

Publications for Ruibin Zhang

2019

Coulembier, K., Zhang, R. (2019). Borelic pairs for stratified algebras. *Advances in Mathematics*, 345, 53-115. [More Information]

2018

Xu, Y., Zhang, R. (2018). Quantum correspondences of affine Lie superalgebras. *Mathematical Research Letters*, 25(3), 1009-1036.

Xu, Y., Zhang, R. (2018). Quantum correspondences of affine Lie superalgebras. *Mathematical Research Letters*, 25(3), 1009-1036.

Deligne, P., Lehrer, G., Zhang, R. (2018). The first fundamental theorem of invariant theory for the orthosymplectic super group. *Advances in Mathematics*, 327, 4-24. [More Information]

2017

Lehrer, G., Zhang, R. (2017). Invariants of the orthosymplectic Lie superalgebra and super Pfaffians. *Mathematische Zeitschrift*, 286, 893-917. [More Information]

Lehrer, G., Zhang, R. (2017). The First Fundamental Theorem of Invariant Theory for the Orthosymplectic Supergroup. *Communications in Mathematical Physics*, 349(2), 661-702. [More Information]

2016

Su, Y., Zhang, R. (2016). Erratum to Character and Dimension Formulae for Queer Lie Superalgebra [Commun. Math. Phys., (2015), 333, (1465-1481), DOI 10.1007/s00220-014-2209-4]. *Communications in Mathematical Physics*, 342(2), 769-770. [More Information]

Su, Y., Zhang, R. (2016). Generalised Jantzen filtration of exceptional Lie superalgebras. *Israel Journal of Mathematics*, 212(2), 635-676. [More Information]

Wu, Y., Zhang, R. (2016). Integrable representations of affine $A(m, n)$ and $C(m)$ superalgebras. *Journal of Pure and Applied Algebra*, 220(4), 1434-1450. [More Information]

Wu, Y., Zhang, R. (2016). Integrable representations of the quantum affine special linear superalgebra. *Advances in Theoretical and Mathematical Physics*, 20(3), 553-593. [More Information]

2015

Andersen, H., Lehrer, G., Zhang, R. (2015). Cellularity of certain quantum endomorphism algebras. *Pacific Journal of Mathematics*, 279(1), 11-35. [More Information]

Information]

Su, Y., Zhang, R. (2015). Character and Dimension Formulae for Queer Lie Superalgebra. *Communications in Mathematical Physics*, 333, 1465-1481. [More Information]

Lehrer, G., Zhang, R. (2015). The Brauer category and invariant theory. *Journal of the European Mathematical Society*, 17(9), 2311-2351. [More Information]

2014

Zhang, R. (2014). Serre presentations of Lie superalgebras. In Maria Gorelik, Paolo Papi (Eds.), *Advances in Lie Superalgebras*, (pp. 235-280). Cham, Switzerland: Springer. [More Information]

2013

Xia, C., Zhang, R. (2013). Unitary highest weight modules over block type lie algebras $B(q)$. *Journal of Lie Theory*, 23(1), 159-176.

2012

Chaichian, M., Tureanu, A., Zhang, R. (2012). Extended Poincaré supersymmetry in three dimensions and supersymmetric anyons. *Journal of Mathematical Physics*, 53(7), 1-8. [More Information]

Su, Y., Zhang, R. (2012). Generalised Jantzen filtration of Lie superalgebras I. *Journal of the European Mathematical Society*, 14(4), 1103-1133. [More Information]

Su, Y., Zhang, R. (2012). Generalised Verma modules for the orthosymplectic Lie superalgebra $osp|2$. *Journal of Algebra*, 357, 94-115. [More Information]

Coulembier, K., Zhang, R. (2012). Invariant integration on orthosymplectic and unitary supergroups. *Journal of Physics A: Mathematical and Theoretical*, 45(2012), 1-32. [More Information]

Lehrer, G., Zhang, R. (2012). Quantum group actions on rings and equivariant K -theory. *Contemporary Mathematics*, 565, 115-141. [More Information]

Lehrer, G., Zhang, R. (2012). The second fundamental theorem of invariant theory for the orthogonal group. *Annals of Mathematics*, 176(3), 2031-2054. [More Information]

2011

Lehrer, G., Zhang, H., Zhang, R. (2011). A Quantum Analogue of the First Fundamental Theorem of Classical Invariant Theory. *Communications in Mathematical Physics*, 301, 131-174. [More Information]

Lehrer, G., Nakano, D., Zhang, R. (2011). Detecting cohomology for Lie superalgebras. *Advances in Mathematics*, 228(4), 2098-2115. [More Information]

Meng, G., Zhang, R. (2011). Generalized MICZ-Kepler problems and unitary highest weight modules. *Journal of Mathematical Physics*, 52(4), 042106-1-042106-23. [More Information]

Lam, N., Zhang, R. (2011). u-Cohomology formula for unitarizable modules over general linear superalgebras. *Journal of Algebra*, 327(1), 50-70. [More Information]

2010

Lehrer, G., Zhang, R. (2010). A Temperley-Lieb Analogue for the BMW Algebra. In A Gyoja, H Nakajima, K Shinoda, T Shoji, T Tanisaki (Eds.), *Representation Theory of Algebraic Groups and Quantum Groups*, (pp. 155-190). New York: Birkhauser (imprint of Springer). [More Information]

Sun, W., Wang, D., Xie, N., Zhang, R., Zhang, X. (2010). Gravitational collapse of spherically symmetric stars in noncommutative general relativity. *European Physical Journal C*, 69, 271-279. [More Information]

Zhang, R., Zhang, X. (2010). Projective module description of embedded noncommutative spaces. *Reviews in Mathematical Physics: a journal for survey and expository articles in the field of mathematical physics*, 22(5), 507-531. [More Information]

Ke, W., Lai, K., Zhang, R. (2010). Quantum codes from Hadamard matrices. *Linear and Multilinear Algebra*, 58(7), 847-854. [More Information]

Liu, X., Zhang, R. (2010). Topological vortices in chiral gauge theory of graphene. *Annals of Physics*, 325, 384-391. [More Information]

2009

Wang, D., Zhang, R., Zhang, X. (2009). Exact solutions of noncommutative vacuum Einstein field equations and plane-fronted gravitational waves. *European Physical Journal: Applied Physics*, 64, 439-444. [More Information]

Wang, D., Zhang, R., Zhang, X. (2009). Quantum deformations of Schwarzschild and Schwarzschild-de Sitter spacetimes. *Classical and Quantum Gravity*, 26(8), 085014-1-085014-14. [More Information]

Wu, Y., Zhang, R. (2009). Unitary highest weight

representations of quantum general linear superalgebra. *Journal of Algebra*, 321(11), 3568-3593. [More Information]

2008

Billig, Y., Molev, A., Zhang, R. (2008). Differential equations in vertex algebras and simple modules for the Lie algebra of vector fields on a torus. *Advances in Mathematics*, 218(6), 1972-2004. [More Information]

Zhang, G., Zhang, R. (2008). Equivariant vector bundles on quantum homogeneous spaces. *Mathematical Research Letters*, 15(2), 297-307. [More Information]

Chaichian, M., Kulish, P., Tureanu, A., Zhang, R., Zhang, X. (2008). Noncommutative fields and actions of twisted Poincare algebra. *Journal of Mathematical Physics*, 49, 042302-1-042302-16. [More Information]

Lehrer, G., Zhang, R. (2008). On Endomorphisms of Quantum Tensor Space. *Letters in Mathematical Physics*, 86, 209-227. [More Information]

Zhang, R. (2008). Orthosymplectic Lie superalgebras in superspace analogues of quantum Kepler problems. *Communications in Mathematical Physics*, 280(2), 545-562. [More Information]

Chaichian, M., Tureanu, A., Zhang, R., Zhang, X. (2008). Riemannian geometry of noncommutative surfaces. *Journal of Mathematical Physics*, 49(7), 073511-1-073511-26. [More Information]

Cheng, S., Wang, W., Zhang, R. (2008). Super duality and Kazhdan-Lusztig polynomials. *Transactions of the American Mathematical Society*, 360(11), 5883-5924. [More Information]

2007

Cheng, S., Wang, W., Zhang, R. (2007). A Fock space approach to representation theory of $osp(2/2n)$. *Transformation Groups*, 12(2), 209-225. [More Information]

Su, Y., Zhang, R. (2007). Character and dimension formulae for general linear superalgebra. *Advances in Mathematics*, 211(1), 1-33. [More Information]

Su, Y., Zhang, R. (2007). Cohomology of Lie Superalgebras $slm|n$ and $osp(2|2n)$. *Proceedings of the London Mathematical Society*, 94(1), 91-136. [More Information]

2006

Zhang, H., Zhang, R. (2006). Dual canonical bases for the quantum general linear supergroup. *Journal of Algebra*, 304(2), 1026-1058. [More Information]

Information]

Chebotar, M., Ke, W., Lee, P., Zhang, R. (2006). On maps preserving zero Jordan products. *Monatshefte fur Mathematik*, 149(2), 91-101. [More Information]

Lehrer, G., Zhang, R. (2006). Strongly multiplicity free modules for Lie algebras and quantum groups. *Journal of Algebra*, 306(1), 138-174. [More Information]

2005

Zhang, H., Zhang, R. (2005). Dual canonical bases for the quantum special linear group and invariant subalgebras. *Letters in Mathematical Physics*, 73(3), 165-181. [More Information]

Scheunert, M., Zhang, R. (2005). Integration on Lie supergroups: A Hopf superalgebra approach. *Journal of Algebra*, 292(2), 324-342. [More Information]

Dobrev, V., Zhang, R. (2005). Positive energy unitary irreducible representations of the superalgebras $osp(1|2n, R)$. *Physics of Atomic Nuclei*, 68(10), 1660-1669. [More Information]

Lam, N., Zhang, R. (2005). Quasi-finite modules for Lie superalgebras of infinite rank. *Transactions of the American Mathematical Society*, 358(1), 403-439. [More Information]

Jarvis, P., Zhang, R. (2005). Resolution of the $GL(3)$ superset of $O(3)$ state labelling problem via the $O(3)$ -invariant Bethe subalgebra of the twisted Yangian. *Journal of Physics A: Mathematical and General*, 38(14), L219-L226. [More Information]

Zhang, R., Zou, Y. (2005). Spherical functions on homogeneous superspaces. *Journal of Mathematical Physics*, 46(4), 043513-1-043513-21. [More Information]

2004

Cheng, S., Zhang, R. (2004). Analogue Of Kostant's U-Cohomology Formula For The General Linear Superalgebra. *International Mathematics Research Notices*, 2004 (1), 31-53.

Cheng, S., Lam, N., Zhang, R. (2004). Character Formula For Infinite-Dimensional Unitarizable Modules Of The General Linear Superalgebra. *Journal of Algebra*, 273(2), 780-805. [More Information]

Cheng, S., Zhang, R. (2004). Howe Duality And Combinatorial Character Formula For Orthosymplectic Lie Superalgebras. *Advances in Mathematics*, 182(1), 124-172. [More Information]

Molev, A., Tolstoy, V., Zhang, R. (2004). On Irreducibility Of Tensor Products Of Evaluation Modules For The Quantum Affine Algebra. *Journal of Physics A: Mathematical and General*, 37(6), 2385-2399. [More Information]

Zhang, R. (2004). Quantum Superalgebra Representations On Cohomology Groups Of Non-Commutative Bundles. *Journal of Pure and Applied Algebra*, 191(3), 285-314. [More Information]

2003

Zhang, R. (2003). Howe duality and the quantum general linear group. *Proceedings of the American Mathematical Society*, 131(9), 2681-2692. [More Information]

Lai, K., Zhang, R. (2003). Multiplicity Free Actions of Quantum Groups and Generalized Howe Duality. *Letters in Mathematical Physics*, 64(3), 255-272. [More Information]

2002

Zhang, R. (2002). Quantum enveloping superalgebras and link invariants. *Journal of Mathematical Physics*, 43(4), 2029-2048. [More Information]

Scheunert, M., Zhang, R. (2002). The general linear supergroup and its Hopf superalgebra of regular functions. *Journal of Algebra*, 254(1), 44-83. [More Information]

2001

Scheunert, M., Zhang, R. (2001). Invariant integration on classical and quantum Lie supergroups. *Journal of Mathematical Physics*, 42(8), 3871-3897.
