Hicks, C., Ramos, L., Dampney, B., Baraczi, S., McGregor, I., Hunt, G. (2016). Regional c-Fos expression induced by peripheral oxytocin administration is prevented by the role of handling and oxytocin receptors. *Evidence Check: Pharmacological actions and associated therapeutic levels of phytocannabinoids*, (pp. 1 - 81). Sydney, Australia: The Sax Institute.

Deprived Rats.

Neuroscience Letters

Suppressed By A Cannabinoid Receptor Antagonist In Non-

High Carbohydrate, High Fat, And Normal Chow Is Equally

Consume Alcohol In Rats.

Dose Treatment With Opioid And Cannabinoid Receptor

Combined Low

Oral Theraies For Alcohol Craving,.

Evidence For An Interaction Between Cb1 Cannabinoid And

Melanocortin MCR-4 Receptors In Regulating Food Intake.

Endocrinology, 145(7), 3224-3231.

Evidence For An Interaction Between Cb1 Cannabinoid And

Oxytocin Receptors In Food And Water Intake.

Neuropharmacology, 47(4), 593-603.

Preexposure To Mdma ('Ecstasy') Delays Acquisition But Facilitates Mdma-Induced Reinstatement Of Amphetamine Self-Administration Behavior In Rats. Pharmacology, Biochemistry and Behavior, 79(2), 331-342.

Evidence For An Interaction Between Cb1 Cannabinoid And

Oxytocin Receptors In Food And Water Intake.
