

Publications for John Robinson

2018

Samonenko, I., Robinson, J. (2018). A new permutation test statistic for K-sample multivariate designs. *Australian and New Zealand Journal of Statistics*, 60(1), 132-139. [More Information]

2017

Samonenko, I., Robinson, J. (2017). A likelihood ratio like permutation test for one way designs. *Journal of Nonparametric Statistics*, 29(3), 515-530. [More Information]

Jermiin, L., Jayaswal, V., Ababneh, F., Robinson, J. (2017). Identifying Optimal Models of Evolution. In Jonathan M Keith (Eds.), *Bioinformatics: Volume I: Data, Sequence Analysis, and Evolution (Second Edition)*, (pp. 379-420). New York: Humana Press. [More Information]

Kolassa, J., Robinson, J. (2017). Nonparametric tests for multi-parameter M-estimators. *Journal of Multivariate Analysis*, 158(June 2017), 103-116. [More Information]

Robinson, J. (2017). On multivariate Edgeworth expansions - Introduction. In Nancy Reid, Torben Martinussen (Eds.), *Inference, Asymptotics, and Applications: Selected Papers of Ib Michael Skovgaard, with Introductions by his Colleagues*, (pp. 37-40). Singapore: World Scientific Publishing Co. Pte. Ltd.

Robinson, J., Welsh, A. (2017). Peter Gavin Hall 1951-2016. *Historical Records of Australian Science*, 28, 171-182. [More Information]

2015

Samonenko, I., Robinson, J. (2015). A New Permutation Test Statistic for Complete Block Designs. *Annals of Statistics*, 43(1), 90-101. [More Information]

2014

Jayaswal, V., Wong, T., Robinson, J., Poladian, L., Jermiin, L. (2014). Mixture Models of Nucleotide Sequence Evolution that Account for Heterogeneity in the Substitution Process Across Sites and Across Lineages. *Systematic Biology*, 63(5), 726-742. [More Information]

Vera-Ruiz, V., Lau, K., Robinson, J., Jermiin, L. (2014). Statistical tests to identify appropriate types of nucleotide sequence recoding in molecular phylogenetics. *BMC Bioinformatics*, 15(Suppl 2), 1-11. [More Information]

Burke, W., Robinson, J. (2014). The Occurrence of Migraine Auras and Possible Triggers. *Health*, 6(19), 2688-2696. [More Information]

2013

Field, C., Robinson, J. (2013). Relative Errors for Bootstrap Approximations of the Serial Correlation Coefficient. *Annals of Statistics*, 41(2), 1035-1053. [More Information]

2012

Hu, Z., Robinson, J., Wang, Q. (2012). Tail approximations for samples from a finite population with applications to permutation tests. *ESAIM: Probability and Statistics*, 16, 425-435. [More Information]

2011

Ma, C., Robinson, J. (2011). Lot acceptance and compliance testing based on the sample mean and minimum/maximum. *Journal of Statistical Planning and Inference*, 141, 2440-2448. [More Information]

Jayaswal, V., Ababneh, F., Jermiin, L., Robinson, J. (2011). Reducing Model Complexity of the General Markov Model of Evolution. *Molecular Biology and Evolution*, 28(11), 3045-3059. [More Information]

Kolassa, J., Robinson, J. (2011). Saddlepoints approximations for likelihood ratio like statistics with applications to permutation tests. *Annals of Statistics*, 39(6), 3357-3368. [More Information]

Jayaswal, V., Jermiin, L., Poladian, L., Robinson, J. (2011). Two Stationary Nonhomogeneous Markov Models of Nucleotide Sequence Evolution. *Systematic Biology*, 60(1), 74-86. [More Information]

2009

Huang, A., Jin, R., Robinson, J. (2009). Robust permutation tests for two samples. *Journal of Statistical Planning and Inference*, 139(8), 2631-2642. [More Information]

2008

Hu, Z., Ma, C., Robinson, J. (2008). Empirical saddlepoint approximations of the Studentized mean under stratified random sampling. *Statistics and Probability Letters*, 78(4), 396-401. [More Information]

Petrov, V., Robinson, J. (2008). Large deviations for sums of independent non identically distributed random variables. *Communications in Statistics - Theory and Methods*, 37(18), 2984-2990. [More Information]

Borovskikh, Y., Robinson, J. (2008). Large deviations of bootstrapped U-statistics. *Journal of Multivariate Analysis*, 99,

1793-1806. [More Information]

Jermiin, L., Jayaswal, V., Ababneh, F., Robinson, J. (2008). Phylogenetic Model Evaluation. In Jonathan M Keith (Eds.), *Bioinformatics; Volume 1: Data, Sequence Analysis and Evolution*, (pp. 331-364). New Jersey: Humana Press. [More Information]

Field, C., Robinson, J., Ronchetti, E. (2008). Saddlepoint approximation for multivariate M-estimates with applications to bootstrap accuracy. *Annals of the Institute of Statistical Mathematics*, 60(1), 205-224. [More Information]

Perera, D., Peiris, M., Robinson, J., Weber, N. (2008). The empirical saddlepoint method applied to testing for serial correlation in panel time series data. *Statistics and Probability Letters*, 78(17), 2876-2882. [More Information]

2007

Kolassa, J., Robinson, J. (2007). Conditional saddlepoint approximations for non-continuous and non-lattice distributions. *Journal of Statistical Planning and Inference*, 137(1), 133-147. [More Information]

Hu, Z., Robinson, J., Wang, Q. (2007). Cramer-Type Large Deviations for Samples from a Finite Population. *Annals of Statistics*, 35(2), 673-696. [More Information]

Hu, Z., Robinson, J., Wang, Q. (2007). Edgeworth expansions for a sample sum from a finite set of independent random variables. *Electronic Journal of Probability*, 12(Paper no. 52), 1402-1417. [More Information]

Jayaswal, V., Robinson, J., Jermiin, L. (2007). Estimation of Phylogeny and Invariant Sites under the General Markov Model of Nucleotide Sequence Evolution. *Systematic Biology*, 56(2), 155-162. [More Information]

Hu, Z., Petrov, V., Robinson, J. (2007). On large deviations of sums of independent random variables. *Communications in Statistics - Theory and Methods*, 36(10), 1981-1992. [More Information]

2006

Fung, H., Robinson, J. (2006). Continuity corrections for integer-valued saddlepoint approximations. *Statistics and Probability Letters*, 76(14), 1465-1469. [More Information]

Ababneh, F., Jermiin, L., Robinson, J. (2006). Generation of the Exact Distribution and Simulation of Matched Nucleotide Sequences on a Phylogenetic Tree. *Journal of Mathematical Modelling and Algorithms*, 5(3), 291-308. [More Information]

Ababneh, F., Jermiin, L., Ma, C., Robinson, J. (2006). Matched-pairs tests of homogeneity with applications to homologous

nucleotide sequences. *Bioinformatics*, 22(10), 1225-1231. [More Information]

Perera, D., Peiris, M., Robinson, J., Weber, N. (2006). Saddlepoint approximation methods for testing of serial correlation in panel time series data. *Journal of Statistical Computation and Simulation*, 76(11), 1001-1015. [More Information]

2005

Agho, K., Dai, W., Robinson, J. (2005). Empirical saddlepoint approximations of the Studentized ratio and regression estimates for finite populations. *Statistics and Probability Letters*, 71(3), 237-247. [More Information]

Jayaswal, V., Jermiin, L., Robinson, J. (2005). Estimation of phylogeny using a general Markov model. *Evolutionary Bioinformatics*, 1, 62-80.

Stewart, M., Robinson, J. (2005). Extremes of normed empirical moment generating function processes. *Extremes: Statistical Theory and Applications in Science Engineering and Economics*, 6, 319-333.

Welsh, A., Robinson, J. (2005). Fisher and inference for scores. *International Statistical Review*, 73(1), 131-150. [More Information]

Robinson, J., Wang, Q. (2005). On the Self-Normalized Cramer-type Large Deviation. *Journal of Theoretical Probability*, 18(4), 891-909. [More Information]

2004

Robinson, J. (2004). Multivariate Tests Based On Empirical Saddlepoint Approximations. *Metron - International Journal of Statistics*, LXII (1), 1-14.

Jermiin, L., Ho, S., Ababneh, F., Robinson, J., Larkum, A. (2004). The Biasing Effect Of Compositional Heterogeneity On Phylogenetic Estimates May Be Underestimated. *Systematic Biology*, 53(4), 638-643. [More Information]

2003

Anderson, M., Robinson, J. (2003). Generalized discriminant analysis based on distances. *Australian and New Zealand Journal of Statistics*, 45(3), 301-318. [More Information]

Jermiin, L., Ho, S., Ababneh, F., Robinson, J., Larkum, A. (2003). Hetero: a program to simulate the evolution of DNA on a four-taxon tree. *Applied Bioinformatics*, 2(3), 159-163.

Jin, R., Robinson, J. (2003). Robust permutation tests for one sample. *Journal of Statistical Planning and Inference*, 116(2), 475-487. [More Information]

Robinson, J., Ronchetti, E., Young, G. (2003). Saddlepoint approximations and tests based on multivariate M-estimates. *Annals of Statistics*, 31(4), 1154-1169. [More Information]

Jin, R., Robinson, J. (2003). Saddlepoint approximations of the two-sample Wilcoxon statistic. *Symposium in Honor of the 70th*

2002

Jing, B., Kolassa, J., Robinson, J. (2002). Partial saddlepoint approximations for transformed means. *Scandinavian Journal of Statistics: theory and applications*, 29(4), 721-731. [More Information]

2001

Robinson, J., Dai, W. (2001). Empirical saddlepoint approximations of the Studentized mean under simple random sampling. *Statistics and Probability Letters*, 53, 331-337.

Anderson, M., Robinson, J. (2001). Permutation tests for linear models. *Australian and New Zealand Journal of Statistics*, 43, No. 1, 75-88.
