

Publications for Jennifer Chan

2019

Chan, J., Ng, K., Ragell, R. (2019). Bayesian return forecasts using realised range and asymmetric CARR model with various distribution assumptions. *International Review of Economics and Finance*, 61(May 2019), 188-212. [More Information]

Chan, J., Ng, K., Nitithumbundit, T., Peiris, M. (2019). Efficient estimation of financial risk by regressing the quantiles of parametric distributions: An application to CARR models. *Studies in Nonlinear Dynamics and Econometrics*, 23(2), 1-22. [More Information]

Phillip, A., Chan, J., Peiris, M. (2019). On long memory effects in the volatility measure of Cryptocurrencies. *Finance Research Letters*, 28, 95-100. [More Information]

Tan, S., Ng, K., Chan, J., Mohamed, I. (2019). Quantile range-based volatility measure for modelling and forecasting volatility using high frequency data. *North American Journal of Economics and Finance*, 47, 537-551. [More Information]

2018

Phillip, A., Chan, J., Peiris, M. (2018). A new look at Cryptocurrencies. *Economics Letters*, 163, 6-9. [More Information]

Phillip, A., Chan, J., Peiris, M. (2018). Bayesian estimation of Gegenbauer long memory processes with stochastic volatility: methods and applications. *Studies in Nonlinear Dynamics and Econometrics*, 22(3), 1-29. [More Information]

Chan, J., Choy, S., Makov, U., Landsman, Z. (2018). Modelling Insurance Losses Using Contaminated Generalised Beta Type-II Distribution. *Astin Bulletin*, 48(2), 871-904. [More Information]

2017

Ng, K., Peiris, M., Chan, J., Allen, D., Ng, K. (2017). Efficient modelling and forecasting with range based volatility models and its application. *North American Journal of Economics and Finance*, 42, 448-460. [More Information]

2016

Yatigammana, R., Choy, S., Chan, J. (2016). Autoregressive Conditional Duration Model with an Extended Weibull Error Distribution. In Van-Nam Huynh, Vladik Kreinovich, Songsak Sriboonchitta (Eds.), *Causal Inference in Econometrics*, (pp. 83-107). Cham: Springer. [More Information]

Chan, J., Wan, W. (2016). Bayesian analysis of Cannabis offences using generalized Poisson geometric process model

with flexible dispersion. *Journal of Statistical Computation and Simulation*, 86(16), 3315-3336. [More Information]

Chan, J. (2016). Bayesian informative dropout model for longitudinal binary data with random effects using conditional and joint modeling approaches. *Biometrical Journal*, 58(3), 549-569. [More Information]

Choy, S., Chan, J., Makov, U. (2016). Robust Bayesian analysis of loss reserving data using scale mixtures distributions. *Journal of Applied Statistics*, 43(3), 396-411. [More Information]

2015

Yatigammana, R., Choy, S., Chan, J. (2015). Autoregressive conditional duration model with an extended weibull error distribution. *Studies in Computational Intelligence*, 622, 83-107. [More Information]

Chan, J. (2015). Predicting loss reserves using quantile regression Running title: Quantile regression loss reserve models. *Journal of Data Science*, 13(1), 127-156.

Dong, A., Chan, J., Peters, G. (2015). Risk margin quantile function via parametric and non-parametric Bayesian approaches. *Astin Bulletin*, 45(3), 503-550. [More Information]

2014

Chan, J., Wan, W., Yu, P. (2014). A Poisson geometric process approach for predicting drop-out and committed first-time blood donors. *Journal of Applied Statistics*, 41(7), 1486-1503. [More Information]

Chan, J., Lam, C., Choy, S. (2014). An Innovative Financial Time Series Model: The Geometric Process Model. In Van-Nam Huynh, Vladik Kreinovich, Songsak Sriboonchitta (Eds.), *Modeling Dependence in Econometrics*, (pp. 81-99). Cham: Springer. [More Information]

Chan, J. (2014). Analysis of Correlation Structures using Generalized Estimating Equation Approach for Longitudinal Binary Data. *Journal of Data Science*, 12, 293-305.

Chan, J., Choy, S., Lam, C. (2014). Modeling Electricity Price Using A Threshold Conditional Autoregressive Geometric Process Jump Model. *Communications in Statistics - Theory and Methods*, 43(10-12), 2505-2515. [More Information]

Chan, J., Wan, W. (2014). Multivariate generalized Poisson geometric process model with scale mixtures of normal distributions. *Journal of Multivariate Analysis*, 127, 72-87. [More Information]

Information]

2013

Dong, X., Chan, J. (2013). Bayesian analysis of loss reserving using dynamic models with generalized beta distribution. *Insurance: Mathematics and Economics*, 53, 355-365. [More Information]

Rosner, B., Peiris, M., Chan, J., Marchev, D. (2013). *MATH1015: Biostatistics*. Sydney: Cengage Learning.

Wang, J., Choy, S., Chan, J. (2013). Modelling Stochastic Volatility using Generalized t distribution. *Journal of Statistical Computation and Simulation*, 83(2), 340-354. [More Information]

Jones, C., Kemp, R., Chan, J. (2013). The relationship between delay discounting, judicial supervision, and substance use among adult drug court clients. *Psychology, Public Policy, and Law*, 19(4), 454-465. [More Information]

2012

Chan, J., Lam, C., Yu, P., Choy, S., Chen, C. (2012). A Bayesian conditional autoregressive geometric process model for range data. *Computational Statistics and Data Analysis*, 56(11), 3006-3019. [More Information]

2011

Chen, C., Chan, J., Gerlach, R., Hsieh, W. (2011). A comparison of estimators for regression models with change points. *Statistics and Computing*, 21(3), 395-414. [More Information]

Wan, W., Chan, J. (2011). Bayesian analysis of robust Poisson geometric process model using heavy-tailed distributions. *Computational Statistics and Data Analysis*, 55(1), 687-702. [More Information]

Chan, J., Wan, W. (2011). Bayesian approach to analysing longitudinal bivariate binary data with informative dropout. *Computational Statistics*, 26(1), 121-144. [More Information]

Chen, C., Chan, J., So, M., Lee, K. (2011). Classification in segmented regression problems. *Computational Statistics and Data Analysis*, 55(7), 2276-2287. [More Information]

Wang, J., Chan, J., Choy, S. (2011). Stochastic Volatility Models with Leverage and Heavy-Tailed Distributions: A Bayesian Approach Using Scale Mixtures. *Computational Statistics and Data Analysis*, 55(1), 852-862. [More Information]

2010

Chan, J., Leung, D. (2010). Binary geometric process model for the modeling of longitudinal binary data with trend. *Computational Statistics*, 25, 505-536. [More Information]

2009

Wan, W., Chan, J. (2009). A New Approach for Handling Longitudinal Count Data with Zero-Inflation and Overdispersion: Poisson Geometric Process Model. *Biometrical Journal*, 51(4), 556-570. [More Information]

Choy, S., Chan, J., Makov, U. (2009). Model selection for loss reserves: The growing triangle technique. *Risk, Life and Pensions*, 5, 35-40.

Chan, J., Leung, D., Choy, S., Wan, W. (2009). Nonignorable dropout models for longitudinal binary data with random effects: An application of Monte Carlo approximation through the Gibbs output. *Computational Statistics and Data Analysis*, 53(12), 4530-4545. [More Information]

2008

Chan, J., Choy, S. (2008). Analysis of covariance structures in time series. *Journal of Data Science*, 6(4), 573-589.

Chan, J., Choy, S. (2008). Analysis of covariance structures in time series. *Journal of Data Science*, 6(4), 573-589.

Choy, S., Chan, J. (2008). Bayesian analysis of stochastic of volatilities using the generalized-t distribution. *Joint Meeting of 4th World Conference of the IASC and 6th Conference of the Asian Regional Section of the IASC on Computational Statistics & Data Analysis*, Yokohama.

Chan, J., Choy, S., Makov, U. (2008). Robust Bayesian Analysis of Loss Reserves Data using the Generalized-t Distribution. *Astin Bulletin*, 38(1), 207-230. [More Information]

Choy, S., Chan, J. (2008). Scale mixtures distributions in statistical modelling. *Australian and New Zealand Journal of Statistics*, 50(2), 135-146. [More Information]

Chan, J., Lam, C., Chen, C., Choy, S. (2008). Threshold geometric process model for financial time series. *Joint Meeting of 4th World Conference of the IASC and 6th Conference of the Asian Regional Section of the IASC on Computational Statistics & Data Analysis*, Yokohama.

2007

Chan, J., Choy, S., Lee, A. (2007). Bayesian analysis of constant elasticity of variance models. *Applied Stochastic Models in Business and Industry*, 23(1), 83-96. [More Information]

Chan, J., Choy, S., Lee, A. (2007). Bayesian analysis of constant elasticity of variance models. *Applied Stochastic Models in Business and Industry*, 23(1), 83-96. [More Information]

Yu, P., Chung, K., Lin, C., Chan, J., Lee, C. (2007). Predicting potential drop-out and future commitment for first time donors based on first 1.5-year donation patterns: the case in Hong Kong Chinese Donors. *Vox Sanguinis*, 93(1), 57-63. [More Information]

2006

Chan, J., Yu, P., Lam, Y., Ho, A. (2006). Modelling SARS data

using threshold geometric process. *Statistics in Medicine*, 25(11), 1826-1839. [More Information]

Yu, P., Chan, J., Fung, W. (2006). Statistical Exploration from SARS. *The American Statistician*, 60(1), 81-91. [More Information]

2005

Chan, J., Kuk, A., Yam, C. (2005). Monte Carlo Approximation through Gibbs output in Generalized linear mixed models. *Journal of Multivariate Analysis*, 94(2), 300-312. [More Information]

2004

Lam, Y., Zhu, L., Chan, J., Liu, Q. (2004). Analysis of Data from a Series of Events by a Geometric Process Model. *Acta Mathematicae Applicatae Sinica*, 20(2), 263-282. [More Information]

Chan, J., Yeh, L., Leung, D. (2004). Statistical inference for geometric processes with gamma distributions. *Computational Statistics and Data Analysis*, 47(3), 565-581. [More Information]

2003

Choy, S., Chan, J., Yam, C. (2003). Robust analysis of salamander data, Generalized Linear model with random effects. *7th Valencia International Meeting on Bayesian Statistics*, New York: Oxford University Press.

2001

Kuk, A., Chan, J. (2001). Three ways of implementing the EM algorithm when parameters are not identifiable. *Biometrical Journal*, 43(2), 207-218.

2000

Chan, J. (2000). Initial Stage Problem in Autoregressive Binary Regression. *Journal of the Royal Statistical Society: Series D (The Statistician)*, 49(4), 495-502. [More Information]

1998

Lam, Y., Chan, J. (1998). Statistical inference for geometric processes with lognormal distribution. *Computational Statistics and Data Analysis*, 27(1), 99-112. [More Information]

Chan, J., Kuk, A., Bell, J., Gilchrist, C. (1998). The Analysis of Methadone Clinic Data Using Marginal and Conditional Logistic Models with Mixture or Random Effects. *Australian & New Zealand Journal of Statistics*, 40(1), 1-10. [More Information]

1997

Chan, J., Kuk, A., Bell, J. (1997). A likelihood approach to analysing longitudinal bivariate binary data. *Biometrical Journal*, 39(4), 409-421. [More Information]

Chan, J., Kuk, A. (1997). Maximum likelihood estimation for probit-linear mixed models with correlated random effects. *Biometrics*, 53(1), 86-97.

Bell, J., Mattick, R., Hay, A., Chan, J., Hall, W. (1997). Methadone maintenance and drug-related crime. *Journal of Substance Abuse Treatment*, 9, 15-25. [More Information]

1995

Bell, J., Ward, J., Mattick, R., Hay, A., Chan, J., Hall, W. (1995). *An evaluation of private methadone clinics*.

Bell, J., Chan, J., Kuk, A. (1995). Investigating the influence of treatment philosophy on outcome of methadone maintenance. *Addiction*, 90, 823-830. [More Information]
