the southwest by JJ Barnett	1920s?
18	depict geological features in Tasmania. Many of the photos appear to have been taken, some by Clive Lord, on David's visits to Tasmania in 1921-23; Clive Lord and Arundell Lewis are depicted; related field notebooks in series 25 items 109, 118	1922-1923
19	depict Tasmanian Eclipse expedition on Bruni Island, May 1910; prints sent to David by GF Dodwell; copy negative available	1910 May
20	depict King Island in the Bass Strait; the geographic location and geological features depicted are described in detail; the prints may have been collated by David or Browne for "Geology of Australia"; there are no annotations in David's hand	1920s/30s?
21	depict Flinders Island & other islands in Bass Strait; the geographic location & geological features depicted are described in detail; the prints may have been collated by David or Browne for "Geology of Australia"; no annotations are in David's hand	1920s/30s?
22	depict mainly geological features in NSW at locations including Bondi (dated 1898), Tumut, Menindee, Wellington, Jenolan, and formations tentatively located in the Warrumbungles	1880s?-1898
23	copies of photographs of geological and other features in NSW taken by Henry T Stevens depicting Wilcannia, by J Milne Curran depicting El Capitan (hill) near Cobar, by "AJS" depicting Punchbowl Cave Wee Jasper	1870s/90s?
24	depict Mt Kosciusko area especially Lake May (Coopatamba); an unidentified source has dated the prints circa 1900;	1900?

P.011 DAVID Tannatt William Edgeworth**SERIES 35**

Item Number	Description	Date Range
	pertains to David's interest in glaciation (refer to series 20)	
25	depict views of locations on/near the east coast of Queensland including Lake Cootharaba on the coast north of Noosa Head, Chillagoe Caves, Townsville from Castle Hill (2 views), Brisbane (2), Tweed Heads. Annotations are not in David's hand	1910?
26	depicts Lake George NSW and residential property on the shore; photographer: Mrs Caspers of Goulburn	1884
27	depict geological features in NSW especially in the Eden/Milton, Twofold Bay, Tibooburra, Currabubula districts. Most prints are snapshots thought to have been taken by David. Others were taken by Miss Powell and SP Kemp, amateur photographer	1919/?
28	includes snapshots, some with original negatives, taken on David's visit to southern Africa in 1925 en route to England - an undated print depicts David; prints depicting geological features in Cape Colony (some dated 1902, 1903) and Rhodesia	1902-1921
29	depict geological features of Spitzbergen from the air; prints taken by W Mittekholzer, Zurich, Switzerland	1924
30	depict New Zealand - albumin prints of Milford Sound area and of a group in Launceston incl Dr Hirschfeld?; postcard prints of Rotorua area with detailed annotations describing geological features, initialled JG	1890?-1920?
31	depict Papua-New Guinea - mostly activities of the local inhabitants at Aitape, West Sepik district in the village of Karaiti, ; one print is dated 1925; there is one print of a rock specimen, signed and annotated by E R Stanley	1925/?
32	snapshots taken on David's visit to Scotland with Bailey in July 1926, described in field notebook series 25, item 128	1926 July
33	depicts David and Stonier at Deep Creek near West Maitland where they discovered the Greta coal seam	1886
34	depicts David, sometimes with colleagues, mostly on field trips; identified but undated prints include David with Taylor, Mawson, Stillwell, Davis	1890?-1929
35	photos apparently depict geological excursions/field work; includes prints depicting David's colleagues Howchin and	1914-1920s?

P.011 DAVID Tannatt William Edgeworth

SERIES 35

Item Number	Description	Date Range
	Skeats and conference groups; see other items for photos of groups with some identification	
36	although David did visit Kosciusko in 1901, it is thought that these photos document his visit in 1906, with possibly one exception; see series 20 for other records of this excursion; most prints annotated by David who took at least one of the photos	1906
37	most depict geological formations; one is dated 1881; annotated copies of a couple of these prints are located in an album in series 15: item 1 pages 9, 14	1880s-1900?
38	miscellaneous - includes prints of Talgai skull, Ni River, Lower Waidina River and Sigatoka in Fiji and press cutting re Woolnough's expedition to Fiji in 1905	1887-1912

P.011 DAVID Tannatt William Edgeworth

Series 36 Collection of photographs annotated by Archibald Liversidge

Date Range: 188? - 189?

Accessions: 1/24

Quantity: 0.02

Item List: no

Series Description:

Albumin prints, mounted on cardboard, signed and annotated by Liversidge. The identity of the photographer is not known. Photographs depict geological features in the Blue Mountains, Bondi, near Yass and on the Nepean River - Avoca in NSW, and The Cataract on the South Esk in Tasmania.

Liversidge was Professor of Geology and Mineralogy in 1872. In the early 1880s, he took over foundation Professor of Chemistry John Smith's duties. The University Calendar 1881-2 describes Liversidge as Professor of Chemistry and Mineralogy. Previously, from 1874, he was Professor of Geology and Mineralogy.

Custody: University of Sydney

Provenance: Liversidge Prof A

Access Status: open

P.011 DAVID Tannatt William Edgeworth

Series 37 Collection of annotated photographic prints by Ernest Brougham I

Date Range: 1894 - 1922

Accessions: 1/24

Quantity: 0.06

Item List: no

Series Description:

Albumin prints - stereoviews mounted and annotated in ink. Most articles are well preserved and bear the initials EBD, date and geographical location on the mounting board. The photographs depict geological formations in New South Wales in the Warrumbungle Ranges, Blue Mountains, New England district, and in Sydney at Terrigal, Deewhy and Cape Banks. The largest number of stereoviews are described as the Warrumbungle Series, dated 1894-1895.

The collection has been itemised as follows

item 1 : 1894-1895

item 2 : 1900-1910

item 3 : 1920-1922

item 4 : undated.

Ernest Brougham Docker (1842-1923) born at Thornthwaite near Scone NSW, studied at the Collegiate School, Cook's River and the University of Sydney from which he graduated with the BA degree in 1863 and MA degree in 1865; in 1861, he was awarded the University Medal for English verse, and in 1862 the Wentworth medal for English essay. Docker was called to the NSW Bar in 1867, appointed District Court Judge of the north-western district in 1884 and Judge of the Metropolitan District Court in 1912; he retired in 1918. President of the Photographic Society of NSW from 1894 to 1907, he was also a member of the Royal Society of NSW and the Royal Australasian Historical Society and Photographic Society of NSW Docker was President of the latter from 1894 to 1907. (Reference: Presidential Address given by R H Cambage to the Royal Society of NSW 1924, published in vol LVIII of the Journal of the Society.)

P.011 DAVID Tannatt William Edgeworth

Series 38 Collection of typescript/ printed matter

Date Range: 1898 - 1933

Accessions: 1/24

Quantity: 0.04

Item List: no

Series Description:

A series of reports from the Tasmanian Government Geologist's Office dated 1900-1906 and material relating to various geological subjects in Australia, Papua-New Guinea, Fiji and Nyasaland (now Malawi); some publications have been annotated by David.

There is one extra large folio - a table of the flow of water from artesian wells on 11 November 1892.

Printed matter in the form of newspaper articles is arranged in other series viz series 6 (British Antarctic Expedition 1907-09), 9 (other expeditions to Antarctica/ Australian control of Antarctica), series 14 (expeditions to Funafuti) and series 52 (includes artesian water, earth tremors, antiquity of man)

P.011 DAVID Tannatt William Edgeworth

Series 39 Geological excursions - photographs/other records

Date Range: 1906? - 1922

Accessions: 1/23; 1/24; 995

Quantity: 0.10

Item List: yes

Series Description:

Pertain especially to excursions to Kosciusko in the summer vacation of 1906-1907, in 1915 and in 1922. Includes 3 albums prepared by students and presented to David as mementos of geology excursions viz : to Kosciusko 1906-07, various excursions in 1919, to Kosciusko in 1922.

Photographs in item 8 are not annotated. The location may be Prospect quarry; refer to Archives' miscellaneous photograph collection item 169: an albumin print annotated as "geological excursion to Prospect 1895".

Related series : 20 (records of research on glaciation), 26 (newspaper articles authored by David on Kosciusko 1906-07 excursion), 52 (newspaper reports of Kosciusko excursion), 48 (autographed photographic print of unidentified student excursion), and P65 (Cohen papers) series 4 & 5 contain photographs taken on excursions to the Hunter Valley in 1909, 1910.

P.011 DAVID Tannatt William Edgeworth**SERIES 39**

Item Number	Description	Date Range
1	document excursion to Kosciusko in 1922, presented to David by students, with signatures and annotations	1922
2	4 plans drawn by Peter Crawford, head attendant in the Geology Dept, apparently for excursion to Kosciusko in Dec 1906-Jan 1907 (see also item 4); also notes (1 fol) for a student excursion to Kosciusko dated by unidentified source:1915 (see item 3)	1915?
2.1	prepared for excursion at Hillsborough near Gosforth on the Hunter River about 9 miles from Maitland in August 1920	1920
2.2	prepared for excursion to Glenbrook in the Blue Mts NSW, 24 June 1911	1911
3	depict excursions to Kosciusko; most appear to relate to one excursion, in 1915, assuming the date ascribed by an unidentified source is correct; a photo of a group at Mt Buffalo in winter is included - is this a Sydney Uni geology student excursion?	1906?-1915?
4	prepared for David by geology student, E Kilburn Scott signed as Editor in Chief, to commemorate excursion to Kosciusko in Dec 1906-Jan 1907; see also item 2 and P169 series 1: a 20 page letter from excursion member, A Mackie, Jan 1907 to W Mackie	1907
5	volume of "The Science Journal", University of Sydney, containing an article about an excursion to Tamworth	1919
6	presented to David as "a memento of geology excursions in 1919", signed (by students presumably); photographic prints are annotated	1919
7	depict students on excursions, posed as groups for photographs; clothes appear to be Edwardian style, hence the pre-war date ascribed	1910?
8	depict student excursion to quarry at unidentified location; clothing appears to be Edwardian - hence the pre-war date ascribed	1910?
9	depict geology student excursion to the Hunter River;	1909 Aug
10	extract from the the Cooma press reporting the 1906-07 excursion to Kosciusko; part of a manuscript document with notes on the geography, geology and history of Kosciusko from 1840 to 1907	1907

P.011 DAVID Tannatt William Edgeworth

Series 40 Universities of Sydney/London - lectures notes

Date Range: 1892 - 1926

Accessions: 1/24

Quantity: 0.44

Item List: yes

Series Description:

The notes are in David's hand. Many of the folios were exceptionally brittle; they were copied onto buffered paper (Archive Text Wove); the originals have not been retained as the paper disintegrated on photocopying.

Most of the notes were written for lectures to students of Geology II and Geology III at the University of Sydney. There are few notes written for students in Geology I. The subject with the greatest volume of notes is designated "physiography" by David. The arrangement of the lecture notes is inconsistent to some extent. Most lecture notes identified as "Geology II" have been arranged chronologically under this heading. Most lecture notes identified as "physiography" have been arranged as a single item, chronologically as far as possible; David re-used and amalgamated portions of previous year's lecture notes and amended his notes.

See series 9 for press cuttings on the Borchgrevnik Expedition to Antarctica annotated by David "Keep for 1st Year lectures". The series includes brochures and some notes for David's lectures under the auspices of the Sydney University Extension Board. The lecture notes written for a series of lectures given by David at the University of London were written for students of Advanced Geology. See also series 20, 24 which probably include notes written for lectures and series 50 item 2 on "Savagery and Civilisation".

P.011 DAVID Tannatt William Edgeworth**SERIES 40**

Item Number	Description	Date Range
1	notes for lectures to Geology I students	1892-?
2	notes for lectures to Geology II students	1892-1899
3	notes for lectures to Geology II students	1895-1899
4	notes for lectures to Geology II students	1899-1900
5	notes for lectures to Geology II students	1901-5/1912
6	notes for lectures in physiography, mostly for Geology III students	1894-1905
7	notes for lectures in palaeontology, especially for Geology III students; includes notes on microscopy, possibly for laboratory classes	1892-1900
8	notes on graptolites	undated
9	notes for lectures on the Geology of South Africa (date: 1913), Timor (1914) and New Zealand (1920)	1913-1920
10	notes for lectures on mineralogy	1892-1903
11	notes for lectures on "Climates of the Geological Past" (1919-1920) and glaciation (1907-1920)	1907-1920
12	notes for lectures on the Permocarboneferous and miscellaneous subjects	1892-1924
13	notes for lectures on structural geology, fjords, lakes	1894-1915
14	postulated to have been written for lectures - notes from "Das Antlitz der Erde" by Suess (6 vol), "Geotektonische Probleme" by Rothpletz (1 vol), "Beitrage zur Kenntniss der Tertiärflora Australiensis" by von Ettinghausen (1 vol)	undated
15	synopses of lectures	1895-1920
16	synopses of lectures	1921-1928
17	synopses of David's lectures given under the auspices of	1909-1910

P.011 DAVID Tannatt William Edgeworth

SERIES 40

Item Number	Description	Date Range
	Sydney University Extension Board; many are not dated; itinerary for David's visit to Perth in 1910; series 41 contains the annual report of the Extension Board for 1909-10	
18	lecture notes on "Savagery and Civilization", presumably written for lectures given in Western Australia in Perth under the auspices of the Sydney University Extension Board and in Boulder under the auspices of the Boulder Brotherhood	1910
19	notes for a series of lectures given at the University of London; copies of posters advertising the lectures	1926
20	Coral Reefs, paeleontology	n.k.

P.011 DAVID Tannatt William Edgeworth

Series 41 Miscellaneous working papers/printed matter

Date Range: 1909 - 1920

Accessions: 1/24

Quantity: 0.06

Item List: no

Series Description:

About half the series consists of draft scripts written by David on the teaching of geography. There is a 7 page outline of a course of lectures in economic geology by LK Ward. Other documents written by David on the teaching of geography are in series 42.

One-third of the papers are reports (manuscript in David's hand and typescript) on research work submitted by Loftus Hills to the University of Tasmania for the degree of DSc and a thesis by WH Bryan. Also copies of class timetables for 1919 and 1920, a published address by David "University Science Teaching" 1902, and manuscript notes ascribed to E R Holmes, copies of annual reports of the Sydney University Extension Board for 1909-10 and 1919-20.

P.011 DAVID Tannatt William Edgeworth

Series 42 Working papers/ letters received

Date Range: 1892 - 1929

Accessions: 1/24

Quantity: 0.05

Item List: no

Series Description:

Correspondence dates from 1892 to 1929. It includes a printed report on the Conference of Inspectors, Teachers, Department Officers and Prominent Educationalists held by the NSW Dept of Public Instruction in April 1904, at which David was one of the representatives of the University of Sydney. Also correspondence (1914, 1928-9) pertaining to the Chair of Geography and the establishment of a senior lectureship in Entomology. Working papers comprise half the series. About half are dated 1914; they pertain to the genesis of the Women's Union and the Macleay Museum. Papers relating to the University Staff National Service Committee are thought to date from circa 1914. Papers relating to the teaching of geography are probably related to scripts in series 41.

P.011 DAVID Tannatt William Edgeworth

Series 43 Australasian Association for the Advancement of Science/ related

Date Range: 1910 - 1928

Accessions: 1/24

Quantity: 0.10

Item List: no

Series Description:

Over two-thirds of the series pertains to the Australasian Association for the Advancement of Science (AAAS). The papers date from 1892 to 1928. They include notes for David's presidential address at the AAAS meeting in Dunedin in 1904, and working papers pertaining to the Antarctic Committee and the Glacial Research Committee. The latter includes two extra large folios arranged as item 2.

Scripts written for David's presidential address to the meeting of AAAS in Melbourne in 1913 are arranged in Series 31 item 4. Many scripts are in hands other than David's, including a manuscript by W Howchin: 4 extra large folios (item 1). There is an annotated typescript of a presidential address by Launcelot Harrison.

In 1914, the British Association for the Advancement of Science (BAAS) held its one, and only, meeting in Australia. Events were held in various states. The papers in this series were compiled by David in his capacity as Chairman of the NSW Committee. The AAAS, founded in 1888, was the forerunner of ANZAAS. The BAAS dated from 1831.

Series 44 Australian National Research Council/ Royal Society of NSW/ Gr

Date Range: 1907 - 1933

Accessions: 1/24

Quantity: 0.11

Item List: no

Series Description:

Records created/collated by David in his capacity as member of the Australian National Research Council (ANRC) date from 1919 to 1931; quantity: 3 cm. They include David's annotated copies of papers relating to the establishment of the Chair of Anthropology; see also series 51 item 2.

The role of the ANRC in the establishment of the Chair of Anthropology at the University of Sydney is noted in the presidential address by Charles Anderson to the Royal Society of NSW in 1925 published in volume LIX of the Journal of the Society. The proposal for a Chair of Anthropology in Australia was the outcome of a resolution passed by the Pan Pacific Science Congress held in Australia in 1923. The Australian Government "undertook to provide an annual sum of 1000 pounds sterling if the States would subscribe the necessary balance" (page 14). In the presidential address to the Royal Society of NSW in 1926, Robert Watt cited as one of two notable achievements of the ANRC "securing of the necessary co-operation between the States to enable a Chair of Anthropology to be established in the University of Sydney" (page 13).

David was the first president of the ANRC. The ANRC was established in 1919 by representatives of the leading scientific societies in Australia in the form of a provisional council. This was in response to a request from the International Research Council which was founded as an outcome of a conference held in 1918 at the Royal Society in London. The first permanent ANR Council was elected by the Council of AAAS in 1921.

Documents pertaining to the Royal Society of NSW date from 1900 to 1932 and include notes for lectures. See also series 31.

Records pertaining to David's membership of the Great Barrier Reef Committee date from 1924 to 1933; they are mostly correspondence received; there are a few copies of letters sent, apparently, by David. According to the oldest letter received, the Great Barrier Reef Committee was inaugurated in 1922 by the Royal Geographical Society of Australasia, Queensland. Other records document the Conference of Australian Universities 1920 Meeting (quantity=1cm), the Meteorological Conference 1907, the Solar-Radiation Station Sydney 1921.

P.011 DAVID Tannatt William Edgeworth

Series 45 Australian Imperial Forces - field notebooks,maps.

Date Range: 1914 - 1920

Accessions: 1/24; 1/69; 1354.

Quantity: 0.44

Item List: no

Series Description:

Papers received or authored by David in his capacity as an officer in the Australian Infantry Forces, initially as a major in the Mining Corps and later as a lieutenant-colonel and geologist to the Engineer-in-chief. There are two items of papers in their original folders, one labelled "Ashford Tubes", the other "Alfred H Brooks"... "German Geology"; correspondence received by David from Brooks has been retained in this folder. Brooks was appointed geologist to the American armies in 1917.

The series comprises 24 field notebooks, date range: 1915-1919 (items 1-24);

Correspondence received, 1914-1920, (item 25);

Lecture notes, hand-written in ink, dated April 1916, on the geology of the Western Front given on the TSS "Ulysses" (item 26);

Working papers (items 27-29, item 29 includes outsize sketch on tracing paper);

Photographic prints (4 bundles; items 30-33);

Printed matter, some annotated by David (items 34-36);

Published maps (1 box of folded maps : item 37);

1 folder of maps (Item 38)

Other records relating to David's war service may be found in Series 46, 47,48,49, and 50.

P.011 DAVID Tannatt William Edgeworth

Series 46 Letters received/ manuscript

Date Range: 1901 - 1934

Accessions: 1/24; 1/69

Quantity: 0.06

Item List: no

Series Description:

Only 1 letter is dated earlier than 1914.

About half of the series is correspondence related to David's service in the Great War of 1914-18 (date range of records : 1916-1934).

The series includes a 24 page, unsigned manuscript on the Australian Tunnelling Company. It is assumed that this is the script for a speech given at the annual reunion of the Old Comrades Association in 1934 at which speeches were made by Australia's official War Historian CEW Bean, the secretary of the Old Comrades Association J MacD. Royle, General Harvey and David. Correspondence received from the Old Comrades Association in this series includes Harvey's address (a 2 page typescript). Manuscript of David's speech is in series 49. A few letters are from relations of David; these have been arranged separately.

P.011 DAVID Tannatt William Edgeworth

Series 51 Letters authored by David - originals/ copy/ drafts

Date Range: 1883 - 1934

Accessions: 1/24; 1/69

Quantity: 0.11

Item List: no

Series Description:

Most of the series consist of copies of typed letters, presumed to have been authored and sent by David (items 3-6). The majority of the papers are dated 1928-1929. About 20% are dated between 1930 and 1934; about 10% are dated 1920-1926. Most were written after David retired from the University of Sydney. Many letters are addressed to David's research colleagues.

Correspondence authored by David and relating to the British Antarctic Expedition 1907-09 or to the Coral Boring expeditions to Funafuti in 1897-1898 or to David's research on fossil fauna in the Adelaide series of rock in South Australia have been arranged separately in series 7, 10, 11, and 16. Undated drafts and working papers comprise about 5% of the series. Letters which appear to be originals date from 1883 to 1934; most pertain to David's war service; it is not known if these letters were returned to David or given to his daughter, Miss Mary David, at a later date; moreover, it is not known if some of the letters are actually drafts. Other original letters in David's hand are located in ser 10; they pertain to the Coral Boring Expedition to Funafuti 1897-98.

P.011 DAVID Tannatt William Edgeworth

Series 52 Collection of press cuttings/ other printed matter, most referring to

Date Range: 1903 - 1933

Accessions: 1/24

Quantity: 0.02

Item List: no

Series Description:

Most of the series are copies of press cuttings which refer to David. They date from 1903 to 1933, with an especially large number dating 1921-1923. There are collections of cuttings pertaining to David's interest in the antiquity of man (refer to related working papers in series 24, items 15-17 and series 31, item 6) and earth tremors (refer to series 24 items 2, 3, 6b and lecture notes in series 40). Collections of cuttings pertaining to Antarctica are located in series 6 (British Antarctic Expedition 1907-09), series 9 (Australian Antarctic Expedition 1911-14, Amundsen's and other expeditions to Antarctica and control of Antarctica by Australia) and series 14 (expeditions to Funafuti 1897-98). Copies of articles authored by David and published in the daily press are arranged with copies of other research publications of David in series 26.
